INTRODUCTION .......................................................... 1 (171)

COMMITTEE REPORTS

Genetic constitution of chromosomes 1 and 2 (J.L. Hamerton and P.J.L. Cook) ................................................................. 3 (173)
Genetic constitution of autosomes other than chromosomes 1 and 2 (F.H. Ruddle and E.R. Giblett) ........................................ 13 (183)
Genetic constitution of the X chromosome (P.L. Pearson, R. Sanger, and J.A. Brown) ..................................................... 20 (190)
Unassigned syntenic groups and theoretical considerations (V.A. McKusick and J.H. Edwards) ............................................ 26 (196)
Gene markers for mapping the human genome: the 1974 listing (T.B. Shows) ............................................................... 29 (199)
Chromosome markers (J.L. Hamerton) ..................................... 38 (208)
Terminology (E.R. Giblett) .................................................... 40 (210)
Organization of future meetings (D. Bergsma) ...................... 41 (211)
References to the committee reports ........................................ 43 (213)

SHORT REPORTS

K.C. Atwood, A.S. Henderson, D. Kacian, and E.M. Eicher
On the feasibility of mapping low-multiplicity genes by in situ hybridization ................................................................. 59 (229)

B. Bengtsson and W.F. Bodmer
The strategy of gene assignment using hybrid lines: the number of lines needed to exclude chance associations .......................... 62 (232)
K. Berg, G. Beckman, and L. Beckman
A search for linkage between the Ag and dimeric superoxide dismutase (SOD-2) loci .......................................................... 67 (237)
W.B. Bias, D.S. Borgaonkar, R.S. Kucherlapati, and F.H. Ruddle
Lymphocytotoxicity inhibition: a reliable method for HL-A typing of cultured cell lines ....................................................... 71 (241)
A.B. Bijnen, I. Schreuder, CM. Giles, W.R.T. Los, P. Meera Khan,
W.S. Volkers, and J.J. van Rood
A study of genetic markers in families with a recombination in the HL-A region ................................................................. 77 (247)

D.S. Borgaonkar, D.R. Builing, C. Partridge, F.H. Ruddle, and V.A. McKusick
Chromosomal variation in man: catalog of chromosomal variants and anomalies ...................................................... 82 (252)

H. Bosker and L.E. Nijenhuis
Possible linkage between a gene causing reinclusion of molar I and blood group P ......................................................... 85 (255)

D.W. Buck and W.F. Bodmer
The human species antigen on chromosome 11 .................... 87 (257)

W.G. Burgerhout, A.P.M. Jongsmal, J. de Wit, H. van Someren, and P. Meera Khan
Regional mapping of seven enzyme loci on human chromosome 1 by use of somatic cell hybridization ..................... 90 (260)

R.S.K. Chaganti, L.R. Weitkamp, J. Fleming, G. Miller, and J. German
Polymorphic chromosomes and gene assignment in man ...... 93 (263)

S. Chen, R.P. Creagan, E.A. Nichols, and F.H. Ruddle
Assignment of human esterase-D gene to chromosome 13 .... 99 (269)

E.H.Y. Chu, C.C. Chang, and N.C. Sun
Synteny of the human genes for Gal-1-PT, ACP, MDH-I, and Gal-Act and assignment to chromosome 2 ..................... 103 (273)

G.B. Côte and J.H. Edwards
Centromeric linkage in Down’s syndrome .......................... 107 (277)

R.P. Creagan, S. Chen, and F.H. Ruddle
Chromosome assignments of genes in man using mouse-human somatic cell hybrids: association of diphtheria toxin sensitivity with chromosome 5 ......................................................... 109 (279)

R.P. Creagan and F.H. Ruddle
The clone panel: a systematic approach to gene mapping using interspecific somatic cell hybrids ................................... 112 (282)

Assignment and regional localization of a gene coding for galactokinase to human chromosome 17q21-22 ..................... 117 (287)

R.C. Elston
An approximation for the prior probability of autosomal linkage 120 (290)

Mapping the Xg red blood cell antigen in human-Chinese hamster cell hybrids: the Xg locus is possibly located on the short arm of the X chromosome ......................................................... 123 (293)

M.A. Ferguson-Smith
Gene mapping by exclusion ................................................. 126 (296)
M.A. Ferguson-Smith, P.M. Ellis, O. Mutchinick, K.P. Glen, G.B. Côté, and J.H. Edwards
Centromeric linkage ............................................................... 130 (300)

