Peter Debye Prize 1992 on ‘Aging of the Brain’ Awarded to Dr. John Hardy from the Department of Biochemistry, St. Mary’s Hospital Medical School, London, UK

The University of Limburg at Maastricht, The Netherlands, has been given the opportunity of awarding a scientific award, the Peter Debye Prize, once every 2 or 3 years. The Peter Debye Prize 1992 on ‘Aging of the Brain’ was awarded to Dr. John Hardy, from the Department of Biochemistry, St. Mary’s Hospital Medical School, London, UK, in recognition of his achievements in uncovering a cause for Alzheimer’s disease, the most common disease which afflicts the aging brain. The prize was presented on January 10, 1992, at the academic ceremony on occasion of the 16th dies natalis of the university.
