Subject Index

Acetylcholine 260, 360
Acid-base 389
Adrenergic innervation of the lung 117
Age 458
Airway narrowing 543
Airways obstruction 95
Airway resistance 260, 552
Airway resistance during exercise 414
Allergen inhalation provocation tests
345 Animal experiment 430 Arterial oxygen tension 223 Asthmatic bronchitis 443 Auxiloson
443 Atopic patients 345 Atopy inhalation provocation tests 345 Atropine 378
Autotransplanted lungs 117
Blockade of vagus 360
Blood 153
Blood gases 552
Body plethysmography 31
Bronchial asthma 260, 443
Bronchial carcinoma 105, 329, 529
Bronchial motor tone 378
Bronchial mucous membranes 443
Bronchial reactivity 378
Bradykinin 378
Bronchiectasis 95
Bronchofiberscopic cultures 561
Bronchofiberscopy in pneumonia 561
Buffering 389
Bullous emphysema 187
Cardiac output 201
Chest surgery 105, 329, 529
Chronic bronchitis 64, 311, 458
Chronic obstructive airways disease 552
Cigarette smoking 458
Clinical spirometry 39
Comparability of values from living subjects and from isolated lungs 176 Compliance 270
Computer program 89, 161, 246 Corticoid 443 Corticoid therapy 270 CPI 285
Decentralization of the lung 117 Determination of noradrenalin of bronchi
117 Diffusion capacity steady state 48 CO2 dissociation curve 161 Dosage aerosol 443
ECG criteria of right ventricular hypertrophy 234 Effects of temperature 176 Elastic recoil of the lung and age 252 Elastic recoil pressure 141 Elasticity of the esophagus 252 Emphysema 187, 311 Epidemiology 458 Ergometric plethysmography 414 Flow rates 1 Frequency of ECG abnormalities 234 Forced expiratory volume 260 Foreign body 95 Graded exercise 297 Haemodialysis 389 Hemoglobin 89 Histamine 360 Histamine inhalation provocation tests 345 Human bronchial muscle in vitro 378 Hypolipidemia 285 Impedance 12 Increased water content 543 Subject Index 573

Inflammation 443 Inhalation bronchography 430 Locus diagram 12 Long-term effect 430 Lower respiratory tract flora 561 Lung 270 Lung diffusing capacity 311 Lung function tests 105, 329, 529 Lung N₂ clearance curve with O₂ 402 Lung overinflation 234 Lung scintigraphy 201 Lung transfer factor 297 Maximum expiratory flow-volume curves 260 Mechanical factors for pulmonary hypertension 552 Medical Research Council questionnaire 458 Method of Niesel and Thews 153 Mucus secretion 543 Nasal resistance 31 Newborn lambs 153 Normal subjects 297 Normal values 39 North Indian males 39 Oxygen affinity 153 Oxygen breathing 64 Oxygen capacity 153 Oxygen dissociation curve 89 Panting 1 Paraseptal emphysema 187 Pathology 430 Peak flow rate 458 Perfusion 201 Periacinar emphysema 187 Phase angle 12 Phase-shift, broncho-compression, bron-
cholysis 414 Phospholipids 285
Post-operative complications 105, 529 Post-operative risk 329 Power, work 12
Precociousness of functional changes in asbestosis 132
Prediction formulae 517
Pre-operative assessment 329
Progressive systemic sclerosis 141
Pulmonary arterial pressure during exercise 64
Pulmonary artery mean pressure 552
Pulmonary artery occlusion 223
Pulmonary artery pressure 234
Pulmonary circulation 48, 201
Pulmonary embolism 201, 223
Pulmonary fibrosis 141
Pulmonary haemodynamics 64
Pulmonary tuberculosis 48
Quiet breathing 1
Radioisotopes 166
Rahn-Fenn diagram 246
Ratio 201
Regional lung function 166
Relationship between DLCO, VO2 and Ve 127 Residual volume 552 Resistance 270 Respiratory dead space 223 Repeated exercise 64
Respiratory failure 95 Respiratory mechanism examination 141 Respiratory questionnaire 517 Respiratory symptoms 458 Rhinomanometria anterior 31 Rhinomanometria posterior 31 Right ventricular end-diastolic pressure 234
Sarcoidosis 270 Selective airway cultures 561 Sensitivity 517 Serotonin 360 Sex differences 458, 517 Smoking 517
Spirometric examination 141 Spirometry 48, 517 Steady-state DLCO at rest and during exercise in asbestos workers 132 574
Subject Index

Steady-state DLCO at work in normal subjects 127 Suppurative lung disease 95 Surfactant activity 176 Surfactant system 285 Surgery for emphysema 187 Surgical risk assessment 105, 529
Tantalum dust 430
Time constants 402
Tissue viscance 176
Total airways resistance changes 1 Transfer of gases 48 Trapped air 166
Types of exercise reactions 414 Uncontaminated airway flora 561 Uneven ventilation 166 Uraemia 389
Vagal reflexes 378 Ventilation 48, 201 Ventilatory function 458 Ventilatory mechanics 402 Ventilatory response to CO2 389 Volume distribution 166
Water elimination 543
