Subject Index
Compiled by G. Boehm, Basel (B) = Book Review
Acknowledgments 64
Acquired immunodeficiency syndrome, v. AIDS
Adult respiratory distress syndrome, v. Blood storage
Agglutinins, v. Cold agglutinins
Aging, cellular and molecular aspects – The red cell as a model (Progress in clinical and
biological research, vol. 195) 62(B)
AIDS (= acquired immune deficiency syndrome); first case in Italy of fatal AIDS in a
haemophilic 34
 persistent cold agglutinins in AIDS and related disorders 171
Alder anomaly accompanied by a mutation of the myeloperoxidase structural gene 157
Algeria; changes in patterns of leukaemia in Algeria, 1966-1985 34
Anaemia; dyserythropoietic, congenital, type I: report of a pair of siblings 219
 glycosylated haemoglobin levels in a benign form of sickle cell anaemia in Saudi Arabia 160
 haemolytic; primary malignant lymphoma of the uterine cervix associated with cold-reacting auto-antibody-mediated haemolytic
anaemia 232
 haemolytic, autoimmune, associated with rheumatoid arthritis and paroxysmal nocturnal haemoglobinuria 241
 sickle-cell anaemia, lymphocyte sub-populations 60
 reply 60
Anaemias haemolytic, vol. I (The hereditary haemolytic anaemias, part I, 3rd ed.) 61 (B)
 immune hemolytic anaemias (Meth ods in hematology, vol. 12) 62 (B)
Antibodies, v. Antineutrophil antibodies
Antibodies, monoclonal, v. Bernard-Soulier; Leukaemia, lymphocytic, chronic (OKT4+); Platelets, human
Antibody to neutrophils associated with autoimmune neutropenia, analysis: possible recognition of Fc-receptor-related molecules 236
Anticoagulant, v. ‘Lupus-type’ anticoagulant
Antineutrophil antibodies in neutropenic patients, diagnostic usefulness of measuring 65
Antioxidative systems; effects of blood storage on red cell antioxidative systems 30
Antiplatelet antibodies, v. Platelets, human
Antithrombin III during high-dose cytosin arabinoside therapy with or without asparaginase 96
Aortic occlusion; acute myelocytic leukaemia with acute aortic occlusion as presenting symptom 120
Asparaginase; antithrombin III during high-dose cytosin arabinoside therapy with or without asparaginase 96
Autoantibodies, v. Cold-reacting autoantibodies
Autoimmune disorder, v. Hairy-cell leukaemia
Autoimmune haemolytic anaemia associated with rheumatoid arthritis and paroxysmal nocturnal haemoglobinuria 241
Autoimmune neutropenia, v. Neutrophils, antibody
Automated cytochemistry, v. Cytochemistry
B cell chronic lymphocytic leukaemia and lung carcinoma with T-lymphocyte-rich pleural effusion in a single patient 110
Bence Jones protein, v. Monoclonal immunoglobulins
Bernard-Soulier syndrome: diagnosis by an ELISA method using monoclonal antibodies in 2 new unrelated patients 203
B-immunoblastic lymphoma arising in angioimmunoblastic lymphadenopathy 105
Biopsy pathology of bone and bone marrow (Biopsy pathology series) 62 (B)
Blood coagulation, v. Coagulation of blood
Blood diseases 61(B)
Blood elements; radiolabeled cellular blood elements (Pathophysiology, techniques and scintigraphic applications) 127 (B)
Blood storage, effects on red cell antioxidative systems 30
Blood transfusion; plasma fractionation and blood transfusion (Developments in hematology and immunology) 63 (B)
Bone and bone marrow, biopsy pathology (Biopsy pathology series) 62 (B)
Bone marrow fibroblasts; increased collagen synthesis of bone marrow fibroblasts by materials released from platelets of chronic granulocytic leukaemia and polycythaemia vera 6
Bone marrow transplant; unexpected presentation of deep candidiasis in a recipient of a mismatched bone marrow transplant 116
Book reviews 61-63 (B), 127-128 (B), 192(B)
Calcium dobesilate, v. Platelet-activating factor (PAF)
Candidiasis; unexpected presentation of deep candidiasis in a recipient of a mismatched bone marrow transplant 116
Carcinoma, v. Lung carcinoma
Cell kinetics; analysis of human myeloma cell population kinetics 153
Cell surface molecules on human platelets, analysis with monoclonal antibodies (I. Identification of four platelet-specific surface molecules) 141
(II. Diversity of antibody binding sites on molecules and its relation to platelet function) 147
Chemotherapy, v. Lithium
Childhood idiopathic myelofibrosis, high-dose intravenous corticosteroid treatment 49
Chromosomes; a new chromosome translocation (3; 21) in M2 acute lymphocytic leukaemia 23
variant translocation t (7; 9; 22) during lymphoid blastic crisis in a case of Ph'-positive chronic myelogenous leukaemia with previous Epstein-Barr virus infection

