Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
No.1

Original Paper
Stimulation of Luteinizing Hormone Release and Cyclic Nucleotide Production by Arachidonic Acid in Cultured Pituicytary Gonadotrophs
Kiesel, L.; Catt, K.J.................................................................  1
Possible Role of Alpha-2-Noradrenergic Receptors in Modulation of Sexual Behavior in Female Guinea Pigs
Vincent, P.A.; Thornton, J.; Feder, H.H..................................  10
Inhibition of Hypothalamic Gonadotropin-Releasing Hormone Release by Endogenous Opioid Peptides in the Female Rabbit
Orstead, K.M.; Spies, H.G ......................................................  14
Estrogen Priming Affects the Sensitivity of Midbrain Central Gray Neurons to Microiontophoretically Applied LHRH but Not Beta-Endorphin
Schless, M.C.; Dudley, C.A.; Moss, R.L..................................  24
Distribution of Neurotransmitter Binding Sites in the Cat Median Eminence
Seybold, V.S.; Wilcox, B.J......................................................  32
Oxytocin and Vasopressin Immunoreactivity in Hypothalamic and Extrahypothalamic Sites in Late Pregnant and Post-partum Rats
Caldwell, J.D.; Greer, E.R.; Johnson, M.F.; Prange, A.J., Jr.; Pedersen, C.A.................................................................  39
A Brain Site for the Antagonadal Action of Melatonin in the White-Footed Mouse (Peromyscus leucopus): Involvement of the Immunoreactive GnRH Neuronal System
Glass, J.D.; Knotts, L.K..........................................................  48
Intracerebroventricular Oxytocin Stimulates Maternal Behavior in the Sheep
Kendrick, K.M.; Keverne, E.B.; Baldwin, B.A...........................  56
The Secretory Activity of the Tubero-infundibular Dopaminergic Neurons Is Modulated by the Thyroid Status in the Adult Rat: Consequence on Prolactin Secretion Reymond, M.J.; Benotto, W.; Lemarchand-Béraud, T... 62
Histamine Stimulates Progesterone Synthesis and Cyclic Adenosine 3',5'-Monophosphate Accumulation in Isolated Preovulatory Rat Follicles
Schmidt, G.; Ahren, K.; Brännström, M.; Kannisto, P.; Owman, C; Sjöberg, N.; Tenenbaum, A...............................  69
Stress-Induced Changes in Cholecystokinin and Substance P Concentrations in Discrete Regions of the Rat Hypothalamus Siegel, R.A.; Düker, E.-M.; Pahnke, U.; Wuttke, W. . . . 75
GnRH Secretion throughout the Ovine Estrous Cycle
Clarke, I.J.; Thomas, G.B.; Yao, B.; Cummins, J.T. ... 82
Rapid Communications

Ca²⁺-Dependent Histaminergic Regulation of Proenkephalin mRNA Levels in Cultured Adrenal Chromaffin Cells
Kley, N.; Loefner, J.P.; Höllt, V. .................................................. 89

Delta Sleep Inducing Peptide Inhibits Somatostatin Release via a Dopaminergic Mechanism
Iyer, K.S.; McCann, S.M......................................................... 93

Announcements........................................................................ 96

No. 2

Original Paper

Neuropeptide Y Stimulates the Release of Luteinizing Hormone-Releasing Hormone from Medial Basal Hypothalamus in vitro: Modulation by Ovarian Hormones
Crowley, W.R.; Kalra, S.P ....................................................... 97

Growth Hormone Secretion after Hypothalamic Periventricular Lesions in the Rat
Praputpittaya, C; Arita, J.; Kimura, F......................................... 104

In vivo Release of Dopamine, Luteinizing Hormone-Releasing Hormone and Thyrotropin-Releasing Hormone in Male Rats Bearing a Prolactin-Secreting Tumor

Electrical Stimulation of Ventral versus Dorsal Mesencephalic Tegmental Areas in the Conscious Rat: Effects on Luteinizing Hormone Release
Bergen, H.; Leung, P.C.K ........................................................ 117

A Pharmacological Dose of Melatonin Increases PRL Levels in Males without Altering Those of GH, LH, FSH, TSH, Testosterone or Cortisol

Regional Distribution of Calcitonin Gene-Related Peptide and Its Specific Binding Sites in Rats with Particular Reference to the Nervous System
Wimalawansa, S.J.; Emerson, P.C.; MacIntyre, J................................ 131

Growth Hormone Secretory Patterns in Young, Middle-Aged and Old Female Rats
Takahashi, S.; Gottschall, P.E.; Quigley, K.L.; Goya, R.G.; Meites, J.......................................................... 137
The Corticotropin-Releasing Factor Release in Rat Hypophysial Portal Blood Is Mediated by Brain Catecholamines
Guillaume, V.; Conte-Devolx, B.; Szafarczyk, A.; Malaval, F.; Pares-Herbute, N.; Grino, M.; Alonso, G.; Assenmacher, I.; Oliver, C ................................................................. 143
Assessment of Corticotropin-Releasing Factor, Vasopressin and Somatostatin Secretion by Fetal Hypothalamic Neurons in Culture
Clarke, M.J.O.; Lowry, P.; Gillies, G ........................................... 147
Immunoreactive Prolactin in the Rat Hypothalamus: In vitro Release and Subcellular Localization
DeVito, W.J.; Connors, J.M.; Hedge, G.A................................. 155
Growth Hormone Responsiveness in vivo and in vitro to Growth Hormone Releasing Factor in the Spontaneously Diabetic BB Wistar Rat
Serri, O.; Brazeau, P ................................................................ 162
Rapid Naloxone-Induced Alterations of Androgen Variables in the Growing Male Rat
Reevaluation of the Effects of Castration on Naloxone-Sensitive Opiate Receptors in the Male Rat Brain
Cicero, T.; O’Connor, L.H.; Bell, R.D ................................. 176
Announcement ........................................................................ 184
Presence of an Atrial Natriuretic Factor-Like Peptide in the Rat Superior Cervical Ganglia
Debinski, W.; Gutkowska, J.; Kuchel, O.; Racz, K.; Buu, N.T.; Cantin, M.; Genest, J. ................................. 236
Vasoactive Intestinal Polypeptide and Dopamine: Effect on Prolactin Secretion in Normal Women and Patients with Microprolactinomas
Conti, A.; Togni, E.; Travaglini, P.; Muratori, M.; Faglia, G. 241
Epoxy Derivatives of Arachidonic Acid Are Potent Stimulators of Prolactin Secretion
Cashman, J.R.; Hanks, D.; Weiner, R.I. ............................... 246
Effects of Stimulus Frequency and Potassium Channel Blockade on the Secretion of Vasopressin and Oxytocin from the Neurohypophysis
Bondy, C.A.; Gainer, H.; Russell, J.T. ............................... 258
Ultrastructural Evidence for Gamma Aminobutyric Acid-Immunoreactive Synapses on Somatostatin-Immunoreactive Perikarya in the Periventricular Anterior Hypothalamus
Willoughby, J.O.; Beroukas, D.; Blessing, W.W. ..................... 268
