Arthrodesis
  digital replantation surgery 95–97
  internal fixation 52, 53

Biodegradable polymers
  chemical degradation 79, 80
  crystallinity 80
  definitions 76
  enzymatic degradation 80, 81
  properties 76–79
  resorbable devices
    comparative studies of materials 85
    craniomaxillofacial surgery 84, 85
    design 81–83
  infection risks 85, 86
  osteosynthesis 84–86
  processing 81, 82
  prospects for study 87
Bone graft substitutes
  allograft bone 59–61, 64
  autograft advantages and disadvantages 57
  bioglass 67–69
  bone composition and biological activity 57, 58
  ceramics and cement 62–66, 68
  indications 57
  mineral composites 61, 64
  osteoconductive materials 58, 59
  osteoinductive materials 59
  product regulation 56, 57
  proteins and growth factors 69–73
Bone morphogenetic proteins (BMPs)
  bone function 33
  osteoinduction studies
    animal models 35
    clinical trials 35, 70, 72
    hand surgery 35, 36
    Smad signaling 33, 34
Calcium phosphate, cements 62, 66, 68
Calcium sulfate, cements 63, 65, 66
Cerclage wire, features 13
Children, see Pediatric fracture
Chrysalin 71–73
Collagraft 61, 64
Collateral ligaments, complications in osteosynthesis 138
Complex regional pain syndrome (CRPS)
  clinical features 151, 152
  diagnostic criteria 151, 152
  epidemiology 152
Complex regional pain syndrome (CRPS) (continued)
- nomenclature 150
- overview 149, 150
- pathophysiology 150, 151
- prevention 154
- treatment 153, 154

Compression, fracture-healing effects 6–8
Cortoss 67, 69
C-reactive protein (CRP), infection diagnosis 145
Culture study, infection diagnosis 146

Debridement, infection management 146
Demineralized bone matrix (DBM), allografts 59–61, 64
Distal radius fracture, see also Forearm fracture
- malunion osteotomy 164
- osteoporotic forearm fracture management 45, 46
- osteosynthesis principles 162–164
- outcome measures
  - complications 158
  - functional tests 157
  - grip strength 157
  - radiography 157
  - subjective parameters 158, 159

Effective roughness band hypothesis, control of implant surface integration 28, 29
Electropolished stainless steel (EPSS)
- bone biology at implant surface 25–27
- hand fracture fixation 21
- infection studies 27, 28
- nickel content 29, 30
- prospects in hand fracture fixation 29, 30
- soft-tissue biology at implant surface 22–24
Endobon 62, 64
Extensor tendons, complications in osteosynthesis 137, 138

External fixation
- digital replantation surgery 95
- fixators 17
- internal fixation evolution 9, 10

Fibroblast growth factor (FGF), products for osteosynthesis 72
Flexor tendons, complications in osteosynthesis 139, 140

Forearm fracture, see also Distal radius fracture
- osteoporotic fracture management 45, 46
- osteotomy 107–110
- pediatric bone growth mechanisms 115

Fracture healing, see Healing, fractures

Grafts, see Bone graft substitutes
Growth differentiation factor-5, recombinant product 73

Healing, fractures
- compression and absolute stability effects 6–8
- external to internal fixation evolution 9, 10
- flexible, biological internal fixation 9, 10
- fracture features 2
- intramedullary nail effects 8, 9
- mechanical environment in control 5, 6
- prospects for study 10
- treatment goals 6

Healos 61, 64
Hip fracture, osteoporotic fracture management 42, 43

Immix 67, 69

Implants
- bone integration 24, 25
- functions 12, 13
- infection, see Infection, implant devices
- removal 26
- types
  - bone screws 13
  - cerclage wires 13
  - internal fixators 16–19
  - plates 16
  - wires and pins 13

Implant surface
- hand fracture fixation
- bone biology 24–27
- consequences 20, 21
- effective roughness band hypothesis 28, 29
- infection prevention 27, 28
- materials and prospects 21, 22, 29, 30
- soft-tissue biology 22–24
- properties and outcomes 21

Infection, implant devices
- bioreabsorable devices 85, 86
- classification 144, 145
- clinical presentation 145
- diagnosis 145, 146
- host factors 144
- incidence in internal fixation 142, 143
- material effects 27, 28
- open versus closed fracture 143
- organisms 27, 143, 144
- pathophysiology
  - biofilms 143
  - operative and postoperative factors 144
- treatment 146, 147