Coagulation of blood, v. Anticoagulant (lupus type), Antithrombin III, Bernard-Soulier syndrome, Factor X, Haemorrhage, Plasminogen, Platelet(s), Thrombocytopenia, Thrombocytopenic purpura, Thrombocytosis, Thrombotic tendency

Cold agglutinins, persistent, in AIDS and related disorders

Cold-insoluble globulin, v. Fibronectin (B)

Cold-reacting autoantibodies; primary malignant lymphoma of the uterine cervix associated with cold-reacting antibody-mediated haemolytic anaemia

Collagen synthesis; increased collagen synthesis of bone marrow fibroblasts by materials released from platelets of chronic granulocytic leukaemia and polycythaemia vera

Congenital dyserythropoietic anaemia type I: report of a pair of siblings

Congenital heterozygous plasminogen deficiency associated with a severe thrombotic tendency

Corticosteroid treatment with high intravenous dose in childhood idiopathic myelo-fibrosis

Cytarabine, low dose in myelodysplastic syndromes and acute leukaemia (A comment); reply

Cytochemistry, automated, in non-Hodgkin’s lymphoma: a new method for determination of cells from lymph node biopsy

Cytoplasmic immunoglobulins; phenotypic characterization of adult acute lymphoblastic leukaemia: are cytoplasmic immunoglobulins related to prognosis?

Cytosin arabinoside therapy; anti-thrombin III during high-dose cytosine arabinoside therapy with or without asparaginase

Deoxynucleotidyl transferase (TdT); incidence of TdT positivity in cases of leukaemia and lymphoma

Diabetic microangiopathy, v. Platelet-activating factor (PAF)

Diagnosis, v. Bernard-Soulier syndrome

Diagnostic usefulness of measuring anti-neutrophil antibodies in neutropenic patients

Dyserythropoietic anaemia, congenital, type I: report of a pair of siblings

Electron microscope (transmission), Dyserythropoietic anaemia, v. Mastocytoma, Toxic oil syndrome

ELISA (= enzyme-linked immunosorbent assay) method; Bernard-Soulier syndrome: diagnosis by an ELISA method using monoclonal antibodies in 2 new unrelated patients

Elliptocytosis and schistocytosis in myelodysplasia: Report of two cases

Energetic state (red blood cells) v. Redox...

metabolites 2: Tri-and dicarboxylic acids, purines, pyrimidines and derivatives, coenzymes, inorganic compounds

amino acids and related compounds 61 (B)

Eosinophils (ultrastructure), v. Toxic oil syndrome

Epstein-Barr virus; variant translocation t (7; 9; 22) during lymphoid blastic crisis in a case of Ph1-positive chronic myelogenous leukaemia with previous Epstein-Barr virus infection 46

Erythrocytes; cellular and molecular aspects of aging – The red cell as a model (Progress in clinical and biological research, vol. 195) 62 (B)

Effects of blood storage on red cell antioxidative systems 30

Hereditary leaky red cell syndrome in a Swiss family 70

Redox and energetic state of red blood cells in G6PD deficiency, heterozygous ß-thalassaemia and the combination of both 211

Erythropagocytosis, v. Phagocytic plasma cells

Estrogen and progesteron receptor guideline for tamoxifen therapy in chronic lymphocytic leukaemia: a pilot study 92

Evan’s syndrome, chronic active hepatitis and focal glomerulonephritis in IgA deficiency 1

Factor X (= Stuart-Prower factor) variants, tentative and updated classifications 58

Families, v. Bernard-Soulier syndrome, Dyserythropoietic anaemia, Hereditary leaky red cell... , Plasminogen

Fc receptor, v. Neutrophils, antibody

Ferments, v. Antioxidative systems (erythrocytes), Asparaginase, Deoxinucleotidyl transferase, Enzymes (B), Glucose-6-phosphate dehydrogenase, Myeloperoxidase

