European Society of Haematology

The 9th Congress of the European Society of Haematology will be held at the Institute of Tropical Medicine, Lisbon, from August 26th to August 31st 1963 and is open to all physicians and scientists interested in haematology. Official languages will be English, French and Portuguese with simultaneous translation in the main conference room. The Congress will work by: a) plenary meetings during which well known haematologists will lecture on subjects of their own choice; b) symposia organized under the supervision of a moderator with invited speakers; and c) free communications on the topics treated at the symposia.

Main Subjects:
1. Ultra-structure and cytochemistry: a) ultra-structure (moderator: M. Bessis); b) chromosomes (moderator: G. Astaldi); c) qualitative cytochemistry (moderator: H. Merker); d) quantitative cytochemistry (moderator: B. Thorell).
5. Enzymes pertaining to the haemoglobin synthesis (moderator: L. Eriksen).
6. Erythroenzymopathies: a) glucose-6-phosphate dehydrogenase and correlated deficiencies (moderator: A. Szeinberg); b) other erythroenzymopathies (moderator: T. J. Prankerd).
7. Parasitic anaemias (moderator: M. Jamra).
12. Immuno-haematology: a) erythrocytes (moderator: H. Schubot He); b) leukocytes (moderator: J. Dausset); c) platelets (moderator: P. A. Miescher).
15. Fibrinolysis (moderator: E. Deutsch).
16. Radio isotopes in haematology: a) chromium (moderator: A. M. Baptista); b) iron (moderator: M. C. Verlooy); c) vitamin B12 (moderator: D. L. Molin); d) tritium (moderator: T. Fliedner).
20. Characterization of blood group antigens by serological and immuno-chemical methods (organized by the International Society for Blood Transfusion (moderators: J. J. van Loghem and J. Moullec). For all further information and registration apply to Dr. F. Parreira, Section of Haematology, Institute of Tropical Medicine, Lisbon 3, Portugal.
