Subject Index

Adrenergic compounds 289 Adult chronic cough 236 Airway obstruction 95, 112
resistance 270 Alveolar-arterial oxygen difference 245
pressure-breathing volume diagram 22 Alveoloarterial gradient 455 Allergen-induced
bronchospasm 231 Allergic bronchopulmonary aspergilosis
281 Ammonia 199 Amniotic fluid 448 Antigen 95
Arterial CC/4 pressure 455 Ascaris extract 270, 359 Aspergillus fumigatus 281 Asthma 425
Bioengineering 315 Blood gases 143, 199,211
oxygen tension 54 Body plethysmography 22 Breath sounds 315 Bronchial asthma 281
catheterization 389 Bronchodilating tests 47 Bronchodilation 1 Bronchopulmonary aspergilosis
281 Bronchoscopic aspect 47
Bubble method 303
Capillary damage 70
Cardiac output 405
Catecholamines 261
Central and peripheral bronchial collapse
47 Chemoreceptors 211 Chest acoustics 315 Childhood chest illness 236 Cholesterol 303
Chronic bronchitis 188, 372
- inflammatory disease 468
Clinical anamnestic findings in pulmonary
hypertension 366 CO transfer 455 CO2 breathing 211
sensitivity 219
stimulus 188 Coagulation factors 396 Cohort study 236 Collagen 325 Collateral ventilation 112
Connective tissue framework 325 Contralateral vagus blockade 270 Correlations 47
Dead space 133
Deep vein thrombosis 381
Density 150
Different species 70
Differential diagnosis 104
Diffusing capacity 455
- capacity-perfusion inhomogeneities 245
Diffusion 405
Dynamic lung compliance 349
Early diagnosis 294
Elastin 325
Electronmicroscopy 261
Emphysema 188
Evolution of lung mechanics 436
Female sex hormones 325 Fenoterol 1 Fetus 448
Fiberoptic bronchoscopy 143 Fibrinogen 396 Fibroblast metabolism 325 Fibrosing alveolitis 36 Fibrosis 294 Flow-volume curves 425 Fungi 468