Fibroblasts, v. Bone marrow fibroblasts

Fibronectin; plasma fibronectin in sickle cell disease 209

Plasma fibronectin structure and function (Hematology, vol. 3) 192 (B)

Flow cytometry, automated, v. Cytochemistry, automated

Gammopathy, bicalon, v. Myeloma, multiple

Gammopathy, monoclonal; phagocytic plasma cells and Russell bodies in monoclonal gammopathy of undetermined significance 178

Monoclonal immunoglobulins

Gc protein (vitamin D binding protein) on the surface of normal human lymphocytes and leukaemic lymphocytes, distribution 26

Genetic changes, v. Myeloperoxidase

Genetic rearrangements in leukaemia and lymphoma (Leukaemia and lymphoma research, vol. 2) 128 (B)

Glomerulonephritis; Evan’s syndrome, chronic active hepatitis and focal glomerulonephritis in IgA deficiency 1

Glucose-6-phosphate dehydrogenase (G6PD) deficiency; redox and energetic state of red blood cells in G6PD deficiency, heterozygous ß-thalassaemia and the combination of both 211

Glycosylated haemoglobin levels in a benign form of sickle cell anaemia in Saudi Arabia 160

Haematological neoplasias, v. Cytosin arabinoside therapy

Haematology, manual 128 (B)

Haematology, methods, vol. 12; immune haemolytic anaemias 62 (B)

Haematology; radionuclides in haematology 192 (B)
Haematology, recent advances, vol. 4 61 (B)
Haematology, supportive therapy 62 (B)
Haemoglobin; experimental approaches for the study of haemoglobin switching (Progress in clinical and biological research, vol. 191) 62 (B)
Glycosylated haemoglobin levels in a benign form of sickle cell anaemia in Saudi Arabia 160
Haemoglobinuria, paroxysmal, nocturnal; autoimmune haemolytic anaemia associated with rheumatoid arthritis and paroxysmal nocturnal haemoglobinuria 241
Haemolytic anaemias, vol. 1 (The hereditary haemolytic anaemias, part I, 3rd ed.) 61 (B)
Haemolytic anaemias; immune hemolytic anemias (Methods in hematology, vol. 12) 62 (B)
Haemolytic disorder, v. Hereditary leaky red cell...
Haemophilia A; first case in Italy of fatal AIDS in haemophilia 34
Haemopoietic progenitor cells, committed and pluripotent, circulating in infants 18
Haemorrhage, intracerebral, by acute myelofibrosis 38
248
Subject Index

Haemorrhage, subdural, in a 32-year-old man with chronic idiopathic thrombocytopenic purpura 186
Hairy-cell leukaemia associated with autoimmune disorders in the form of a ‘lupus-type’ anti-coagulant and a positive direct Coombs’ test 181
Hemalog® D, v. Cytochemistry, automated
Hemolytic anemias; immune hemolytic anemias (Methods in hematology, vol. 12) 62 (B)
Hematology, methods, vol. 12; immune hemolytic anemias 62 (B)
Hepatitis; Evan’s syndrome, chronic active hepatitis and focal glomerulonephritis in IgA deficiency 1
Hereditary leaky red cell syndrome in a Swiss family 70
Hodgkin, v. Non-Hodgkin’s... (B)
HTLV-III virus (= Human T-cell lympho-tropic virus – type III), v. AIDS
Human leukemia, modern trends VI (New results in clinical and biological research including pediatric oncology, haematol-ogy and blood transfusion) 128 (B)
Human platelets, v. Platelets, human
Idiopathic thrombocytopenic purpura; T-lymphocyte subsets and platelet-associated IgG in idiopathic thrombocytopenic purpura: effect of splenectomy 83
Subdural haemorrhage in a 32-year-old man with chronic idiopathic thrombocytopenic purpura 186
IgA deficiency; Evan’s syndrome, chronic active hepatitis and focal glomerulonephritis in IgA deficiency 1
IgG, v. Idiopathic thrombocytopenic purpura
Immune hemolytic anemias (Methods in hematology, vol. 12) 62 (B)
Immunoblastic lymphoma, v. Lymphoma
Infants, v. Childhood, Haemopoietic progenitor cells
Iron-binding total capacity, effects of transferrin genetic phenotypes 215
Italy, v. AIDS
Leukaemia, acute; low-dose cytarabine in myelodysplastic syndromes and acute leukaemia (A comment) \[125\]

