Original Papers

Deficits in Pituitary and Brain Cell Nuclear Retention of \( \text{H} \)Estradiol in Diabetic Rats Deprived of Insulin: Time Course and Metabolic Correlates
Dudley, S.D.; Ramírez, I.; Wade, G.N ..................................... 1

Estrous Behavior and Pituitary and Brain Cell Nuclear Retention of \( \text{H} \)Estradiol in Chronically Insulin-Deficient Female Rats
Dudley, S.D.; Ramírez, I.; Wade, G.N ..................................... 7

Hypothalamic LH May Play a Role in Control of Pituitary LH Release
Emanuele, N.; Oslapas, R.; Connick, E.; Kirsteins, L.; Lawrence, A.M ............................................................................... 12

Distribution of Estrogen-Concentrating, Neurophysin-Con-}

taining Magnocellular Neurons in the Rat Hypothalamus as
Demonstrated by a Technique Combining Radiography and Immunohistology (with 1 color plate)
Rhodes, C.H.; Morrell, J.I.; Pfaff, D.W .................................... 18

Evidence for a Growth Hormone Releasing Factor Mediating Alpha-Adrenergic Influence on Growth Hormone Secretion in the Rat
Eden, S.; Eriksson, E.; Martin, J.B.; Modigh, K ...................... 24

Immunocytochemical Localization of \( \beta \)-Endorphin-Containing Neurons in the Rat Brain
Finley, J.C.W.; Lindström, P.; Petrusz, P ................................. 28

Spontaneous and Melatonin-Induced Testicular Regression in Male Golden Hamsters: Augmented Sensitivity of the Old Male to Melatonin Inhibition
Chen, H.J .................................................................................. 43

Effect of Intrahypothalamic Implantation of Cortisone Acetate on the Onset of Circadian Corticosterone Rhythm in Neonatal Female Rats
Miyabo, S.; Ooya, E.; Hayashi, S. ............................................. 47

Phase Relation between Episodic Fluctuations of Spontaneous Locomotor Activity and Plasma Corticosterone in Rats with Suprachiasmatic Nuclei Lesions
Watanabe, K.; Hiroshige, T ...................................................... 52

Announcement ......................................................................... 60
Original Papers

Changes in Vasopressin Concentration in Plasma and Cerebrospinal Fluid in Response to Hemorrhage in Anesthetized Dogs
Wang, B.C.; Share, L.; Crofton, J.T.; Kimura, T. .......................... 61

Differential Effects of Somatostatin on the Release of Bioactive and Immunoactive Rat Growth Hormone in vitro
Russell, S.M................................................................. 67

Effects of CNS Active Drugs and Somatostatin Antiserum on Growth Hormone Release in Young and Old Male Rats
Sonntag, W.E.; Forman, L.J.; Miki, N; Steger, R.W.;
Ramos, T.; Arimura, A.; Meites, J ....................................... 73

Stimulation of Prolactin Secretion in Rhesus Monkeys by Vasoadtive Intestinal Polypeptide
Frawley, L.S.; Neil, J.D ........................................................ 79

Adrenal Medullary Secretory Response to Pontine and Mesencephalic Stimulation in the Rat
Matsui, H........................................................................... 84

Vasopressin Concentrations in Hypophysial Portal Plasma: Insignificant Reduction following Removal of the Posterior Pituitary Gland
Zimmerman, E.A............................................................. 88

Importance of Norepinephrine α2-Receptor Activation for Morphine-Induced Rat Growth Hormone Secretion
Eriksson, E.; Edén, S.; Modigh, K ........................................ 91

Modulation by Dopamine Antagonists of DNA Synthesis in the Pituitary Gland of the Male Rat
Jacobi, J.M.; Lloyd, H.M .................................................. 97

Restoration of Pituitary Prolactin Synthesis and Release by the Administration of Morphine to Rats Bearing a Transplanted Prolactin-Secreting Tumor
Login, I.S.; Nagy, I.; MacLeod, R.M................................. 101

Attenuation of Mofhine’s Depression of Serum Luteinizing Hormone by Lesions in the Amygdala
Lakoski, J.M.; Gebhart, G.F................................................. 105

