Subject Index

Adenovirus, simian adenovirus 7 infectious DNA-protein complex 54
Adenovirus type 12, transformation characteristics of temperature-sensitive mutants 170
Antibody
hepatitis B subtypes in chimpanzees 378
rubella IgG, detection and virus diagnosis 359
- rubella IgM, detection 353
Antigenic differences, herpesvirus type 2 isolates 1
Antigen (nuclear), Epstein-Barr virus-determined 232
Antiviral activity of interferon 369
Antiviral activity of rifamycin SV, inhibition of murine leukemia virus replication 84
Antiviral agents, inhibition of poliovirus RNA replication 281
Antiviral antibiotics, inhibition of focus formation by sarcoma-inducing oncorna-viruses with rifamycins 63
‘A-type’ intracellular virus particles, endogenous oncornavirus in guinea pigs 319
Bacteriophage taxonomy 201
Bacteriophage T4 DNA, study of redundancy by renaturation kinetics 277
Bacteriophage T7 DNA, study of redundancy by renaturation kinetics 277
BAMMQ-2,3-bis-(acetylmercaptomethyl)-quinoxaline, inhibition of poliovirus RNA replication 281
Biophysical properties, hepatitis B antigen 129
Bluetongue virus, comparison of capsid polypeptides of various serotypes 47
Budding of frog virus 3, study by immuno-logical and cytochemical methods in electron microscopy 305
Capsid polypeptides, bluetongue virus serotypes 47
Cell-growth inhibition by interferon 369
Central nervous system, street rabies virus infection of muscle 256
Classification,
International Committee on Taxonomy of Viruses Study Group report on Papovaviridae 106
present state of phage taxonomy 201
- vertebrate viruses 193
Complementation test, SV40 temperature-sensitive mutants 245
Coxsackievirus B5, variation in isolates and relation to swine vesicular disease virus 125,
Cross-protection and viral subtypes in hepatitis B virus infections 378
‘C-type’ extracellular virus particles, endogenous oncornavirus in guinea pigs 319
C-type oncornavirus, guinea pig 319
C-type RNA virus (avian): reticuloendo-theliosis virus 342
C-type viral antigen expression, relationship to malignant properties of SV40-transformed mouse cells 269
Cytochemical and immunological methods in electron microscopic study of frog virus 3 budding 305
Defective reovirus particles 36 Detection of fluorescent stained IgM 353 Diagnosis of rubella, demonstration of IgG antibodies by sucrose gradient centrifugation and indirect fluorescent antibody staining 359 DNA, - bacteriophage T4 and T7, study of redundancy by renaturation kinetics 277 DNA polymerase activity of oncornaviruses, antiviral antibiotics 63 DNA polymerase interconversion, Rauscher leukemia virus 332 DNA-protein complex, simian adenovirus 7 54
Electron microscopic study of influenza virus 121 Electron microscopy, immunological and cytochemical methods for study of frog virus 3 budding 305 Electrophoretic profiles of human interferon 369 Endogenous oncornavirus, prevalence in guinea pigs 319 Epstein-Barr virus genome, biological differences between EBV preparations 232 Epstein-Barr virus, nuclear antigen 232 Fluorescent staining, detection of rubella IgM 353 Fluorescent staining (indirect) and sucrose density gradient centrifugation, rubella diagnosis 359 Fractionation of hepatitis B antigen 129 Frog virus 3 budding, study by immunological and cytochemical methods in electron microscopy 305 Genome RNA segments, reovirus 36 Gross murine leukemia virus, inhibition of replication by rifamycin SV 84 virion and non-virion membrane antigens 292 Hemagglutination inhibition rubella titers, clarification of ambiguous readings 359 Hepatitis B antigen, properties of morphological forms 129 Hepatitis B virus infection, viral subtypes and cross-protection 378 Herpes simplex virus, RNA polymerase activity and inhibition 147 Herpes simplex virus (HSV) type 2, growth of temperature-sensitive mutants at the nonpermissive temperature in cells transformed by HSV-2 162 Herpesviruses isolated from non-human primates, a compendium 175 Herpesvirus type 2, antigenic differences of isolates 1 Human lymphoblastoid cell lines, infection with biologically different preparations of Epstein-Barr virus 232 Human papilloma virus protein 220 Immune responses in chimpanzees to hepatitis B virus subtypes 378 Immunofluorescence and sucrose density gradient centrifugation, rubella diagnosis 359
