Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
Original Paper

Effects of Neonatal Treatment with Monosodium Glutamate on Growth Hormone Release Induced by Clonidine and Prostaglandin E2 in Conscious Male Rats
Katakami, H.; Kato, Y.; Matsushita, N.; Imura, H. ........................ 1

Beta-Adrenergic Receptors in the Premammillary Nucleus Mediate the Inhibition of LH Release Evoked by Locus ceruleus Stimulation
Dotti, C; Taleisnik, S. ............................................................... 6

Hypothalamic Regulation of Mating-Induced Prolactin Release. Effect of Electrical Stimulation of the Medial Preoptic Area in Conscious Female Rats
Gunnet, J.W.; Freeman, M.E................................................... 12

Comparative Chromatography of Hypothalamic Corticotrophin-Releasing Factors
Gillies, G.E.; Puri, A.; Linton, E.A.; Lowry, P.J. .......................... 17

A Role for Serotonin in the Hypothalamic-Pituitary-Adrenal Response to Insulin Stress
Yehuda, R.; Meyer, J.S ........................................................... 25

Elevated Corticosterone Levels. A Possible Cause of Reduced Axon Sprouting in Aged Animals
DeKosky, ST.; Scheff, S.W.; Cotman, C.W............................... 33

Anterior Pituitary Dopamine Receptors during the Rat Estrous Cycle. A Detailed Analysis of Proestrus Changes Pasqualini, C; Lenoir, V.; El Abed, A.; Kerdelhué, B. . . . 39

Regional Distribution of Pro-Opiomelanocortin-Derived Peptides in the Human Brain

Function of Tuberoinfundibular Dopamine Neurons in Pargyline- and Reserpine-Treated Rats
Gudelsky, G.A.; Meltzer, H.Y............................................... 51

Opioid and Dopamine Involvement in Prolactin Release Induced by Arginine Vasotocin and Vasopressin in the Male Rat

Relationship between Dopamine Release into Hypophysial Portal Blood and Prolactin Release after Morphine Treatment in Rats
Arita, J.; Porter, J.C ................................................................. 62

Neonatal Estrogen Affects Preoptic Anterior Hypothalamic LHRH Differently in Adult Male and Female Rats Elkind-Hirsch, K.; King, J.C.; Gerall, A.; Leeman, S.E. . 68
