Starting with this issue a continuously updated calendar of future events of various types that may be of interest to our readers will appear in the back, or as a loose flyer insert in most issues. We welcome information from our readers on upcoming events or activities that take place in any part of the world. In addition to meetings of all types, the announcements may include those for workshops, courses, exhibits, and other functions. Announcements may also be made of the establishment of special working groups or committees, even if these do not plan to meet, or the meeting date has not yet been established. Announcements should include information similar to that illustrated in the present calendar. In particular, a contact person should be listed along with that person's address, phone and FAX numbers. In the case of meetings, information as to any restrictions for attendance should also be indicated. Announcements should be very brief and formatted as similar as possible to that illustrated in this issue. They should be sent to the Editorial Office in New York at the address listed below.

Readers are cautioned to check dates of meetings prior to attendance since these are sometimes altered after publication, or may be in error. Notification of subsequent changes or of any errors will be appreciated and suggestions regarding the content or organization of this section will be welcomed.

Some of the information included in the Calendar is extracted from the Human Genome News of the National Center for Human Genome Research (NCHGR) of the National Institutes of Health, and the Office of Health and Environmental Research, U.S. Department of Energy, USA. The permission to do this is very much appreciated, as is the cooperation of Dr. Elke Jordan, Deputy Director, and Ms. Leslie Fink, Public Affairs Officer, of the NCHGR.
