**Subject Index**

- Abdominal muscles 347
- Acinus 120
- Acute respiratory failure 539
- Age-depending arterial blood gases 1
- Airway dimensions 236
- Airway obstruction 257
- Airways resistance 158
- Alveolar arterial pressure differences 197
- Alveolar cells 438
- Alveolar hypoventilation 485
- Alveolar ventilation 236
- Anemia 518
- Arterial blood gases, relationship, influence of biometric data 1
- Arterial carbon dioxide pressure 1
- Arterial oxygen pressure 1
- Arterial oxygen tension 216
- Asthma, functional examination 74
- Bacterial resistance Suppl. 91
- Beta-receptor 360
- Beta receptor stimulating drugs 148
- Blood gases 31
- Body plethysmography 158,257
- Bronchial asthma 148, 360
- Bronchial resistance 74
- Cardiac output 539
- Cassoni reaction 471
- Cerebrospinal fluid (CSF), pH 137
- Chest wall 331
- Chronic liver disease Suppl. 1
- Chronic mountain sickness 485
- Chronic non specific lung diseases (CNSLD) and death rate, follow-up and pulmonary function 314
- Chronic obstructive bronchitis 457
- Chronic obstructive lung disease 539
- Chronic respiratory insufficiency 273
- Coal workers pneumoconiosis 457
- Complications after lung resection 555
- Components 306
- Computer evaluation 197
- Control of breathing 389
- Controlled cooperative trial Suppl. 123
- Critical concentration Suppl. 40
- Cyanotic congenital heart disease 36
- Dead space 236
- Dead space ventilation 389
- Death rate in patients with CNSLD 314
- Delayed type sensitivity 379
- Development of resistance Suppl. 40
- Diaphragm 331
- Diffusion capacity end-tidal determination of CO 114
- Diffusion capacity of lung 518
- Diffusing capacity/perfusion- and
V/Q-abnormalities 526 Diffusion capacity with CO steady state-method 114
Distribution inhomogeneities 197 Distribution of inspired gas 216
Diurnal rhythm of airway resistance 158 Drug resistance, development Suppl. 70
Electromyography 347
Emphysema 167
Endcapillary oxygen saturation 526
Eosinophilia 471
Ethambutol Suppl. 91
Exercise 216, 389, 429
Subject Index 571

Expiratory gas concentration curves 167, 293, 399
Gaffkky count Suppl. 123 Gas mixing 236
Helium deficiency after 1.5 min wash-in 167, 293, 399
Hepatic function Suppl. 100 Hepatic hydatidosis 471 High altitude 485
Histamine 379 Hyaline membranes 409 Hydatidosis 471 Hypocapnia, chronic 137
Impedance 306
Inadequate chemotherapy Suppl. 70 Indications for lung resection 555
Inhalative provocataion test 360 Inspired oxygen concentration 526 Interruption of bronchial air
flow 74 Interstitial lung disease 429 Interstitial pulmonary fibrosis 101
Lactoferrin in sputum 480 Laminar flow 236 Locus diagrams 306 Lung perfusion 438
Lung phospholipids 438 Lung volumes 54, 257 Lymphangiography 89
Lysozyme in sputum 480 Method with immunodiffusion 457 Mid-slope of expiratory helium curve 167,
293, 399 Minimal inhibitory concentration Suppl. 40 Minimum radius of exponential phase 293, 399
Mitrval stenosis 101, 216 Morphometry 438 Multiple ratio of FEV1/FIV1% 293, 399
Nasal catheter 366
Natural defense mechanisms 480 Normal subjects 36, 216 Normal values 54 Novodrine 379
Obstructive emphysema 429 Obstructive lung disease 347 Obstructive pulmonary emphysema 273
Obstructive ventilatory syndrome in pulmonary tuberculosis 379 Orciprenalin 360
Orthostatic changes of diffusing capacity 101 Oxygen administration 366 Oxygen
diffusing capacity/perfusion ratio 197 Oxygen dissociation curve 36 Oxygen, side-effects 280
Oxygen therapy 280 Oxygen transferring factor 429 Plasma catecholamines 273
Pneumonectomy 101 Polycythemia 518 Polyresistant tuberculosis Suppl. 84
Post treatment results Suppl. 91 Power of breathing 306 Prediction nomogram 54
Predicted PaCO2 31 Preoperative management Suppl. 97 Preoperative pulmonary function studies
555 Pressure flow curves, interpretation 257 Pressure volume diagrams 186, 409 Protein, C-reactive 457 Pseudocombination Suppl. 70 Pulmonary arterial pressure 539 Pulmonary diffusing capacity 101, 216 Pulmonary emphysema 36, 347 Pulmonary follow-up in patients with CNSLD 314 Pulmonary function in patients with CNSLD 314 Pulmonary gas exchange 197 Pulmonary hemodynamics 539 Pulmonary hydatidosis 471 Pulmonary hypertension 485

