ELEVENTH INTERNATIONAL WORKSHOP ON HUMAN GENE MAPPING

The Eleventh International Workshop on Human Gene Mapping will be held from 18-22 August 1991 in London, UK.

The structure of the meeting will represent a transition from that of earlier Workshops. There will be meetings of individual Chromosome Committees and interest groups during the first two days, to include talks and workshops on such items as the genetic map, physical map, mapping panels, probe resources and loci of particular interest. Over the final two days, there will be open discussion meetings on topics such as physical mapping, genetic mapping, ethics, informatics and plenary scientific talks by invited speakers on major issues in gene mapping.

Attendance will be limited and priority given to authors of accepted abstracts. The deadline for receipt of abstracts will be 15 April 1991.
Recipients of this notice by mail are included in the current circulation list for announcements and further information about the Workshop. Colleagues and others who wish to be placed on the mailing list should contact:
