Original Paper

Topography of the Somatostatin-Immunoreactive Fibers to the Stalk-Median Eminence of the Rat
Makara, G.B.; Palkovits, M; Antoni, F.A.; Kiss, J.Z. (Budapest/Bethesda, Md.) ....................................... 1

Influence of Blinding, Olfactory Bulbectomy and Pinealectomy on Plasma Prolactin Levels in the Neonatally Androgenized Female Rat
Gala, R.R.; Haisenleder, D.J.; Pieper, D.R. (Detroit, Mich.) .................................................................. .... 9

Characterization of a Pineal-Independent Diurnal Rhythm in Neural Estrogen Receptors and Its Possible Behavioral Consequences
Wilson, M.A.; Clark, A.S.; Clyde, V.; Roy, EJ. (Champaign, Ill.) ............................................................ 1 4

Characterization of Estrogen-Induced Adenohypophyseal Tumors in the Fischer 344 Rat
Phelps, C; Hymer, W.C. (University Park, Pa.) ......................................................................................... ........ 23

Angiotensin-Converting Enzyme in Epithelial and Neuroepithelial Cells

Inhibition by Melatonin of Dopamine Release from Rat Hypothalamus in vitro: Variations with Sex and the Estrous Cycle
Zisapel, N.; Egozi, Y.; Laudon, M. (Tel-Aviv) ............................................................................................... ......... 41

Prolonged Foot-Shock Induced Analgesia: Glucocorticoids and Non-Pituitary Opioids Are Involved
Lim, A.T.W.; Oei, T.P.; Funder, J.W. (Melbourne/Bundoora) ........................................................................ ... 59

Comparative Study in vivo and in vitro of the Differentiation of Immunoreactive Gonadotropic Cells in Fetal Rat Anterior Pituitary
Begeot, M.; Dubois, M.P.; Dubois, P.M. (Oullins/Nouzilly) .....................................................................  52

Visual and Metabolic Stimuli Cause Adrenocortical Suppression in Fasted Chickens during Refeeding
Harvey, S.; Klandorf, H.; Plochasov, Y. (HeRehovot) ....................................................................................... 59

Comparative Immunocytochemical Localization of Corticotropin Releasing Factor (CRF-41) and Neurohypophysial Peptides in the Brain of Brattleboro and Long-Evans Rats
Burlet, A.; Tonon, M.-C; Tankosie, P.; Coy, D.; Vaudry, H. (Les-Nancy/Mont-Saint-Aignan/New Orleans, La.) .......................................................................................................................... 64

Deficits in Drinking and Vasopressin Secretion after Lesions of the Nucleus medianus
Mangiapan, M.L.; Thrasher, T.N.; Kef, L.C.; Simpson, J.B.; Ganong, W.F. (San Francisco, Calif.) . . 73

Effect of Anteroventral Third Ventricle Lesions on Vasopressin Release by Organ-Cultured Hypothalmo-Neurohypophyseal Explants
Sladek, CD.; Johnson, A.K. (Rochester, N.Y./Iowa City, Iowa)....................................................................... 78

Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