Subject Index

Pulmonary insufficiency 555 Pulmonary tuberculosis Suppl. 70 Suppl. 84, Suppl. 91 Pulmonary tuberculosis, monotherapy Suppl. 84 Pulmonary tuberculosis, combined therapy of chronic Suppl. 107 Pulmonary tuberculosis therapy Suppl. 84 Pulmonary wedge pressure 539 Radius os strongest curvature of CO2 curve 167, 293, 399 Radius of strongest curvature of helium curve 167, 293, 399 Regression equations 54 Reproducibility of CO diffusion capacity 114 Resistance of alveolar-capillary membrane 518 Resistance of capillary blood 518 Resistant TB cases Suppl. 116 Respiratory distress syndrome 89, 409, 438 Respiratory insufficiency 280 Respiratory muscles 331 Respiratory treatment 280 Resting ventilation 347 Reversibility 293, 399 Reynold’s number 236 Rib cage 331 Rifampicin, Suppl. 1, Suppl. 29, Suppl. 84, Suppl. 91, Suppl. 100, Suppl. 116, Suppl. 123 Rifampicin and jaundice Suppl. 107 Rifampicin and liverbiopsy Suppl. 107 Rifampicin and transaminases Suppl. 107 Rifampicin, increase after RMP administration Suppl. 17 Rifampicin, intermittent therapy Suppl. 7 Rifampicin, liver function tests after Bilirubin Suppl. 17 Rifampicin, local diffusibility Suppl. 44 Rifampicin, repeated high dosage Suppl. 7 Rifampicin, secondary resistance Suppl. 70 Rifampicin, serum bilirubin increase after Suppl. 17 Rifampicin, serum levels Suppl. 7 Rifampicin, therapeutic effectiveness Suppl. 57 Rifampicin tolerance and side effects Suppl. 57 Secretory immunoglobulin A in sputum 480 Sensitivity tests Suppl. 40, Suppl. 70 Serum bilirubin Suppl. 1 Serum levels Suppl. 29 Shortening of therapy Suppl. 100 Single-breath tests 236 Single versus repeated administration Suppl. 1 Spondylitis 331 Sputum conversion Suppl. 97 Standard therapy, new Suppl. 100 Stiff-lung disease 89 Surfactant 409, 438 Surgical contraindications for lung resection 555 Time and dosage response 148 Tolerance Suppl. 97 Trapped air 257 Treatment of hypoxemia 366 Tuberculosis Suppl. 123 Tuberculosis chemotherapy Suppl. 57 Tuberculosis, chronic Suppl. 84, Suppl. 116 Tuberculosis, retreatment Suppl. 57 Tuberculous lesions of bone Suppl. 44 Tuberculous lesions of joint Suppl. 44 Turbulence 236 Turkish subjects 54 Upper and lower airways 257 Ventilation/perfusion ratio 120, 197 Ventilatory insufficiency 31, 555 Ventilatory mechanism 74