; reply 126

; a case of leukaemic mastocytoma terminating in metamorphosis 40

; B-cell lymphocytic, chronic, and lung carcinoma with T-lymphocyte-rich pleural effusion in a single patient 110

; granulocytic, chronic; increased collagen synthesis of bone marrow fibroblasts by materials released from platelets of chronic granulocytic leukaemia and polycythaemia vera 6

; hairy-cell leukaemia, associated with auto-immune disorders in the form of a ‘lupus-type’ anti-coagulant and positive direct Coombs’ test 181

; human, modern trends IV (New results in clinical and biological research, including pediatric oncology, haematology and blood transfusion) 128 (B)

; incidence of deoxynucleotidyl transferase positivity in leukaemia and lymphoma 12

Leukaemia, lymphatic, v. Leukaemia, T-cell lymphatic...

; lymphoblastic, acute, adult, phenotypic characterization: are cytoplasmic immunoglobulins related to prognosis? 190

; lymphoblastic, T-acute, in adults, related to transitional cortical-medullary thymocytes with surface markers of the CD4 subset 52

; lymphocytic, v. Lymphocytes, human ...

Leukaemia, lymphocytic, chronic; estrogen and progesterone receptor guideline for tamoxifen therapy in chronic lymphocytic leukaemia: a pilot study 92

; OKT4+ chronic lymphocytic leukaemia cells display different reactivity with selected monoclonal antibody combinations 89

; with leukaemic meningitis 113

; untreated, v. Leukaemia, myeloid, acute

Leukaemia and lymphoma, genetic rearrangements (Leukaemia and lymphoma research, vol. 2) 128(B)

Leukaemia, myelocytic, acute, with acute aortic occlusion as presenting symptom 120

; myelogenous, acute, correlative patterns of leukocyte counts at presentation and relapse 79
myeloid, acute, developing in a patient with longstanding untreated chronic lymphocytic leukaemia 229

non-lymphocytic, acute (M2); a new chromosome translocation (3:21) in M2 acute lymphocytic leukaemia 23

T-cell lymphatic, chronic; T activation in a patient with T cell chronic lymphocytic leukaemia 122

Leukaemias; changes of patterns in leukaemia in Algeria, 1966-1985 123

therapy, v. Cytosine arabinoside therapy

Leukaemic mastocytoma, a case, terminating in metamorphosis 40

Leukaemic meningitis in chronic lymphocytic leukaemia 113

Leukocyte counts; correlative patterns of leukocyte counts at presentation and relapse in acute myelogenous leukaemia 79

Leukocyte function, regulation (Contemporary topics in immunobiology, vol. 14) 128(B)

Leukocytes, granules, v. Alder anomaly

Lithium, effects on the platelet count in neoplastic patients treated with polychemotherapy 242

Lung carcinoma; B cell chronic lymphocytic leukaemia and lung carcinoma with T-lymphocyte-rich pleural effusion in a single patient 110

‘Lupus-type’ anticoagulant; hairy-cell leukaemia associated with auto-immune disorders in the form of a ‘lupus-type’ anticoagulant and a positive direct Coombs’ test 181

Lymph node biopsy; automated cytochemistry in non-Hodgkin’s lymphoma: a new method for determination of cells from lymph node biopsy 199

Lymphadenopathy; B-immunoblastic lymphoma arising in angioimmunoblastic lymphadenopathy 105

Lymphocyte subpopulations in sickle-cell anaemia 60

Lymphocytes, human, normal and leukaemic; distribution of Gc protein; (vitamin D binding protein) on the surface of normal and leukaemic lymphocytes 26

Lymphocytes, v. Leukaemia, lymphocytic, chronic (OKT4+); Thymocytes

Lymphoma and leukaemia, genetic rearrangements (Leukaemia and lymphoma research, vol. 2) 128 (B)

Lymphoma; B-immunoblastic lymphoma arising in angioimmunoblastic lymphadenopathy 105

incidence of deoxynucleotidyl transferase positivity in cases of leukaemia and lymphoma 12

primary malignant of the uterine cervix associated with cold-reacting auto-antibody-mediated haemolytic anaemia 232

v. Non-Hodgkin’s lymphoma

Manual of haematology 128 (B)

