Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
## Contents

Preface ......................................................................................................................................................... 5  
Opening Remarks ........................................................................................................................................ 7  

A Partial Theory of Sleep. A Novel View of Its Phenomenology and Organization  
Koella, W.P................................................................................................................................................... 9  

Human Slow Wave Sleep  
Horne, J.A.................................................................................................................................................... 18  

Clinical Aspects of Sleep Disturbances and Sleeping Drugs  
Kugler, J.; Rother, E................................................................................................................................... 22  

Sleep Recording in the Home with Automatic Analysis of Results  
Crawford, C.................................................................................................................................................. 30  

Comparison of Visual Analysis and Automatic Sleep Stage Scoring  
(Oxford Medilog 9000 System)  
Holler, L.; Riemer, H................................................................................................................................... 36  

Computer Evaluation of Sleep  
Froehl, E.; Korner, E.; Lechner, H................................................................................................................ 46  

Miniaturized Eight-Channel Telemetry System for Long-Term EEG Registration of  
Humans and Laboratory Animals  
Suess, E.; Goiser, P....................................................................................................................................... 53  

Sleep Spindle Detection and Its Clinical Relevance  
Declerck, A.C.; Martens, W.L.J.; Wauquier, W............................................................................................ 56  

Computerized Analysis of Epileptic Activity and Sleep in Mobile Long-Term EEG  
Monitoring  
Burr, W.; Stefan, H....................................................................................................................................... 61  

Sleep Disorders in Depression  
Van den Hoofdakker, R.H.; Beersma, D.G.M.; Dijk, D.J............................................................................... 66  

Effects of Lithium Carbonate on the Clinical Picture and the Sleep of Depressive Patients  
Dirrigl, V.; Folicicic-Stankoe, V.; Hodoba, D.; Mestrovic, H.; Takac, Z.......................................................... 71
