Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage
set forth in this text are in accord with current recommendations and practice at the time of
publication. However, in view of ongoing research, changes in government regulations, and the
constant flow of information relating to drug therapy and drug reactions, the reader is urged to
check the package insert for each drug for any change in indications and dosage and for added
warnings and precautions. This is particularly important when the recommended agent is a new
and/or infrequently employed drug.

66
Contents
Boord, R.L.
Preface
69
Northcutt, R.G.
A Reassessment of Goodrich’s Model of Cranial Nerve Phylogeny
71
Demski, L.S.
Terminal Nerve Complex
81
Fritzsch, B.; Northcutt, R.G.
Cranial and Spinal Nerve Organization in Amphioxus and Lampreys: Evidence for an Ancestral Craniate Pattern
96
Gilland, E.; Baker, R.
Conservation of Neuroepithelial and Mesodermal Segments in the Embryonic Vertebrate Head
110
Wake, D.B.
Brainstem Organization and Branchiомeric Nerves
124
Finger, T.E.
What’s so Special about Special Visceral?
132
Song, J.; Boord, R.L.
Motor Components of the Trigeminal Nerve and Organization of the Mandibular Arch Muscles in Vertebrates.
Phylogenetically Conservative Patterns and Their Ontogenetic Basis
139
Sperry, D.G.; Boord, R.L.
Organization of the Vagus in Elasmobranchs: Its Bearing on a Primitive Gnathostome Condition
150
Wake, M.H.
Evolutionary Diversification of Cranial and Spinal Nerves and Their Targets in the Gymnophione Amphibians
