Recent Articles in Ageing Research

List No. 13, collected August-October 1974

As a regular feature of Gerontología, the Editors publish in each issue a selection of recent articles in all fields of ageing research covered by this journal, appearing in other journals in this field and in some multi-disciplinary journals generally accessible to most readers. This selection does not intend to be complete, but to present articles which, in the opinion of the Editors will be of interest to our readers. The Editors are responsible for the selection, but invite readers to bring to their attention articles which they think should be included in the next list.

The articles are ordered alphabetically under the following subject headings: (1) General, (2) Biochemistry, (3) Metabolism, (4) Cell Culture, (5) Physiology and Cell Biology, (6) Immunology, (7) Histology, Cytology, Comparative Anatomy, (8) Pharmacology, (9) Longevity, Populations, Genetics, (10) Plants, and (11) Psychology and Behaviour.

Recent Articles in Ageing Research

Metabolism Obenrader, M.; Chen, J.; Ove, P., and Lansing, A. I.: Etiology of increased albumin

Pharmacology

Longevity, Populations and Genetics

Plants

Psychology and Behaviour
Clement, F. J.: Longitudinal and cross-sectional assessments of age changes in physical strength as related to sex, social class and mental ability. J. Geront. 29:423-429 (1974).
