Meera Khan
dedication issue

This issue is dedicated to P. Meera Khan
by his friends and associates

Editors
Peter L. Pearson, Utrecht
Harold P. Klinger, New York, N.Y.

20 figures, 3 in color, and 10 tables, 1999
Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Cytogenetics and Cell Genetics

Contents

Editorial Preface

93 P. Meera Khan

Original Papers

95 Colon polyps: a damaged developmental system and a precursor to cancer
White RL

99 Familial adenomatous polyposis (FAP) and its gene, APC
Bodmer W

105 Mechanisms of APC-driven tumorigenesis: lessons from mouse models

112 Molecular pathology of colorectal cancer
Bosman FT

118 Genetic predictive testing for bowel cancer predisposition: the impact on
the individual
Chapman PD, Burn J

125 Familial adenomatous polyposis: from bedside to bench and vice versa
A tribute to the somatic cell geneticist P. Meera Khan
Griffioen G, Vasen HFA, Verspaget HW, Lamers CBHW

130 Hereditary nonpolyposis colorectal cancer (HNPCC)
Lynch HT

136 Clinical implications of genetic testing of hereditary nonpolyposis
colorectal cancer
Vasen HFA, Wijnen J

140 Commentary on the current role of human genetics in health care
Van Ommen GJB
142 Genome-wide allelotyping indicates increased loss of heterozygosity on 9p and 14q in early age of onset colorectal cancer

148 Population genomics in Sardinia: a novel approach to hunt for genomic combinations underlying complex traits and diseases
Siniscalco M, Robledo R, Bender PK, Carcassi C, Contu L, Beck JC

153 Leber hereditary optic neuropathy (LHON): a mitochondrial disease with unresolved complexities
Went LN

157 Comparative genomic hybridization analysis of hepatoblastomas: additional evidence for a genetic link with Wilms tumor and rhabdomyosarcoma
Steenman M, Tomlinson G, Westerveld A, Mannens M

162 The changing challenges of nomenclature
Wain H, White J, Povey S

165 Author Index Vol. 86, No. 2, 1999
166 Subject Index Vol. 86, No. 2, 1999