Insulin-like growth factor-1 (IGF-1), osteoinduction
- studies 36

Interlocking nail, loads 18

Internal fixation, see also Angular stable fixation; Implants
external to internal fixation evolution 9, 10
fixators 16–19
flexible, biological internal fixation 9, 10
Intramedullary (IM) nail
fracture-healing effects 8, 9
function 17, 18
indications 18, 26, 27
Joint capsule, complications in osteosynthesis 138
K-wires
digital replantation surgery 94
pediatric fracture fixation 120
Lag screw
features 13
fracture-healing effects 7, 8
Leptin, osteoinduction studies 37
Locking head screw (LHS)
internal fixation 16, 17
locking screw systems for hand 50, 51
Metacarpal fracture
angular stable fixation of first metacarpal base fractures 51
malunion 169
osteosynthesis principles 169–172
osteotomy 111, 112
Microtopography, metal implants 22
Nail unit, complications in osteosynthesis 137
Nerves, complications in osteosynthesis 140
Nickel, stainless steel content and allergic reactions 29, 30
Novabone 67, 69
Opteform 61, 64
Osteoblast
characteristics 31, 32
osteoclast differentiation regulation 34
regulators 32–34
Osteoclast
characteristics 31, 32
differentiation regulation 34
regulators 32–34
Osteoporosis
aging and risks 41, 42
consequences 39, 40
diagnosis 41
fracture
AO Foundation programs 47, 48
epidemiology 42
risks 41
Plate, see also Angular stable fixation
features 16
fixation with bone defects 52
pediatric fracture and plate osteosynthesis 120, 124–127
rheumatoid wrist and plate fixation for total wrist fusion
indications 99, 100
outcomes 104, 105
surgical technique 102–104
Platelet-rich plasma (PRP), osteoinduction studies 70
Polymers, see Biodegradable polymers
Pro Osteon 62, 64, 65
Radius, see Distal radius fracture
Replantation surgery
  amputation level considerations
    arm 91, 92
digits 94–97
forearm 92
transmetacarpal 94
wrist 93
  skeletal stabilization factors 90, 91
Resorbable materials, see Biodegradable polymers
Rheumatoid wrist
  classification 100
  plate fixation for total wrist fusion
    indications 99, 100
  outcomes 104, 105
  surgical technique 102–104
  surgical techniques for fusion 100–102
Runx2, bone function 33, 34
Skin, complications in osteosynthesis 135–137
Smads, bone function 33, 34
Soft-tissue complications, osteosynthesis
  collateral ligaments 138
  etiology 135
  extensor tendons 137, 138
  flexor tendons 139, 140
  joint capsule 138
  nail unit 137
  nerves 140
  skin and subcutaneous tissue 135–137
  soft-tissue release techniques 139
  vasculature 140
Stainless steel, see Electropolished stainless steel
Steel, see Electropolished stainless steel
Titanium
  hand fracture fixation 21
  infection studies 27, 28
  oxide film formation 22
  prospects in hand fracture fixation 29, 30
  soft-tissue biology at implant surface 23, 24
Titanium-aluminum-niobium (TAN)
  bone biology at implant surface 26, 27
  hand fracture fixation 21
  infection studies 27, 28
  prospects in hand fracture fixation 29, 30
  soft-tissue biology at implant surface 23
Titanium-molybdenum (Ti-15Mo)
  hand fracture fixation 21
  infection studies 27, 28
  prospects in hand fracture fixation 29, 30
  soft-tissue biology at implant surface 23
Transforming growth factor-β (TGF-β), osteoinduction studies 36, 69, 70
Tricalcium phosphate (TCP), bone graft substitutes 62, 66
Ultrasound, infection diagnosis 145
Vascular endothelial growth factor (VEGF), osteoinduction studies 36
Vasculature, complications in osteosynthesis 140
Vertebral fracture, osteoporotic fracture management 45
Wrist fusion
  limited wrist fusions 164–166
  rheumatoid wrist and plate fixation for total wrist fusion
    indications 99, 100
    outcomes 104, 105
    surgical technique 102–104
    surgical techniques 100–102
  total wrist fusion guidelines 166, 169
