Bibliography on the Biology and Pharmacology of Lithium. 9

M.	Mogens	Schou
----	--------	-------

The Psychopharmacology Research Unit, Aarhus University Institute of Psychiatry, Psychiatric Hospital, Risskov, Denmark

This bibliography is the ninth in a series; it will also be the last. Electronic information storage and retrieval systems have developed so rapidly during recent years that traditional topical bibliographies must be considered outdated. References to publications about the biology and pharmacology of lithium can now be found readily through the general library data bases. Attention is directed to the computerized Lithium Information Center, Department of Psychiatry, University of Wisconsin, 600 Highland Avenue, Madison, WI 53792, to which questions may be addressed by letter or by telephone (608)263-6171. Drs. I. W. Jefferson, J.H. Greist and M. Baudhuin are in charge of the center. Authors publishing about lithium would do well in submitting reprints or full bibliographic information to the center.

The eight previous bibliographies appeared in: (1) *Psychopharmacology Bulletin* 5: No. 4, 33-62 (1969); (2) *Psychopharmacology Bulletin* 8: No. 4, 36-62 (1972); (3) *Psychopharmacology Bulletin* 12: No. 1, 49-74, No. 2, 69-83, No. 3, 86-99 (1976); (4) *Neuropsychobiology* 2: 161-191 (1976);

Reprints will not be available.

(5) *Neuropsychobiology* 4: 40-64 (1978); (6) *Neuropsychobiology* 5: 241-265 (1979); (1) *Neuropsychobiology* 6: 1-28 (1980), and (8) *Neuropsychobiology* 7: 26-55 (1981). The present bibliography follows the same lines as its predecessors. *Lithium Corporation of America* gave financial support.

The last year has seen relatively few major reviews. Svestka [1979] reviewed points of therapy and prophylaxis in psychiatry. Ehrlich and Diamond [1980] dealt with lithium, membranes, and manic-depressive illness. The papers from a conference on 'Lithium effects on granulopoiesis and immune function' were published by Rossio and Robinson [1980]. References to studies in which lithium was used merely as an aversive agent in conditioning experiments have usually not been included here. Such studies may, however, also contain observations of more general interest; they are reviewed by Smith [1977, 1981].

A small guidebook about lithium treatment, written for the information and instruction of patients, relatives, and health personnel, has appeared in English, German, Swedish and Danish [Schou, 1980, 1980, 1981, 1978].

Addendum

After the submission of the manuscript a volume has turned up, which contains a number of articles dealing with lithium in relation to alcohol and alcoholism: Goodwin, D.W.; and Erickson, C.K. (eds.): *Alcoholism and affective disorders: clinical, genetic, and biochemical studies* (SP Med. Sci. Books, New York 1979).
