Liv Storstein, Professor of Medicine, Research Director International Institute for Therapeutic Research Gaustadalleen 21, N-0371 Oslo (Norway)

Dear Sir,

We would like to thank Dr. med. H.J. Koch for his interesting comments to our manuscript [1]. Although we have emphasized the impact of sex in our article, we agree that the data we have presented suggested a relation between heart rate and ECG amplitudes. The impact of heart rate on ECG amplitudes will be the subject of a separate paper which will soon be submitted for publication.