Influence of Morning Melatonin Injections on the Antagonado-trophic Effects of Afternoon Melatonin Administration in Male and Female Hamsters
Richardson, B.A.; Vaughan, M.K.; Brainard, G.C.; Huerter,
J.J.; Santos, de los, R.; Reiter, R.J.................................. 112

Hypoleactinemia Counteracts the Testosterone-Induced Inhibition of the Preoptic Area Dopamine Turnover
Kalra, P.S.; Simpkins, J.W.; Kalra, S.P............................... 118

Progress in Neuroendocrinology

Catecholamines in the Hypothalamus: An Anatomical Review
Palkovits, M....................................................................... 123
Contents
No. 3, September
Original Papers

Involvement of Alpha-Adrenergic Mechanisms in Growth Hormone Release Induced by Opioid Peptides in Conscious Rats

Dual Action of Somatostatin upon Peristalsis in the Guinea Pig Isolated Ileum
Kromer, W.; Woinoff, R .................................................. 136

Naloxone and Anterior Pituitary Hormones: Effect on TRH Stimulation Test
Zanoboni, A.; Zecca, L.; Zanussi, C; Zanoboni-Muciacia, W ........................................................................... 140

Attenuation during Aging of the Postovariectomy Rise in Median Eminence Catecholamines
Wilkes, M.M.; Yen, S.S.C .................................................. 144

Activity of the Pituitary-Adrenal System in Rat Fetuses Subjected to Encephalectomy in Early or Late Stages of Pregnancy
Chatelain, A.; Dupouy, J.P .................................................. 148

Plasma Norepinephrine, Epinephrine and Dopamine Responses to Intracerebral Administration of a Met-Enkephalin Analog, (Z)-Ala-2-Met-Enkephalinamide, in Rats
Van Loon, G.R.; Appel, N.M .............................................. 153

Steroid Receptor Levels in Intact and Ovariectomized Estrogen-Treated Rats: An Examination of Quantitative, Temporal and Endocrine Factors Influencing the Efficacy of an Estradiol Stimulus
McGinnis, M.Y.; Krey, L.C.; MacLusky, N.J.; McEwen, B.S .................................................................................. 158

Effect of Androgen on Sexual Differentiation of Synaptic Organization in the Hypothalamic Arcuate Nucleus: An Ontogenetic Study
Matsumoto, A.; Arai, Y .................................................. 166

Effect of Intraventricular β-Endorphin and Morphine on Hypothalamic-Pituitary-Adrenal Activity and the Release of Pituitary β-Endorphin
Haracz, J.L.; Bloom, A.S.; Wang, R.I.H.; Tseng, L.-F. .................................................................................. 170

Effects of Short-Term Constant Light on the Proestrus Luteinizing Hormone Surge and Pituitary Responsiveness in the Female Rat
Watts, A.G.; Fink, G .................................................. 176

Light Intensity and the Control of Melatonin Secretion in Rats
Lynch, H.J.; Rivest, R.W.; Ronsheim, P.M.; Wurtman, R.J. ........................................................................... 181
Original Papers

TSH Release during the Estrous Cycle of the Rat: Variations in Responsiveness to Cervicovaginal Stimulation

Superior Cervical Ganglionectomy Depresses Norepinephrine Uptake, Increases the Density of α-Adrenoceptor Sites, and Induces Supersensitivity to Adrenergic Drugs in Rat Medial Basal Hypothalamus
Cardinali, D.P.; Vacas, M.I.; Luchelli de Fortis, A.; Stefano, F.J.E. .......................... 199

Effect of Neonatal Treatment with Monosodium Glutamate on the Secretion of α-MSH, β-Endorphin and ACTH in the Rat
Conte-Devolx, B.; Giraud, P.; Castanas, E.; Boudouresque, F.; Orlando, M.; Gilliuz, P.; Oliver, C. .......................... 207

Electrical Responses of Pineal Cells to Thyroid Hormones and Parathormone. A Microelectrophoretic Study
Semm, P.; Demaine, C.; Vollrath, L. .......................... 212