Mastocytoma; a case of leukaemic mastocytoma terminating in metamorphosis 40

Subject Index
Membranes of erythrocytes, v. Hereditary leaky red cell...
Meningitis, v. Leukaemic meningitis
Methods of enzymatic analysis, vol. 7, 3rd ed. metabolites 2: Tri- and dicarboxylic acids, purines, pyrimidines and derivatives, coenzymes, inorganic compounds 61 (B)
vol. 8, 3rd ed. metabolites: 3: Lipids, amino acids and related compounds 61 (B)
Methods in hematology, vol. 12; immune hemolytic anaemias 62 (B)
Methods, v. Cytochemistry, automated; ELISA method
Microangiopathy; platelet-activating factor (PAF) – A powerful lipid autacoid possibly involved in microangiopathy (A review) 129
Monoclonal antibodies; analysis of cell surface molecules on human platelets with monoclonal antibodies (I. Identification of four platelet-specific surface molecules) 141
(Diversity of antibody-binding sites on molecules and its relation to platelet function) 147
Monoclonal antibodies, v. Bernard-Soulier syndrome; Leukaemia, lymphocytic, chronic (OKT4α); Platelets, human
Monoclonal immunoglobulins; serum and urine monoclonal immunoglobulins in malignant non-Hodgkin’s lymphoma 193
Multiple myeloma, v. Myeloma
Myelodysplasia; elliptocytosis and schistocytosis in myelodysplasia: Report of two cases 174
Myelodysplastic syndromes; low-dose cyt-arabine in myelodysplastic syndromes and acute leukaemia (A comment) 125
reply 126
Myelofibrosis, acute, with associated intra-cerebral haemorrhage 38
high-dose intravenous corticosteroid treatment in childhood idiopathic myelofibrosis 49
Myeloma, human, cell population kinetics, analysis 153
Myeloma, multiple and coincident non-Hodgkin’s lymphoma with 2 serum monoclonal immunoglobulins 183
v. Paraproteinaemia, double
Myeloperoxidase; Alder anomaly accompanied by a mutation of the myeloperoxidase structural gene 157
Neoplastic patients, treated with polychemotheraphy, effects of lithium on the platelet count 242
Neutropenia, autoimmune, v. Neutrophils, antibody
Neutropenic patients; the diagnostic usefulness of measuring antineutrophil antibodies in neutropenic patients 65
Neutrophils, antibody; analysis of antibody to neutrophils associated with autoimmune neutropenia: possible recognition of Fc-receptor-related molecules 236
Neutrophils, v. Alder anomaly
serum and urine monoclonal immunoglobulins in malignant non-Hodgkin’s lymphoma 193
and coincident multiple myeloma with 2 serum monoclonal immunoglobulins 183
new techniques and treatments 127

Oxidation, v. Antioxidative systems

PAF (= Platelet-activating factor). A powerful lipid autacoid possibly involved in microangiography (A review) 129

Paraproteinaemia, double (IgA + IgG) in a single patient: immunofluorescence evidence for a common plasma cell clone ‘frozen’ at the ‘switch’ phase 224

Paroxysmal nocturnal haemoglobinuria, v. Haemoglobinuria

Phagocytic plasma cells and Russell bodies in monoclonal gammopathy of undetermined significance 178

Plasma cell clone, v. Paraproteinaemia, double

Plasma cell myeloma, v. Myeloma, human

Plasma cells, phagocytic, and Russell bodies in monoclonal gammopathy of undetermined significance 178

Plasma fractionation and blood transfusion (Developments in hematology and immunology) 63 (B)

Plasma fibronectin in sickle cell disease 209

Plasma fibronectin, structure and function (Hematology, vol. 3) 192 (B)

Plasminogen, congenital, heterozygous, deficiency, associated with severe thrombotic tendency 54

Platelet activating factor (PAF); a powerful lipid autacoid possibly involved in microangiography (A review) 129

Platelet count in neoplastic patients treated with polychemotherapy, effects of lithium 242

Platelet membrane glycoproteins, v. Bernard-Soulier syndrome

Platelets, human; analysis of cell surface molecules on human platelets with monoclonal antibodies (I. Identification of four platelet-specific molecules) 141 (II. Diversity of antibody binding sites on molecules and its relation to platelet function) 147

increased collagen synthesis of bone marrow fibroblasts by materials released from platelets of chronic granulocytic leukaemia and polycythaemia vera 6

v. Purpura, thrombocytopenic...

