Proceedings of the Ninth Annual Meeting of the Electroshock Research Association
held at the Hotel Mayfair, Los Angeles, California, on May 3, 1953 Edited by L. Alexander

Table of Contents
Symposium on Focal Treatment
Electroencephalographic Changes Following Electrically Induced Focal Seizures. By Philip S. Bergman, David J. Impastato, Seymour Berg and Bhoda Feinstein-New York, N. Y. ................................................................. 271
Electroshock and Rhinencephalic Seizure States. By W. T. Liberson and J. G. Cadizaac-New Haven, Conn .......................................................... 278
Effects of Electroshock on the Cortical and Intracerebral Electroactivity of the Brain in Schizophrenic Patients. By Jose M. R. Delgado, Leo Alexander and Hannibal Hamlin-Boston, Mass ................................................................. 287
Physiodynamic Differentiation with Non-Convulsive Electrostimulation. By Paul H. Wilcox-Traverse City, Mich ...................................................... 300
Differential Stimulation in Anxiety. By Gerhard Hirschfeld-Paxton, N. J. . 306
Photic Stimulation of Psychiatric Patients. By Bernard L. Pace-Mo-New York City .......................................................... 309

Symposium on Succinylcholine Chloride
A Comparison of "Anectine" (Succinylcholine) and "Flaxedil" Effects on Blood Pressure, Pulse and Respiration in 30 Cardiac and 49 other Patients Given Electroconvulsive Therapy. By William L. Holt, Jr., Frederick D. McCandless, John Yacoubian and A. A. K. Mebed-Albany, WY ................................................. 313
The Use of Succinylcholine in Electro-Shock Therapy. By Neville Murray-Galveston, Texas ........................................... 320
Unidirectional Electroshock Relaxed by Succinylcholine-Chloride. By Leo Alexander, Irving E. Gilbert and Samuel E. Whitle-Boston, Mass ......................... 324

Techniques of Electro-Stimulative Therapy in Office Practice. By John D. Moriarty-Los Angeles, Calif ............................................................. 333
Intravenous Alcohol and Early Electroshock in the Treatment of Exhaustion Due to Mental Disorder. By Sol Lecy-Washington ......................................................... 339
Unidirectional Electro-Stimulated Convulsive Therapy. IV. Further Experiences in the Use of Multipolar Leads. By Emerick Friedman-Albany, N. Y ............................................................. 349
Continuation of Electroshock Therapy without Medication after Acute Vertebral Fractures. By Thomas C. Corey-Hartford, Conn ................................................. 362

Confinia Neurologica, Vol. 13, No. 5/6 (1958) 18