U. Francke
Regional localization of the human genes for malate dehydrogenase-I and isocitrate dehydrogenase-II on chromosome 2 by inter specific hybridization using human cells with the balanced reciprocal translocation t(1;2)(q32;q13) ....................................... 138 (308)

U. Francke and N. Busby
Assignments of the human genes for lactate dehydrogenase-A and thymidine kinase to specific chromosomal regions.............. 143 (313)

H. Galjaard, A. Hoogeveen, W. Keijzer, H.A. de Wit-Verbeek, and A.J.J. Reuser
Different gene mutations in variants of GM1- and GM2-gangliosidosi s demonstrated by enzyme analysis of (single) somatic hybrid cells 150 (320)

T. Gedde-Dahl, Jr., P.J.L. Cook, M.K. Fagerhol, and J.A. Pierce
The $G_{m}$-Pi linkage: a summary estimate ............................... 157 (327)

A new polymorphic enzyme, uridine monophosphate kinase: gene frequencies and a linkage analysis .............................. 159 (329)

VI (166)

Contents

P. Goodfellow, E. Jones, V. Van Heyningen, E. Solomon, R. Ken net, M. Bobrow, and W.F. Bodmer
Linkage relationships of the HL-A system and $\gamma^{52}$ microglobulin .. 162 (332)

The location of four human satellite DNAs on human chromosomes 168 (338)

Characterization and chromosomal location of DNA in condensed and dispersed human chromatin .............................. 170 (340)

K.-H. Grzeschik
Regional mapping of human chromosomes 1 and 11 .............. 172 (342)

J.L. Hamerton, T. Mohandas, P.J. McAlpine, and G.R. Douglas
Assignment of three human gene loci to regions of chromosome 2 176 (346)

J.L. Hamerton, T. Mohandas, P.J. McAlpine, and G.R. Douglas
Localization of gene loci on chromosome 12 and the X in man .. 179 (349)

V. van Heyningen, M. Bobrow, W.F. Bodmer, S. Povey, S.E. Gardiner, and D.A. Hopkinson
Assignment of the genes for human mitochondrial malate dehydrogenase to chromosome 7, for mannose phosphate isomerase and pyruvate kinase to chromosome 15, and, probably, for human esterase-D to chromosome 13 using man-mouse hybrids ....... 183 (353)

K.W. Jones, I. Purdom, J. Prosser, and G. Corneo
Localization of human satellite DNA I ................................. 188 (358)

A.P.M. Jongsma, A. Hagemeijer, and P. Meera Khan
Regional mapping of $TPI$, LDH-B, and Pep-B on chromosome 12
of man .......................................................... 189 (359)
R.S. Kucherlapati, R.M. Baker, and F.H. Ruddle
Ouabain as a selective agent in the isolation of somatic cell hybrids 192 (362)
R.S. Kucherlapati, R.P. Creagan, E.A. Nichols, D.S. Borgaonkar, and F.H. Ruddle
Synteny relationships of four human genes: mannose phosphate isomerase to pyruvate kinase-3 and triose phosphate isomerase to lactate dehydrogenase-B ........................................ 194 (364)
P.J. McAlpine, T. Mohandas, L. Komarnicki, V. Niewczas-Late, A. Vust, and J.L. Hamerton
Further data on the assignment of the phosphoglucomutase \( PGM2 \) gene locus to chromosome 4 in man ........................ 198 (368)

Contents

P.J. McAlpine, T. Mohandas, L. Komarnicki, V. Niewczas-Late, A. Vust, and J.L. Hamerton
Tentative assignment of the peptidase-A \( (Pep-A) \) gene locus to the \( (q21 \rightarrow qter) \) region of chromosome 18 in man ............... 200 (370)
J.K. McDougall, S.M. Elsevier, R.S. Kucherlapati, and F.H. Ruddle
Regional localization of human genes in virus-induced uncoiler regions................................................................. 202 (372)
P. Meera Khan, A. Westerveld, E.M. Wurzer-Figurelli, and D. Bootsma
α-Galactosidase in man-Chinese hamster somatic cell hybrids ... 205 (375)
Linkage group I: multipoint mapping ................................. 211 (381)
C.W.H. Partridge and F.H. Ruddle
A computerized system for storage, retrieval, and analysis of gene mapping data ...................................................... 220 (390)