Effects of Abdominal Vagotomy on the Estrous Cycle of the Rat and the Induction of Pseudopregnancy
Burden, H.W.; Lawrence, Jr., I.E.; Louis, T.M.; Hodson, C.A. .......................... 218

Stimulation of the Hippocampus and Ovulation in the Rat: Specific or Nonspecific Effects
Carrillo, A. .......................... 223

Sexual Differences in the Sensitivity of Tuberoinfundibular Dopamine Neurons to the Actions of Prolactin
Demarest, K.T.; Moore, K.E. .......................... 230

Connections of Medial Preoptic Neurons with the Median Eminence and Amygdala. An Electrophysiological Study in the Rat
Layton, B.S.; Lafontaine, S.; Renaud, L.P. .......................... 235

Presence of Immunoreactive Luteinizing Hormone in the Rat Forebrain
Hostetter, G.; Gallo, R.V.; Brownfield, M.S. .......................... 241

Progress in Neuroendocrinology

Somatostatin: Regulation of Secretion
Arimura, A.; Fishback, J.B. .......................... 246

Progress in Neuroendocrinology

A Neurophysiological Approach to the Identification, Connections and Pharmacology of the Hypothalamic Tuberoinfundibular System
Renaud, L.P. .......................... 186

Announcement
No. 6, December

Original Papers
Effects of Alpha- and Beta-hCG Subunits on the Shortloop Feedback Control of Gonadotropins
Laborde, N.P.; Odell, W.D .......................................................257
Evidence for Hypothalamic Noradrenergic Involvement in Naloxone-Induced Stimulation of Luteinizing Hormone Release
Van Vugt, D.A.; Aylsworth, C.F.; Sylvester, P.W.; Leung, F.C.; Meites, J..........................................................261
Marked Reduction in Gonadal Steroid Hormone Levels in Rats Treated Neonatally with Monosodium L-Glutamate: Further Evidence for Disruption of Hypothalamic-Pituitary-Gonadal Axis Regulation
Nemeroff, C.B.; Lamartiniere, C.A.; Mason, G.A; Mason, G.A.; Squibb, R.E.; Hong, J.S.; Bondy, S.C. ...........................................265
Evidence for an Inhibitory Influence of the Pineal on Prolactin in the Female Rat
Leadem, C.A.; Blask, D.E ........................................................ 268
Serum Hormone Levels during Sleep and Wakefulness in the Immature Female Rat
Kimura, F.; Kawakami, M ........................................................ 276
Diurnal Variation in the Release of Alpha-MSH from Rat Hypothalamus and Pituitary
Monnet, F.; Reubi, J.-C; Eberle, A.; Lichtensteiger, W. . . 284 A Detailed Characterization of Prolactin Secretion Patterns during Daylight in Individual Cycling and Pseudopregnant Rats
Wiersma, J .............................................................................. 288
Relative Efficiency of Neural Firing Patterns for Vasopressin Release in vitro
Bicknell, R.J.; Leng, G .............................................................. 295
Effect of Two Indirectly Acting Dopamine Agonists on Prolactin Secretion in Normo- and Hyperprolactinemic Subjects: Comparison with the Effect of Nomifensine
Camanni, F.; Genazzani, A.R.; Leo, V. de; Molinatti, G.M.; Campagnoli, C; Cocchi, D.; Müller, E.E...............................................300
Evidence for a Possible Dopaminergic Control of Pituitary Alpha-MSH during Ontogenesis in Mice
Schmitt, G.; Stoecckel, M.E.; Koch, B .........................................307
Pituitary Cell Transplants to the Cerebral Ventricle Suppress the Pituitary of the Recipient Host

Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
Fig. 2. Microphotographs illustrating cells in the posterior subnucleus of the PVN which both concentrate estradiol in the nucleus (as demonstrated by autoradiography) and contain neurophysin in the cytoplasm (as demonstrated by immuno-histology). The brown stain is the final DAB reaction product produced by the immunohistologic procedure; the blue is the cresyl violet counterstain. × 675.
