Neuropharmacological Study of Central Reactions to Intense Muscular Exertion, Sensorial Fatigue, Sexual Excitation, Hunger, and Thirst

With 6 figures

Table of Contents

I. General Methodology 5
   Introduction 5
   Methods 6

Thermoregulation 7
Pain Perception 8
Motor Agitation effected by Nikethamide 8
Motor Responses to Electroshock 8
Psychomotor Excitation due to Amphetamine 8

II. Muscular Effort 10
   Introduction 10
   Special Technique for Intense Muscular Exertion 11
