Announcement

4th Cyprus Conference on New Methods in Drug Research
Paphos, Cyprus, May 21-27, 1989

Scientific Programme

Seven symposia are planned during which world authorities will present lectures covering new methods and approaches in their respective disciplines. In this conference emphasis will be given to ‘nucleic acids and membranes as therapeutic targets’. Eighteen to twenty plenary speakers are expected to participate.

The following are among the topics to be covered:
- Site-specific recognition by DNA-active ligands
- Medicinal chemistry of AIDS therapy
- Perspectives in nucleic acid synthesis
- Novel strategies in drug synthesis
- Molecular recognition; molecules with novel binding properties
- Computer-aided modeling in drug design
- Use of NMR techniques to study drug-receptor interactions
- X-ray crystallographic studies of macromolecules and their applications in drug design
- Xenobiotic toxicity in DNA
- Nucleic acid biochemistry; therapeutic approaches
- Membrane-based drug delivery system
- Novel immunomodulators and their therapeutic potential

Correspondence

All correspondence concerning the conference should be addressed to: 4th Cyprus Conference on New Methods in Drug Research, c/o Salamis Tours Ltd, P.O. Box 531, Limassol, Cyprus, Telephone: +357/51-55 555, Telefax: +357/51-64410, Telex: 2580 SALTO CY.
