

- Abortion 108
 Aceto-white lesions 265
 ACTH 42
 Acute pelvic pain 61
 – toxoplasma infection 36
 Adenocarcinoma 69
 Adenylate cyclase inhibition 73
 Adult-onset amenorrhea 200
 Amenorrhea 42
 Amniocentesis 28
 Amnion 73
 Amniotic fluid 231
 – – embolism 14
 – – index 28
 – – infection 28
 Androgens 217
 Aphrodisiacs 145
 Atrial natriuretic peptide 190

 Backup tissue sampling 94
 Bartholin's gland duct 278
 Birth weight, prediction 253
 Bleomycin 57
 Body fat 195

 CA 125 61
 Carcinoma 129
 Case-referent study 183
 Cell cycle 57
 Cervical cancer 57
 – carcinoma 133
 – dysplasia 52
 – pregnancy 213
 Cesarean section 89
 Chemotherapy 213
 Chorionic villous sampling 11
 Chronic toxoplasma infection 36
 Cisplatin 57
 Clinical effects 125
 Clinically manifest infants 36
 Clonality 204
 Computerized tomography 215
 Continuous-wave Doppler 80
 Contractions 11
 Controlled ovarian hyperstimulation 117
 Cortisol 42
 Cyclic guanosine monophosphate 190

 Differential methylation 204
 – polymerase chain reaction 209
 DNA ploidy 129
 Dopamine antagonist 42

 Doppler flow 24
 – ultrasound 19, 32
 Double-J catheter 274
 Drug-induced agranulocytosis 276
 Dysplasia 278

 Ectopic pregnancy 8
 EGF and TGF β mRNA expression 120
 Embryo morphology 151
 Endocervical pathogens 179
 Endometrial cancer 64, 271
 – thickness 64, 113, 271
 Endometrioma 61
 Endometriosis 113, 215
 –, pathogenesis 261
 Endometrium 129
 –, mid-cycle 101
 β -Endorphin 42
 Endothelin 14
 Endothelin-1 190
 Estrogens 145
 Extrarenal nephroblastoma 141

 Female sexuality 217
 Fetal blood 227
 – heart rate 168
 – markers 231
 – sex 145
 – therapy 227
 – weight estimation 84
 Fetoplacental circulation 244
 Fibroids 120
 Follicle-stimulating hormone 200
 Follicular fluid 1
 Follow-up 133
 Free β -human chorionic gonadotropin 162

 Genital infection 183
 – mucosa 97
 Glucose 195
 Gonadotropin-releasing hormone agonist 117
 Granulocyte colony stimulating factor 276
 – – – – concentration 5
 Granulosa cell 1
 Growth hormone 222

 Hatching 222
 Heart 14
 HER-2/*neu* 209
 Heterophile antibodies 139
 HIV infection 52
 Hormone testing 200

 Human chorionic gonadotropin 158
 – in vitro fertilization 151
 – papillomavirus 52, 265
 – – DNA 46
 – perfused cotyledon 244
 Hydronephrosis 215
 –, pregnancy 274
 Hydroureter 215
 5-Hydroxytryptamine 244
 Hyperplasia 129
 Hyperprolactinemia 42
 Hypothalamic-pituitary-ovarian axis, 1st-trimester loss 257

 Immunity 133
 Immunologic status 52
 Implantation, in vitro fertilization 151
 Indomethacin 244
 Induction 89
 –, labor 168, 174
 In situ hybridization 265
 Insulin, women athletes 195
 Intrauterine growth retardation 19
 – infection 28
 In vitro blastocyst development 222
 – – fertilization 117
 Irradiation 57

 Kidney 14
 Koilocytosis 265

 Labor 89
 Laparoscopy 8
 Laser 46
 Lithuania 28, 179
 Loop electrosurgical excision procedure 46
 Low birth weight 183
 Lung 14
 Luteal phase defect 101

 Magnetic resonance angiography 249
 – – imaging, insulin response 195
 Mouse preimplantation embryos 222
 Mozambique 183
 Müllerian anomalies, endometriosis 261
 Multiple pregnancy, frequency 151
 Myometrial resistance vessels 190
 Myometrium 11

 Natural killer activity 133
 – – cell 133
 Neutrophil counts, pregnancy 5
 Nitric oxide 244

- Nodes 133
 Normal vulvar mucosa 265
- Oligosynthetase 46
 Ophthalmic artery 32
 Ovarian cancer 209
 – torsion 61
 – tumors 141
 Oxytocin 168, 217
- Papillomavirus 52
 Pathogenesis, endometriosis 261
 Pelvic endometriosis 66
 – mass 141
 Perinatal death 174
 PGE release 73
 Phosphoglycerokinase 204
 Placenta 158
 Placental morphometry 253
 – separation 24
 – surface area, prediction 253
 Polymerase chain reaction 265
 Polymorphism 204
 Postmenopausal women 271
 Prealbumin 231
 Preeclampsia 32, 244
 Pregnancy 36, 80, 145, 158, 190, 244
 –, drug-induced agranulocytosis 276
 – interval 257
 – rates 101
 Pregnant women 5
 Preimplantation development, in vitro
 fertilization 151
- Prelabour rupture of membranes, preterm
 period 28
 Prematurity 84
 Prenatal diagnosis 84, 94, 227
 Preoperative oestradiol 125
 Preterm delivery 36
 – labour 179
 Prolactin 200
 Proliferation cell nuclear antigen 129
 Prostaglandin E₂ 89
 Pure follicle-stimulating hormone 117
- RU-486 108
- SCID mouse 97
 Severe preeclampsia 249
 Sex behavior 217
 – hormones 217
 Sonicaid System 8000 168
 Sonographic echo pattern 113
 Spontaneous abortion 36, 257
 Steroid hormones 217
 Steroid-sensitive proteins 145
 Steroidal assays 139
 Steroidogenesis 1
 Stillbirth 36, 174
- T-lymphocytes 133
 Third stage of labor 24
 Thyroid components 145
 Thyroid-stimulating hormone 200
 Transabdominal approach 80
 – ultrasonography 271
- Transferrin 1
 Transitional cell carcinoma 278
 Transvaginal approach 80
 – ultrasonography 271
 Tubal coagulation 8
- Ultrasonography 80, 84
 Ultrasound 101, 108
 Ureteral drainage 274
 – endometriosis 66
 – obstruction 66
 Urethral diverticulum 69
 Urinary sample 162
 Uterine artery 24, 80
 – leiomyoma 204
- Vaginal cancer 69
 – operation 125
 – scan 64
 Vasospasm 249
 Vulva 46
 Vulvar papillomatosis 265
- von Willebrand factor 14
 Wilm's tumor 141
 Women athletes 195
- Xenograft 97
 X-inactivation 204
