Seventeenth Annual Meeting of the Society for the Study of Reproduction
Laramie, July 24-26, 1984

This meeting will be held at the University of Wyoming in Laramie from July 24 through 26, 1984, with registration and an opening reception on July 23, 1984. The program will include a Symposium entitled ‘Communication and Control in Reproduction’, an awards ceremony with a lecture by the recipient of the research award, as well as sessions devoted to research papers. To obtain additional information about the Symposium or submission of contributed papers, please contact:

Executive Secretary,
The Society for the Study of Reproduction,
309 West Clark Street,
Champaign, IL 61820 (USA).

The First International Symposium on Reproductive Medicine
San Juan, Puerto Rico, October 4-6, 1984

will be held October 4-6, 1984 in Caribe Hilton International Hotel, San Juan, Puerto Rico instead of Houston, Texas as originally announced. The symposium will deal with the following areas in reproductive medicine: pathophysiology and management of reproductive system disorders, systemic consequences of reproductive system pathology, current research issues and perspectives in reproductive medicine. Over 25 invited international authorities will participate in the various sessions and round tables. Brief communications will be considered for presentation. For further information contact:

Europe: G. Frajese, Member of Steering Committee, Clinica Medica 5, Via Di Porta Pinciana, 34, 00187 Rome (Italy)

USA: E. Steinberger, Chairman of Steering Committee,
Department of Reproductive Medicine and Biology, University of Texas Medical School at Houston, PO Box 20708, Houston, TX 77025 (USA)

The Symposium is sponsored by The University of Texas Medical School at Houston, Texas; The Faculty of Medicine, University of Rome, Italy, and Serono Symposia, Roma, Italy.
Preliminary topics to be discussed:

**Symposia:** Electrophysiological characteristics of developing neuronal cells; Endogenous ligands for drug receptor in growing CNS; Ontogenesis, function and pharmacological modification of blood-brain barrier; Pharmacological manipulation of neuronal growth and plasticity; Critical nutritional and environmental factors in brain development; Experimental biology of brain tumors.

**Round Tables:** Issues and conflicts in neurobiology; Molecular pharmacology of developing neurons; Protein-lipid interactions in neural membranes during development; Drugs and gene expression.

**Lecture:** Clinical problems in perinatal neurobiology.

**Workshop:** Frontiers in methodology – new approaches to nervous tissue culture.

**Poster Sessions**

Scientific Secretariat: F. Caciagli, Department of Pharmacology, University of Chieti Medical School, Via dei Vestini, I-66013 Chieti (Italy).

For further information please contact the Organizing Secretariat directly:

Fondazione Giovanni Lorenzini, Via Montenapoleone, 23, I-20121 Milan (Italy).

Phone: (02) 702267 or 73358. Cable: Lorenzfound.