Immunological and cytochemical methods in electron microscopic study of frog virus 3 budding
Infectious DNA-protein complex, simian adenovirus 7 54
Influenza virus,
- electron microscopic study of nuclear inclusions 121
- virion transcriptase activity 141
Inhibition of murine leukemia virus replication by rifamycin SV 84
Inhibition of poliovirus RNA replication 281
Inhibition of RNA synthesis, herpes simplex virus 147
Insect virus,
- Mosquito iridescent virus, comparison of proteins of ‘R’ and T strains 97
- Interconversion of molecular size of DNA polymerase from Rauscher leukemia virus 332
- Interferon (human) in heterologous cells, electrophoretic profiles and activities 369
- International Committee on Nomenclature 390
Subject Index

- of Viruses (see International Committee on Taxonomy of Viruses)
- International Committee on the Taxonomy of Viruses announcements: Name change and schedule, 1975 199
- International Committee on Taxonomy of Viruses Study Group report on Papova-viridae 106
- International Committee on Taxonomy of Viruses, Vertebrate Virus Subcommittee: approved report on family and generic names for vertebrate viruses 193
- Isoelectric points of hepatitis B antigen 129
- Isoelectric points of papovaviruses 220
- Kinetics (renaturation) of bacteriophage T4 and T7 DNA 277
- Leukemia (murine) membrane antigens,
- virion and non-virion membrane antigens 292
- Lymphoblastoid cell lines, infection with biologically different preparations of Epstein-Barr virus 232
- Malignant properties of SV40-transformed cells, relationship to C-type viral antigen expression 269
- Membrane antigens, murine leukemia virus 292
- Molecular size, interconversion of DNA polymerase from Rauscher leukemia virus 332
- Morphology, bacteriophage taxonomy 201
- Mosquito iridescent virus, comparison of proteins of ‘R’ and “P strains 97
- Murine leukemia virus g5 antigen and malignant properties of SV40-transformed cells 269
- Murine leukemia virus,
- inhibition of replication by rifamycin SV 84
- virion and non-virion membrane antigens 292
- Myotropic infection, street rabies virus 256
- Neurotropic infection, street rabies virus 256
- Nomenclature,
International Committee on Taxonomy of Viruses Study Group report on Papovaviridae 106 vertebrate viruses 193
Non-human primate herpesviruses, a compendium 175
Non-virion and virion murine leukemia membrane antigens 292
Nuclear antigen, Epstein-Barr virus-determined 232
Nucleic acids, bacteriophages 201
Oncogenicity in hamsters, herpesvirus type 2 isolates 1
Oncornavirus (endogenous), prevalence in guinea pigs 319
Oncornavirus polymerase, antiviral antibiotics 63
Orbivirus, comparison of capsid polypeptides of bluetongue virus serotypes 47
Papillomavirus, International Committee on Taxonomy of Viruses Study Group report on Papovaviridae 106 Papilloma virus proteins 220
Papaviridae Study Group report, International Committee on Taxonomy of Viruses (formerly International Committee on Nomenclature of Viruses) 106
Papavirivirus structural polypeptides, comparison of human and rabbit papilloma viruses with SV40 220
Phage taxonomy 201
Phosphate, effect on infection of tobacco protoplasts by tobacco rattle virus 382
Plant virus, Tobacco rattle virus, effect of phosphate on infected tobacco protoplasts 382
