Contents

Robichaud, R.C.; Hefner, M.A.; Anderson, J.E., and Goldberg, M.E.: Effects of Δ9-Tetrahydrocannabinol (THC) on Several Rodent Learning Paradigms .............................................................. 1
Siegers, C.-P.: Effects of Caffeine on the Absorption and Analgesic Efficacy of Paracetamol in Rats .................................................................................................................. 19
Evans, C.A. and Auda, D.R.: A Pressor Effect of High Doses of Tubocurarine in the Ferret ........................................................................................................................................... 32
Zídek, Z. and Janká, I.: Changes in Food and Water Consumption during Multiple Dosing of Mice by 6-Azauridine .............................................................................................................. 38
Zídek, Z. and Janká, I.: Mouse Sensitivity to Body-Weight Reducing and Lethal Activity of 6-Azauridine: Genetic Analysis ........................................................................................................... 45
Holzer, F., and Hohenegger, M.: Sodium and Potassium Adaptation in the Conscious Rat: Further Studies on Sodium and Potassium Balance during Continued Natriuresis .............................................................................................................................................. 76
Kostowski, W. and Czajański, A.: The Activity of Some Neuroleptic Drugs and Amphetamine in Normal and Isolated Rats ........................................................................................ 82
Strubelt, O., Uhlig, Elisabeth, and Back, G.: Inhibition by Manganese of the Calorigenic and Cardiovascular Actions of Catecholamines and Theophylline ........................................ 88
Stern, P.; Catovic, Sabira, and Filipovic, N.: The Metabolism of Glycine in Mice Treated Acutely and Chronically with Morphine ................................................................................... 97
Datta, R.K. and Antopol, W.: Effects of the Combined Treatment with Sulfa-pyridine and Methadone on Behavior and Mortality of Mice ...................................................................................... 104
Daniels-Severs, Anne E. and Vernikos-Danellis, Joan: Effect of Aminoglutethimide and Glutethimide on the Pituitary-Adrenal System ........................................................................ 111
Contents

Moskowitz, Jay and Krishna, Gopal: The Effect of Prostaglandin E1 on Norepinephrine-Induced Membrane Depolarization and Cyclic AMP Accumulation in Brown Fat Cells ........................................................................................................ 119

Table of Contents

Book Reviews: 60, 123, 188, 253

Authors’ Index: 373

Subject Index: 375

Knoll, J.; Fürst, S., and Vizi, E.S.: Kinetic Parameters of a New Narcotic Agonist, Azidomorphine .................................................. 354

Varia .................................................................................................................. 252

Contents

Buthag, Ruben D. and Eferukaye, John E.: Reduced Cardiovascular Responsiveness to Hypothalamic Stimulation during Urethane and Anobarbital Anaesthesia .......................................................... 143

Buchan, E.; Maud, K.; Oberhoffer, H.; Seifert, J., and Predik, L.: Lipid-Induced Changes of Phenobarbital Distribution and Metabolism ................................................................................................................................. 152

Kilian, Marion and Frey, H.H.: Thresholds for Electro- and Chemoconvulsions in Mice after Termination of Treatment with Phenobarbital ......................................................................................................................... 169

Hein, W.; and Chudwick, D.P.: A Comparison of the Cardiovascular Actions of Thalidomide and its Mouties ................................................................................................................................. 178

Selten, J.T.: The Effect of Parathion on the Metabolism of N-2-Hydroxyethyl Substitution on Central Activity of Oxazepam and Babbini, M.; Torrielli, M.V.; Gaiardi, M.; Bartoletti, M., and De Marchi, F.: Spironolactone on Antipyrine Metabolism in Man .................................................................................................................................................. 338

Statland, B.E.; Astrup, P.; Black, C.H., and Oxholm, E.: The Effect of Parathion on the Metabolism of 3H-Testosterone by Hepatic Microsomal Enzymes from the Male Mouse ......................................................................................................................... 220

Bianchi, Camillo and Tomasi, Laura: Central Nervous System and Autonomic Nervous System Effects of Dapoxetine and of Some Standard Anti-Parkinson Drugs .................................................................................................................................................................. 226

Zetter, G. and Thörner, R.: Drug-Induced Catalepsy as Influenced by Psychostimu-

Zetter, G. and Thörner, R.: Drug-Induced Catalepsy as Influenced by Psychostimu-

ANS, Apomorphine, L-Dopa, and Yohimbine .................................................................................................................................................................. 238

Garrino, A.M.; Reagan, R.L., and Gram, T.E.: Submicrosomal Distribution of

Hepatic Drug-Metabolizing Components in the Gunn Rat .................................................................................................................................................. 257

Gómez, J.A.; de and Sollero, L.: Interactions of 5-Hydroxytryptamine and Narcotic Analgesics on Dog Intestine in vivo .................................................................................................................................................................. 291

Foley, Dennis J.; Sitzel, Robert E., and McPhillips, Joseph, J.: The Relationship between Inhibition of Acetylcholinesterase and Sensitivity of the Rat Brain to Carbachol .................................................................................................................................................. 298

Sotaniemi, Eero A.: Effects of Drug Pretreatment on Antipyrine Levels in Blood and Tissues: An Example of Multiple Drug Interactions ............................................................................................................................................. 306

Vesel, E.S.; Lee, C.J.; Passamani, G.T., and Scheply, C.A.: Relationship between Plasma Antipyrine Half-Lives and Hepatic Microsomal Drug Metabolism in Dogs .................................................................................................................................................................. 317

Huffman, D.H.; Shoeman, D.W.; Pentikainen, P., and Azamoff D.L.: The Effect of Spironolactone on Antipyrine Metabolism in Man .................................................................................................................................................................. 338

Knoll, J.; Fürst, S., and Vizi, E.S.: Kinetic Parameters of a New Narcotic Agonist, Azidomorphine .................................................. 354

Varia .................................................................................................................. 252
