On
Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
Original Paper

Evidence for Estrogen-Receptive GABAergic Neurons in the Preoptic/Anterior Hypothalamic Area of the Rat Brain
Flügge, G.; Oertel, W.H.; Wutke, W. .................................................... 1

Dehydration Increases the Electrically Evoked Dopamine Release from the Neural and Intermediate Lobes of the Rat Hypophysis Racké, K.; Holzbauer, M.; Cooper, T.R.; Sharman, D.F. .............. 6

Effects of Anterior Hypothalamic Deafferentation and Neontal Monoamines-L-Glutamate Treatment on Pulsatile LH Secretion in the Castrated Rat
Rose, P.A.; Wecck, R.F. ................................................................. 12

Evidence for a Role of Prostaglandins in the Adrenergic Neuro-muscular Mechanism of the Ovarian Follicle Walks, B.; Owman, C; Schmidt, G.; Sjöberg, N.-O. ... 18

Changes in Gamma-Aminobutyric Acid High Affinity Binding to Cerebral Cortex Membranes after Pinealectomy or Melatonin Administration to Rats Castroviejo, D.A.; Rosenstein, R.E.; Romeo, H.E.; Cardinall, D.P. ............................... 24

Effects of Estradiol and Progesterone on Immunoreactive Forms of Hypothalamic Luteinizing Hormone-Releasing Hormone
Drouva, S.V.; Gautron, J.-P.; Pattou, E.; Laplante, E.; Kordon, C. ............................................................................................... 32

Aldosterone Effects on Salt Appetite in Adrenalec-tomized Rats McEwen, B.S.; Lambdin, L.T.; Rainbow, T.C.; De Nicola, A.F. ........................................................................................................ 38

Effect of Various Blockers of Arachidonic Acid Metabolism on Release of Beta-Endorphin- and Adrenocorticotropin-Like Immunoreactivity Induced by Phospholipase A2 from Rat Adenohypophysis in vitro
Knepel, W.; Mein, G ................................................................. 44

Chronic Estradiol Treatment Decreases Angiotensin II Receptor Density in the Anterior Pituitary Gland and Adrenal Cortex but Not in the Mesenteric Artery
Carrière, P.D.; De Lean, A.; Gutkowska, J.; Genest, J.; Cantin, M. ........................................................................................................ 49

Suppression of Receptive and Proceptive Behavior in Ovari-ectomized, Estrogen-Progesterone-Primed Rats by Intraventricular Beta-Endorphin: Studies of Behavioral Specificity
Wiesner, J.B.; Moss, R.L. ................................................................. 57

Inhibition of Cell Nuclear Androgen Receptor Binding and Copulation in Male Rats by an Antandrogen, Sch 16423
McGinnis, M.Y.; Mirth, M.C. ................................................................. 63

Interactions of Testosterone and Short-Photoperiod Exposure on the Neuroendocrine Axis of the Male Syrian Hamster
Steger, R.W.; Matt, K.S.; Bartke, A ............................................................. 69
A Vasopressin Receptor Antagonist Has Nonspecific Neu-

Porter, J.P.; Brody, M.J........................................................................... 75

Progress in Neuroendocrinology
Receptor-Mediated Actions of Corticotropin-Releasing Factor
in Pituitary Gland and Nervous System
Aguirre, G.; Wynn, P.C.; Harwood, J.P.; Hauger, R.L.;
Millan, M.A.; Grewe, C.; Carl, K.J.......................................................... 79