Pleural effusion; B cell chronic lymphocytic leukaemia and lung carcinoma with T-lymphocyte-rich pleural effusion in a single patient 110

Polycythaemia vera; increased collagen synthesis of bone marrow fibroblasts by material released from platelets of chronic granulocytic leukaemia and polycythaemia vera 6

Progenitor cells, circulating, v. Haemopoietic progenitor cells

Progesterone receptor, v. Estrogen

Prognosis (lymphoblastic leukaemia), v. Cytoplasmic immunoglobulins
Purpura, thrombocytopenic, idiopathic; subdural haemorrhage in a 32-year-old man with chronic idiopathic thrombocytopenic purpura 186
T-lymphocyte subsets and platelet-associated IgG in idiopathic thrombocytopenic purpura: effect of splenectomy 83
Radiolabeled cellular blood elements (Pathophysiology, techniques, and scintigraphic applications) 127 (B)
Radionuclides in haematology 192 (B)
Rapeseed oil, denaturated; toxic oil syndrome, ultrastructural study of blood cells 165
Red blood cells; reox and energetic state of red blood cells in G6PD deficiency, heterozygous ß-thalassaemia and the combination of both 211
Red cell antioxidative systems, effects of blood storage 30
Red cells, leaky; hereditary leaky red cell syndrome in a Swiss family 70
Red cells, v. Aging (B)
Redox and energetic state of red blood cells in G6PD deficiency, heterozygous ß-thalassaemia and the combination of both 211
250
Subject Index
Rheumatoid arthritis; autoimmune haemolytic anaemia associated with rheumatoid arthritis and paroxysmal nocturnal haemoglobinuria 241
Russell bodies; phagocytic plasma cells and Russell bodies in monoclonal gammopathy of undetermined significance 178
Saudi Arabia; glycosylated haemoglobin levels in a benign form of sickle cell anaemia in Saudi Arabia 180
studies on sickle cell heterozygotes in Saudi Arabia – Interaction with ß-thalassaemia 100
Schistocytosis and elliptocytosis in myelo-dysplasia: Report of two cases 174
Serum monoclonal immunoglobulins, v. Monoclonal immunoglobulins
Siblings, v. Dyserythropoietic anaemia, congenital
Sickle cell anaemia; glycosylated haemoglobin levels in a benign form of sickle cell anaemia 160
lymphocyte subpopulations 60
reply 60
Sickle cell disease 192(B)
plasma fibronectin 209
Sickle cell heterozygotes in Saudi Arabia, studies – Interaction with ß-thalassaemia 100
Soulie... v. Bernard...
Splenectomy; T-lymphocyte subsets and platelet-associated IgG in idiopathic thrombocytopenic purpura: effect of splenectomy 83
Subdural haemorrhage, v. Haemorrhage
Swiss family; hereditary leaky red cell syndrome in a Swiss family 70
Switching myeloma cell clone; double (IgAk + IgGk) paraproteinaemia in a single patient: immunofluorescence evidence for a common plasma cell clone ‘frozen’ at the ‘switch’ phase 224
T activation in a patient with T cell chronic lymphatic leukaemia

T-acute lymphoblastic leukaemia, v. Leukaemia, lymphoblastic, T-acute

Tamoxifen therapy; estrogen and progesterone receptor guideline for tamoxifen therapy in chronic lymphocytic leukaemia: a pilot study

Thalassaemia (alpha); studies on sickle cell heterozygotes in Saudi Arabia – Interaction with α-thalassaemia

Thalassaemia (beta); redox and energetic state of red blood cells in G6PD deficiency, heterozygous β-thalassaemia and the combination of both

Therapy, supportive, in haematology

Thrombocytopenic, idiopathic, purpura; subdural haemorrhage in a 32-year-old man with chronic idiopathic thrombocytopenic purpura: effect of splenectomy

Thrombocytosis; acquired type I von Willebrand’s disease in a patient with essential thrombocytosis

Thrombotic tendency; congenital heterozygous plasminogen deficiency associated with severe thrombotic tendency

Thymocytes; adult T-acute lymphoblastic leukaemia related to transitional cortical-medullary thymocytes with surface markers of the CD4 subset

T-lymphocyte subsets and platelet-associated IgG in idiopathic thrombocytopenic purpura: effect of splenectomy

Thrombocytosis; acquired type I von Willebrand’s disease in a patient with essential thrombocytosis

Von Willebrand’s disease, acquired, type I, in a patient with essential thrombocytosis

Willebrand, v. Von Willebrand
