Subject Index

Abdominal tuberculosis 269
epidemiology 269
hepatobiliary TB 276
intestinal TB 274
investigations 272
TB peritonitis 270
Achalasia, epidemiologic and aetiologic aspects 1
distribution 1
environmental toxins 4
genetic factors 3
incidence and prevalence 1
infection 5
prognosis and cancer risk 3
Alkaline phosphatases 189
function 191
disorders of hepatobiliary system 196
physiological and pathological conditions 192
urine 202
metabolism in malignancy 200
origin 190
phosphate-hydrolyzing enzymes 201
structure 189
APACHE II scoring in surgical gastrointestinal emergencies 156
discussion 160
prospective studies 160
retrospective studies 159
L-Arginine-nitric oxide pathway 365
adenosine triphosphate (ATP) 365
esophagus 366
nitric oxide 366
opossum 366
vasoactive intestinal peptide (VIP) 365
Basal lower esophageal pressure, human 360
atropine 360
esophageal peristalsis 360
gastric acid secretion 360
lower esophageal sphincter 360
muscarinic receptors 363
pentagastrin 361
pirenzepine 360
Bile secretion, pathophysiology 142
bile acid-dependent bile flow 143
bile formation 142
biliary lipid secretion 149 cholestasis 148
pathogenesis of gallstone disease 150
Chronic liver diseases, sex and sex hormones 9
clinical features 9
sex and liver disease 13
sex hormones 10
sex hormone receptors 12
Chronic viral hepatitis, treatment of 17
chronic HBV infection, treatment of 18
chronic HCV infection, treatment of 28
chronic hepatitis D, treatment of 29
selection of patients 17
Colonic adenoma, natural history 61
clinical significance 64
epidemiological features 61
future studies 65
pathogenic mechanisms 63
Colonic pressure, pig 432
substance P 432
Contraction processes, phasic, tonic 341
specific tone 344
smooth muscle preparations 342
tetanic tone 344
Crohn’s disease, role of ciclosporin therapy 236
absorption and pharmacokinetics 240
anal complications 238
ciclosporin enema therapy 241
controlled trials 238
early reports 236
efficacy 238
interaction with prednisolone 239
tolerance 239
ulcerative colitis 240
Cystic fibrosis, genetics 179
CF gene 180
clinical and diagnostic implications 183
polymorphisms and other mutations 181
Duodenal motility, pig 389
pancreaticoduodenal segment, isolated 390
vasoactive intestinal peptide (VIP) 389
Duodenal ulcer, refractory 219
definition 219
diagnostic approach 221
management 225
pathophysiological basis 220
surgery 225
therapeutic approach 222
Duodenum, isolated perfused, pig
Subject Index

332 compliance 334, 347 cross-sectional area 332, 347 rectum, procine 347 viscoelastic wall properties 352 wall tension 333
Lower esophageal sphincter, canine 396
atropine 396 cisapride 396
Micro flora of the gut 36
colonization resistance 36 general discussion 44 imbalance of immunity and intestinal ecosystem 42 intestinal ecosystem 37 role of gut-associated immune system 40
Oxygen radicals in gastrointestinal disorders 133 acute pancreatitis 134 drug-induced gastrointestinal side effect 137 gastrointestinal cancer 136 introduction 133 necrotizing enterocolitis 136 small-intestinal ischemia 135 stomach 137
Pancreas-kidney transplants 437
diabetes mellitus 438
electrogastrogram 441
gastrointestinal symptom scores 439
gastroparesis 437

gastroparesis improvement 441
solid gastric emptying 440 Pancreatitis, acute 165
management 170
prognostic factors 166,167 Pernicious anemia, gastrointestinal tract 70
etiology 71

gastric autoantibodies 71

gastric mucosa in 73
management 75
other gastrointestinal manifestations 74
pathophysiology 70 Pigment gallstones 282
differential diagnosis 285
epidemiology and etiology 282
pathogenesis and stone composition 284
therapy 287 Portal hypertension, assessment of 92
angiography 100
clinical investigation 92 computerized tomography 100 endoscopy 100
magnetic resonance imaging 100 postulated mechanisms 92 pressure measurements 95 ultrasound and duplex scanner 99
Portal hypertensive gastropathy 294 clinical and therapeutic aspects
299 functional features 295 gastric microcirculation 295 histological features 294
pathophysiology 298
Pylorus, canine 325 wall thickness 327 ultrasonography 326
Salivary and gastrointestinal systems, interactions of 125,210 digestive functions of saliva 126 evaluation of salivary gland function 210 function in aging 212 hyperamylasemia 215
iatrogenic xerostomia 212 management 215 salivary physiology 125 Sjögren’s syndrome 213
Secretory immunoglobulin A in hepatobiliary diseases 78 IgA and alcoholic liver disease 82
IgA in acute liver necrosis 85 IgA in cholestatic liver diseases 86 species differences in processing
80 structure and biology of IgA 78
Sphincter of Oddi motility and its disorders 229 function 229 health and disease 231 regulation of motor activity 230
Zinc absorption and role in gastrointestinal metabolism and disorders 49 absorption from GI tract 49 interaction with other nutrients 50
