Special Section

Cytogenet Genome Res 1993;62:I-IV

Contents, Vol. 62, 1993

Founded 1962 as ‘Cytogenetics’ by H.P. Klinger

Editor-in-Chief H.P. Klinger
Department of Molecular Genetics Albert Einstein College of Medicine 1300 Morris Park Avenue Bronx, NY 10461, USA Tel.: (718) 430-2451; FAX: (718) 430-2454

Managing Editors
(address as for H.P. Klinger) M. Liao

Associate Editors and Sections
Somatic cell genetics D. Bootsma
Department of Cell Biology and Genetics Erasmus University P.O. Box 1738 Rotterdam, The Netherlands Tel: (010) 408 71 86; FAX: (010) 408 72 12

U. Francke
Department of Genetics
Howard Hughes Medical Institute
Beckman Center for Molecular and
Genetic Medicine
Stanford University Medical Center
Stanford, CA 94305-3428, USA
Tel.: (415) 725-8089; FAX: (415) 725-8142

Human (including clinical) cytogenetics J.L. Hamerton Department of Human Genetics
University of Manitoba School of Medicine 230-770 Bannatyne Avenue Winnipeg, Manitoba R3E 0W3, Canada Tel: (204) 788-6394/5; FAX: (204) 788-8712

Editors
A. Bernheim, Villejuif
G. Camerino, Pavia
R.S.K. Chaganti, New York, N.Y.
M.M. Cohen, Baltimore, Md.
D.W. Cox, Toronto, Ontario
T. Cremer, Heidelberg
A. Hagemeijer, Rotterdam
T.J. Hassold, Atlanta, Ga.
S. Heim, Lund
G.P. Holmquist, Duarte, Calif.

Assistant Editors
E.S. Geffner, Huntington, N.Y. P.H. Geffner, Huntington, N.Y. B.M. O’Hara, Pearl River, N.Y.

Executive Editors
Gene mapping, cloning, molecular genetics T.B. Shows
Department of Human Genetics Roswell Park Memorial Institute 666 Elm Street Buffalo, NY 14263, USA Tel: (716) 845-3108; FAX: (716) 845-8449
Original Articles
Detection of human chromosomes in somatic cell hybrids by PCR analysis
Meiotic behavior of rye heterozygous for ditelocentric substitutions
Benavente E, Santos JL ....................................... 5
Translocations between two specific human chromosomes detected by three-color “chromosome painting”
Lucas JN, Poggensee M, Straume T .................... 11
A novel, convenient, and inexpensive approach for deriving ISCN (1985) relative lengths: validation by a morphometric study of 100 karyotyped metaphase cells
Mark HFL, Parminter M, Campbell W, Mark Jr, R, Zolnierz K, Dunwoodie D, Hann E, Airall E, Santoro K, Mark Y............................................... 13
Mechanisms of distamycin A/DAPI chromosome staining. I. Competition binding effects of nonintercalative DNA groove-binding agents in situ and in vitro
Gene Mapping, Cloning, and Sequencing
Regional localization of the human vitronectin receptor α subunit gene (VNRA) to chromosome 2q31-q32.
Fernández-Ruiz E, Pardo-Manuel de Villena F, Rodriguez de Cor DObra S, Sánchez-Madrid F

Localization of the human cystatin D gene (CST5) to chromosome 20p1.21 by in situ hybridization.

Localization of the human oncostatin M gene (OSM) to chromosome 22q12, distal to the Ewing’s sarcoma breakpoint.
Giovannini M, Selleri L, Hermanson GG, Evans GA

Linkage between two blood-group markers in rhesus monkeys (Macaca mulatta).
Hackleman SM, Kammerer CM, Manis S, Scheffler J, Dyke B, Stone WH

Commentary
Demonstration of replication patterns on histone-depleted chromosomes.
Just W, Autenrieth M, Vogel W

No. 2-3

Editorial – New Features opposite 65

Trent JM, Ziegler A

Gene amplification and chromosome rearrangements: a study of a single cell lineage selected for amplification and deamplification of the UMP synthase gene  
Qumsiyeh MB, Goorha S, Suttle DP .................................................. 162
A “hot spot” of recombination coincides with an interstitial telomeric sequence in the Armenian hamster  
Ashley T, Ward DC ................................................................. 169

Fluorescence in situ hybridization mapping of the cystic fibrosis transmembrane conductance regulator (CFTR) gene to 7q31.3  
Heng HHQ, Shi X, Tsui L-C ................................................... 108

The human endothelin-1 gene (EDN1) encoding a peptide with potent vasoactive properties maps distal to HLA on chromosome arm 6p in close linkage to D6S89  

The fibroblast growth factor receptor 3 gene (FGFR3) is assigned to human chromosome 4  
Keegan K, Rooke L, Hayman M, Spurr NK,.............. 172

