A Study of the Population Movement in Nine Swedish Subpopulations in 1800–1849 from the Genetic-Statistical Viewpoint

C.H. Alström
R. Lindelius

From the Psychiatric Clinic of the Caroline Institute, St. Gorans Hospital, Stockholm (Head: Prof. C. H. Alström, M.D.)
Cliches: Aberegg-Steiner & Cie., AG, Bern Oracle Lüdin AG, Liestal

Index

I. Preface and Introduction  4
II. The Isolate Concept. Isolation Factors  7
   Island Model of Isolation  7
III. Isolation by Distance. According to S.Wright  9
   Method  9
IV. Mobility in Former Times, with Special Reference to the First Half of the 19th Century  11
   Factors of Importance  11
V. A Study of Isolation by Distance in Nine Swedish Subpopulations (Parishes)  14
   B. The Breeding Size and Effective Population Size of the Neighbourhood.
      Neighbourhood Analysis. Random Genetic Drift  27
