A Tribute to Peter Deetjen

R.	Rainer	Greger
F.	Florian	Lang
S.	Stefan	Silbernagl

This issue of *Cellular Physiology and Biochemistry* is dedicated to Prof. Peter Deetjen.

Several of his scholars have decided to report here their most recent scientific findings in order to express their gratitude to their teacher and to celebrate his 60th birthday.

After having passed the usual peer review, the papers published here were selected for this honorary issue.