Assignment of the human slow skeletal muscle troponin gene (TNNI1) to 1q32 by fluorescence in situ hybridisation  
Eyre HJ, Akkari PA, Meredith C, Willon SD, Callen DC, Kedes L, Laing NG .................................................. 181

Analysis of aphidicolin-induced chromosome fragility in the domestic pig (Sus scrofa)  
Riggs PK, Kuczek T, Chrisman CL, Bidwell CA. 110
A balanced autosomal reciprocal translocation in an azoospermic bull  
Ansari HA, Jung HR, Hediger R, Fries R, König H, Stranzinger G 117

Synaptonemal complex analysis of a reciprocal translocation, rcp(20;24)(ql7;q25), in a subfertile bull  
Villagómez DAF, Andersson M, Gustavsson I, Plöen L 124
Localization of the horse (Equus caballus) α-globin gene complex to chromosome 13 by fluorescence in situ hybridization  
Oakenfull EA, Buckle VJ, Clegg JB......................... 136

Comparative analyses of heterochromatin in Microtus: sequence heterogeneity and localized expansion and contraction of satellite DNA arrays  
Modi WS ................................................................. 142
New markers, D16FC1 and Tpl2, differentiate between rat chromosomes 16 and 17  
Yeung RS, Taguchi T, Patriotic C, Makris A, Tsichlis PN, Levan KK, Levance, Tartof K, Hino O, Knudson AG, Testa JR 149
Localization of ESD and A2M genes to sheep chromosome 3 by in situ hybridization  
Graphodatsky AS, Biltueva LS, Filipov VA, Eremina VR, Lushnitskova TP, Shummy TV, Ermlaev VF .................. 156
The γ fibrinogen gene (FGG) maps to chromosome 17 in both cattle and sheep  
Johnson SE, Barendse W, Hetzel DJS .................. 176

A PCR-based method to amplify DNA with random primers: determining the chromosomal content of porcine flow-karyotype peaks by chromosome painting  
Milan D, Yerle M, Schmitz A, Chapat B, Vaiman M, Frelat G, GelHin .................................................. 139
Partial sequence data from three evolutionarily conserved loci from the proximal short arm of the human X chromosome; assignment of
Isolation of a somatic cell hybrid retaining the der(16)(t(12;16)(q13;p1.2)) from amyxoid liposarcoma cell line Schoenmakers HFPM, Kools PFJ, Kazmierczak B, Bullerdiek J, Claussen U, Horsthemke B, Van den Berghe H, Van de Ven WJM. 159

Commentary
Chromosome identity of human prostate cancer cell lines, PC-3 and PPC-1. Chen TR. 183

Editorial – New Features opposite 185

Gene Mapping, Cloning, and Sequencing
Chromosomal assignment of the uromodulin gene (UMOD) to 16p13.11. Jeanpierre C, Whitmore SA, Austruy E, Cohen-Salmon M, Callen DF, Junien C. 185

Regional sublocalization of the human thyroid peroxidase gene (TPO) by tritium and fluorescence in situ hybridization to chromosome 2p23→p24. Barnett PS, Jones TA, McGregor AM, Banga JP, Sheer D. 188

Localization of the human vitamin D 24-hydroxylase gene (CYP24) to chromosome 20q13.2→q13.3. Hahn CN, Baker E, Laslo P, May BK, Omdahl JL, Sutherland GR. 192

In humans all U3 genes map to chromosome 17p2→p11, but in mouse the U3A and U3B genes are located on different chromosomes. Mazan S, Mattéi M-G, Roeckel N, Qu L-H, Bachellerie J-P. 203

Animal Cytogenetics and Comparative Mapping
Novel RFLPs at protooncogene and cancer-related gene loci on mouse chromosomes. Santos J, Pellicer A. 217

Characterization of the karyotype of the tench (Tinca tinca L.) and analysis of its chromosomal heterochromatic regions by C-banding, Ag-staining, and restriction endonuclease sequencing. Padilla JA, Fernández-García JL, Rabasco A, Martínez-Trancón M, Rodríguez de Ledesma I, Pérez-Regadera JJ. 220
Chromosomal localization of omega and trophoblast interferon genes in cattle and river buffalo by sequential R-banding and fluorescent in situ hybridization Iannuzzi L, Gallagher DS, Ryan AM, Di Meo GP, Womack JE. 221

Brief Reports
A simple G-banding technique following nonradioactive in situ hybridization Duncan LM, Djetsch E, Rudduck C, Garson OM. 221

Linkage analysis of the monoamine A and B genes using newly-defined polymorphisms Harris BD, Kurth JH, Barnes RI, Bowcock AM, Kurth MC. 23e
