Further Section

Nephron 1964;1:387-388

Index rerum ad Vol. 1

(R) = Reviews, Revues générales

Acute renal failure (oliguric), urinary excretion of hydrogen ion, 3
Amylose expérimentale du hamster, lesions précoces, 16
Angiotensin, action on renal transport of sodium in the dog, 338
Arteriole-Glomerular units, structure in different zones of the kidney, 329
Autoimmune factors associated with infarction of the kidney, 93
Body growth, the relation of the kidney to -, The effects of subtotal nephrectomy, 203
Cyanotic heart disease, congenital and primary pulmonary hypertension: the glomerulus in -, (R), 238
Diuretics, effect of Chlormerodrin, p-Chloromercuribenzoate and Dichlorphenamide on renal sodium re-absorption and oxygen consumption, 221
Filtration glomérulaire, mesure par la décroissance plasmatique d’une substance analogue à l’inuline (Poly-fructosan-S), 277
Glomerulus in cyanotic congenital heart disease and primary pulmonary hypertension, (R), 238
Gold localization in the human kidney following chrysotherapy. A biopsy study, 265
Histology, renal, the reproducibility of semiquantitative analyses, 230
Hydrogen ion, urinary excretion in acute oliguric renal failure, 3
Hypoplasia, renal. Some speculations on the nature and significance of developmentally small kidneys, (R), 137
Infarction of the kidney, autoimmune factors associated with -, 93
Ion and water transport in individual segments of the nephron, (R), 31
Lupus nephritis, the spectrum of -, 348
Medullary circulation (extraglomerular), evidence from micro-angiographic and histologic studies, 329
Oxalose rénale expérimentale. Etude au microscope électronique et par spectrographie des rayons X, 158
Oxygen consumption, effect of Chlormerodrin, p-Chloromercuribenzoate and Dichlorphenamide on renal re-absorption and -, 221
Parathyroid hormone, effect on phosphate excretion (study by the stop-flow technique), 103
Phosphate excretion, study by the stop-flow technique. Effect of parathyroid hormone, 103
Polyfructosan-S. Mesure de la fonction glomérulaire par la décroissance plasmatique d’une substance analogue à l’inuline, 277
Protein and urea utilisation, the relation of the kidney to -, the effects of subtotal nephrectomy, 203
Pulmonary hypertension, primary and cyanotic congenital heart disease: the glomerulus in -, (R), 238
388
Index rerum ad Vol. 1
Pyelonephritis (experimental). Bacteriological and morphological studies on the ascending route of infection in the rat, 73
Renal hypertensive rats, isotonic saline diuresis and urinary concentrating ability, 295
Spectrographie des rayons X: étude de l’oxalose rénale expérimentale, 158
Stop-flow technique, study of phosphate excretion. Effect of parathyroid hormone, 103
Transport in individual segments of the nephron: ion and water, (R), 31
Urate nephropathy, experimental: studies of the distribution of urate in renal tissue, 144
Urea and protein utilisation, the relation of the kidney to - , The effects of subtotal nephrectomy, 203
Uremic states, experimental: conditioned avoidance behaviour in primates during various - , 172
Urinary concentrating ability in renal hypertensive rats (under isotonic saline diuresis), 295
Urinary excretion of hydrogen-ion in acute oliguric renal failure, 3