Poliovirus RNA replication, a new inhibitor 281
Polyomavirus, International Committee on Taxonomy of Viruses Study Group report on Papovaviridae 106
Polypeptides (capsid) of bluetongue virus serotypes 47
Subject Index 391

Polypeptides of hepatitis B antigen 129 Poxviridae, family and generic names 193
taxonomy 193
Primate (non-human) herpesviruses, a compendium 175
Protein analysis, mosquito iridescent virus strains 97
Protoplasts infected by tobacco rattle virus, effect of phosphate 382
Quinoxaline derivative (BAMMQ), inhibition of poliovirus RNA replication 281
Rabbit papilloma virus protein 220 Rabies, street virus infection in muscle 256 Rauscher leukemia virus, interconversion of molecular size of the DNA polymerase 332 Renaturation kinetics of bacteriophage T4 and T7 DNA 277 Reoviridae, comparison of capsid polypeptides of bluetongue virus serotypes 47
family and generic names 193
taxonomy 193 Reovirus,
genome segments 36
temperature-sensitive mutants 36
transcriptase activation 15
uncoating 15
Reproduction and virulence of influenza virus, role of transcriptase activity 141
Reticuloendotheliosis virus, isolation and characterization of transformed bone marrow cells 342
Rifamycin antibiotics, inhibition of focus formation by sarcoma-inducing oncornaviruses with rifamycins 63
Rifamycin SV, inhibition of murine leukemia virus replication 84
RNA genome segments, reovirus 36
RNA, inhibition of poliovirus replication and synthesis in vitro 281
RNA polymerase activity and inhibition, herpesvirus-infected cells 147
Rubella diagnosis, demonstration of IgG antibodies by sucrose gradient centrifugation and indirect fluorescent antibody staining 359
Rubella IgM, detection by fluorescent staining and sucrose gradient centrifugation 353
Serological specificity, bluetongue virus 47
Simian adenovirus 7 infectious DNA-protein complex 54
Spot complementation test for temperature-sensitive mutants of SV40 245
Strain differences, herpesvirus type 2 1
Subtypes and cross-protection, hepatitis B virus infections 378
Sucrose density gradient centrifugation and fluorescent antibody staining, rubella diagnosis 359
Sucrose gradient centrifugation detection of fluorescent stained IgM 353
SV40,
comparison of structural polypeptides with those of human and rabbit papilloma virus 220
relationship of acquisition of malignant properties of transformed cells to type C viral antigen expression 269
spot complementation test for temperature-sensitive mutants 245
Swine vesicular disease virus, possible role of coxsackievirus B5 in its etiology 125
Taxonomy,
- bacteriophage 201
- vertebrate viruses 193
Temperature-sensitive mutants of adenovirus type 12, transformation characteristics 170
Temperature-sensitive mutants of herpes simplex virus (HSV) type 2, growth at the nonpermissive temperature in HSV-2 transformed cells 162
Temperature-sensitive mutants of reovirus 36
Temperature-sensitive mutants of SV40, spot complementation test 245
392
Subject Index

Third International Congress for Virology:
Announcement 200 Tobacco rattle virus, effect of phosphate on infected tobacco protoplasts 382 Togaviridae,
- family and generic names 193
- taxonomy 193
Transcriptase activation, reovirus 15
Transcriptase activity, influenza virus 141
Transformation characteristics of temperature-sensitive mutants of type 12 adenovirus 170
Transformed bone marrow cells, reticuloendotheliosis virus 342
Vertebrate viruses, taxonomy 193 Viral pathogenesis, street rabies virus 256 Viral proteins, papilloma virus 220 Viral RNA, poliovirus, inhibition of replication and synthesis in vitro 281 Virion and non-virion murine leukemia membrane antigens 292 Virus characterization, reticuloendotheliosis virus transformed bone marrow cells 342 Virus-specific IgM antibodies, demonstration 353
