Extramural Grant Program Meeting

May 9-10, 1995

Managing Editor

D. Adenau

8 figures, 21 tables, 1996
Kurokawa, K.

Introduction

**Abstracts**

**Acute Renal Failure**

Bulskey, A.V.; Lin, J.J.; Goodyer, P.R.; Kaskel, F.J.; Fine, R.N.
Insulin-Like Growth Factor-1 (IGF-1) Enhances Epidermal Growth Factor (EGF) Receptor (R) Activation and Renal Tubular Cell Regeneration in Post-Ishemic Acute Renal Failure (ARF)

Elliott, J.D.; Short, A.K.; Chapman, P.; Mogilevsky, N.; Barclay, A.; Bieber, F.; Lockwood, CM.
The Use of Specific Immunoabsorption with Recombinant Myeloperoxidase in the Treatment of ANCA Positive Systemic and Renal Vasculitis

Paller, M.S. Integrins and Repair after Renal Injury: Changes in Intracellular Free Calcium

Reeves, W.B. Chloride Channel Blockers Protect against Hypoxic Injury to Proximal Tubules

**Amyloidosis**

Garcia, M.; Mourad, G; Argilés, A. \( \beta \)2M Globulin Amyloidosis: Protein-Cell Interactions. Biochemical, Biological and Ultrastructural Studies

Sprague, S.M.
Mechanism of \( \beta \)2M-Microglobulin Induced Bone Loss

**Biocompatibility**
Cytokines in the Progression of Renal Failure

11

Dinarello, C.A.; Chernoff, A.; Koch, K.M.; Lonnemann, G.
Interleukin-10: Activities and Production in Health and Disease
8

Friedlander, M.A.
Glucose Dialysate and the Monocyte Cytokine Response
9

Janatova, J.; Berashaw, N.J.
Mechanisms of Complement Activation during Hemodialysis
10

Effect of CAPD on Peritoneal Fibroblast Function. Part III: Interactions of Peritoneal Macrophages and Fibroblasts
11

Lang, M.J.; Williams, J.D.; Topley, N.
Peritoneal Fibrosis in CAPD: Induction of Human Peritoneal Fibroblast (HPFB) Proliferation by IL-1ß, Platelet Derived Growth Factor and Peritoneal Dialysis Effluent (PDE)
12

Ward, R.A.; McLeish, K.R.; Klein, J.B.
Altered Neutrophil Function in Patients with Chronic Renal Insufficiency
13

Cardiovascular

Beasley, D.
Interleukin-1 Induces Cytosolic Phospholipase A2 and Cyclooxygenase-2 in Human Vascular Smooth Muscle Cells
14

Campese, V.M.
Role of Nitric Oxide (NO) Synthesis in Hypertension in Rats with Chronic Renal Failure (CRF)
15

Effect of Serum Subfractions from Patients on Peritoneal Dialysis on Apolipoprotein A-I Synthesis by Human Hepatocytes
16

Estrogen Replacement Therapy for Cardiovascular Risk in ESRD
17

Merrill, D.C.; Thompson, M.W.; Davis, R.L.; Coleman, S.; Robillard, J.E.; Sigurdard, CD.
Transgenic Animal Models for Probing the Renin-Angiotensin System and for Studying Hypertension
18

Victor, R.G.
Reflex Control of Sympathetic Nerve Discharge in Uremia
19

Diabetes

Cytokines in the Progression of Renal Failure
7

11

Dinarello, C.A.; Chernoff, A.; Koch, K.M.; Lonnemann, G.
Interleukin-10: Activities and Production in Health and Disease
8

Friedlander, M.A.
Glucose Dialysate and the Monocyte Cytokine Response
9

Janatova, J.; Berashaw, N.J.
Mechanisms of Complement Activation during Hemodialysis
10

Effect of CAPD on Peritoneal Fibroblast Function. Part III: Interactions of Peritoneal Macrophages and Fibroblasts
11

Lang, M.J.; Williams, J.D.; Topley, N.
Peritoneal Fibrosis in CAPD: Induction of Human Peritoneal Fibroblast (HPFB) Proliferation by IL-1ß, Platelet Derived Growth Factor and Peritoneal Dialysis Effluent (PDE)
12

Ward, R.A.; McLeish, K.R.; Klein, J.B.
Altered Neutrophil Function in Patients with Chronic Renal Insufficiency
13

Cardiovascular

Beasley, D.
Interleukin-1 Induces Cytosolic Phospholipase A2 and Cyclooxygenase-2 in Human Vascular Smooth Muscle Cells
14

Campese, V.M.
Role of Nitric Oxide (NO) Synthesis in Hypertension in Rats with Chronic Renal Failure (CRF)
15

Effect of Serum Subfractions from Patients on Peritoneal Dialysis on Apolipoprotein A-I Synthesis by Human Hepatocytes
16

Estrogen Replacement Therapy for Cardiovascular Risk in ESRD
17

Merrill, D.C.; Thompson, M.W.; Davis, R.L.; Coleman, S.; Robillard, J.E.; Sigurdard, CD.
Transgenic Animal Models for Probing the Renin-Angiotensin System and for Studying Hypertension
18

