Recent Articles in Ageing Research

List No. 9, collected September-October, 1973

As a regular feature of Gerontologia, the Editors publish in each issue a selection of recent articles in all fields of ageing research covered by this journal, appearing in other journals in this field and in some multi-disciplinary journals generally accessible to most readers. This selection does not intend to be complete, but to present articles which in the opinion of the Editors will be of interest to our readers. The Editors are responsible for the selection, but invite readers to bring to their attention articles which they think should be included in the next list.

The articles are ordered alphabetically under the following subject headings: (1) general, (2) biochemistry, (3) metabolism, (4) cell culture, (5) physiology and cell biology, (6) immunology, (7) histology, cytology and comparative anatomy, (8) pharmacology, (9) longevity, populations, genetics, (10) plants, (11) psychology and behaviour.

**Biochemistry**

**Cell Culture**
