Estrogen,
- feedback action of 129
- hypothalamic potentials,
effect on 31 -; implantation in hypothalamus 83, 129 -; neurosecretion, effect on 83 -, pituitary-adrenal function, effect on 184

Ether, pituitary-adrenal function, effect on 184

Endocraniosis, hypothalamic, hypothalamic neurons, pituitary hormones, effect on 350 -; EEG, in female rat 31 -; implantation of corticoids in 129, 228 -, implantation of estrogen in 83, 228 -; implantation of reserpine in 228 -; implantation of thyroxine in 15

Feedback, 'internal',
to hypothalamus 350 Frog larva, hypothalamic neurosecretory system in 45

Genetic-neuroendocrine interactions,
role in metamorphosis 293 Gold thioglucose, luteotrophic-lactogenic effects of 93 Growth, somatic, effect of hypothalamic lesions on 265 Growth hormone-releasing factor, separation of 341

Historical data; neuroendocrinology 1 Hydrocortisone, v. Cortisol 11-Hydroxycorticoids; in depressive illness 358 5-Hydroxytryptamine in brain and pineal, endocrine effects on 251 5-Hydroxytryptophan decarboxylase; in developing toad 257 Hypophysis, v. Hypophysis cranii
- subcommissural organ effect on 178 -; subtemporal, technique of, in monkey 313 Hypothalamic neurons, pituitary hormones, effect on 350 Hypothalamic-pituitary system; -, gold thioglucose, effect on 93 -, vascular connections 193, 214, 303 Hypothalamus; -, implantation of corticoids in 129, 228 -, implantation of estrogen in 83, 228 -; implantation of reserpine in 228 -; implantation of thyroxine in 15
Subject Index

-, lesioning of; effect on growth and obesity 265
-, lesioning of; effect on pituitary-thyroid system 158
-, neurosecretion in; effect of estrogen on 83
-, neurosecretion in; in frog larvae 45
-, perivascular structures in; in man 166
-, role in gonadal feedback systems 83
-, thyrotrophin-releasing factor in 4
-, thyrine sensitivity of; in tadpoles 293

Light, subcommissural organ, effect on 178 Liver enzymes, stress and cortisol effect on 138 Luteinizing hormone in pituitary, effect of puberty on 333

Mammary stimulation; in gold-thioglucose treated mice 93
Median eminence, ultrastructure of 214
Metabolic craniopathy, v. Endocraniosis
Metamorphosis
-, hormonal regulation of 45, 293
-, neuroendocrine-genetic interactions, role in 293
Morgagni's syndrome, v. Endocraniosis
Neuroendocrine-genetic interactions; role in metamorphosis 293
Neuroendocrinology; historical data 1
Neurosecretion in hypothalamus, effect of estrogen on 83
Neurosecretory granules, ultrastructure of 214
Neurosecretory materials; in subcommissural organ of teleosts 178
Neurosecretory nerve endings, ultrastructure of 214
Neurosecretory nuclei in hypothalamus, perivascular structures of 166
Neurosecretory system of hypothalamus; in frog larvae 45

Obesity; induction by hypothalamic lesions 265 Obituary; ERNST A. SCHARRER 65 Ovarian hypertrophy, hypothalamic steroid implants, effect on 129
Pentobarbital, pituitary-adrenocortical
system, effect on pineal gland, 5-hydroxytryptamine
in Pituitary; ectopic graft, sensitivity to thyroid hormone 276; luteinizing hormone in 333, pars intermedia, blood circulation of 193, 214, 303 Pituitary-adrenal system, anesthetic agents, effect on 184; estrogen, effect on 322; hypothalamic corticoid and reserpine implants, effect on 228; hypothalamic thyrotropin implants, effect on 15 Pituitary-gonadal feedback system, role of hypothalamus in 83 Pituitary hormones, hypothalamic neurons, effect on 350 Pituitary-thyroid system; hypothalamic lesions, effect on 158, regulation of 276 Phenoxycetamine, neurotropic calcergy, effect on 240 Portal circulation 193, 214, 303 Puberty, luteinizing hormone in pituitary, effect on 333

Reproductive functions, prolactin, hypothalamic thyrotropin implants, effect on 93 Reserpine; implantation in hypothalamus 228

Scharrer, Ernst A., obituary 65 Sexual behavior, hormones, effect on 144 Stress, induced by electrical shock in man 105; liver enzymes, effect on 138; 'social' in wild rat; effect on thyroid 113 Subcommisural organ, secretory activity of; in teleosts 178

Testosterone, sexual behavior, effect on 144 Thyroid feedback 276, 293 Thyroid function, neonatally administered thyroxine, effect on 121, regulation of 276, 'social stress', effect on 113

Subject Index
Thyrotrophin-releasing factor; concentration in hypothalamus; secretion; from ectopic pituitary grafts; regulation of Thyroid; sensitivity to Thyroid; implantation in hypothalamus; neonatal administration; effect of Thyroid; Thyrotrophin; Thyrotrophin-releasing factor; Thyroid;
-, sensitivity of hypothalamus in tadpole 293, thyrotrophin secretion, effect on 4 Transaminase in liver 138

Vaginal stimulation, hypothalamic potentials, effect on 31 Vascular system, in hypothalamic-pituitary region 193, 214, 303 Vasopressin, blood flow, effect on 23