Victor, R.G.
Reflex Control of Sympathetic Nerve Discharge in Uremia
19

Diabetes
**Nutrition**

Fouque, D. RHGH/rhIGF-I Anabolic Association in Chronic Renal Failure 22 36
Gusmano, R.; Perfumo, F.; Canepa, A.; Verrina, E.; Dellicato, P.; Innocenti, M.L.; Trivelli, A.; Carrea, A.; Menoni, S.; Delucchi, P. Combined Use of Intraperitoneal Amino Acids (AA) and Glucose in Children on CCPD 23 37
Kopple, J.D. Treatment of Malnourished CAPD Patients with IGF-I 24 38
Lim, V.S. Protein Metabolism in Chronic Renal Failure Patients 25 41
Wolfson, M.; Vallian, J.; Shuler, C.L. The Effect of Acidemia on Protein Turnover and Nitrogen Balance in CAPD Patients 26 42

**Pathophysiology**

Atkins, R.C.; Nikolic-Paterson, DJ. Cytokines in the Progression of Glomerulonephritis 27 45
Baran, D.; Vendeville, B.; Rubino, M.; Rubin, E.; Luu, T. Effects of Anti-IL-6 Antibody Administration on Murine Mesangial Proliferative Glomerulonephritis (GN) 28 48
Bertolatus, JA. Does Proteinuria Cause Glomerular and/or Cortical Interstitial Sclerosis? Collagen Message Levels in Overload Proteinuria 29 50
Diamond, J.R. Macrophages and Progressive Renal Disease in Experimental Hydromephrosis 30 51
Ding, G. Effects of Oxidized Low Density Lipoprotein (OX-LDL) on Transforming Growth Factor (TGF)-β Expression by Cultured Human Glomerular Epithelial Cells (HGEC) 31 53
Eddy, AA. Oxidized Low Density Lipoproteins in Interstitial Fibrosis 32 54
Erwin, M.G.; Berry, L.M.; Ikemura, M.; Jobe, A.H.; Padbury, J.F.; Polk, D.H. Single Dose Glucocorticoids and Fetal Renal Maturation 33 55
Goldberg, H.I. FK506 Increases the Activity of the Plasminogen Activator Inhibitor-1 (PAI-1) Promoter 34 56
Hsu, C.H. Inhibition of Calcitriol Receptor Binding to Vitamin D Response Elements by Uremic Toxins 37 60
Imai, E. Gene Therapy for the Progressive Glomerular Sclerosis 38 61

**Abstract**

Kashgarian, ML; Block, L.H.
Granulocyte Inhibitory Protein (GIP): An Inflammatory Modulator in Chronic Renal Failure 39 62
Hamamori, Y.; Kedes, L.H.; Sarnak, J. Gene Therapy of Anemia in Chronic Renal Failure 40 64
Kim, Y.; Massy, Z.A.; Guijarro, C.; O'Donnell, M.P.; Kasprzyk, B.L.; Keane, W.F. Lovastatin (L) Inhibits Low Density Lipoprotein (LDL) Induced Production of Monocyte Chemoattractant Protein-1 (MCP-1) in Human Mesangial Cells (MC) 41 64
Kitamura, M.
Gene Transfer into the Glomerulus Using a Mesangial Cell Vector

Kolyada, A.Y.; Madias, N.E.
Transcriptional Regulation of the Human \( \text{Na}^+\text{H}^- \) Exchanger (NHE-1) Gene

Pei, Y.; Scholey, J.; Cattran, D.
Genetic Polymorphism of Renin-Angiotensin System (RAS) in Progressive IgA Nephropathy

Johns, C; Jefferson, D.M.; Grubbman, S.A.; Perrone, R.D.
Cardiac Na, K-ATPase Gene Regulation in Uremia

Power, D.A.
Signalling by the Epidermal Growth Factor Receptor in Glomerulonephritis

Silkensen, J.; Schwochau, G.; Skubitz, K.; Rosenberg, M.E.
Clusterin: A Novel Renal Epithelial Cell Aggregation and Adhesion Molecule

Rovin, B.H.
IL-1 Regulation of MCP-1 Gene Expression in Mesangial Cells

Rubin Kelley, V.
Gene Transfer of Macrophage Growth Factors into the Kidney of Autoimmune Mice Initiates Renal Injury

Schena, F.P.; Gesualdo, L.; Ranieri, E.; Montinaro, V.
Prospective Study on Cytokine Renal Expression in Human Proliferative Glomerulonephritis (GN). Search for Pathogenetic Factors and Prognostic Indicators

Schmitz, P.G.; Dalai, R.; Zhang, K.
ω-3 Fatty Acids Diminish Intrarenal Formation of TXA2 and Myosin Light Chain Phosphorylation in Cultured Glomerular Mesangial Cells

The Effect of Amino Acids on ApoB100 and Lp(a) Secretion by HepG2 Cells

Stahl, R.A.K.
Expression of Monocyte/Macrophage Chemoattractant Cytokines in Proliferative Glomerulonephritis

Wilkowski, M.; Evans, W.S.; Veldhuis, J.D.
Pathophysiology of Clinical Hypogonadism in End-Stage Renal Disease

Schechter, B.; Arnon, R.; Wilchek, M. Use of streptavidin for kidney diagnosis and treatment
