Recent Articles in Experimental Ageing Research

List No. 42, collected March to May 1984

As a regular feature of Gerontology, the editors publish a selection of recent articles in all fields of ageing research covered in the Experimental Section of this journal, appearing in other journals in this field and found in the Life Sciences Edition of Current Contents. The selection does not claim to be complete, but to notify our readers of articles which, in the opinion of the editors, will be of interest to those engaged in experimental gerontology. Readers are warmly invited to bring to the attention of the editors articles which they wish to have included in the next list.

The articles are ordered alphabetically by the first author under the following subject headings:

1. General, Theories
2. Biochemistry, Biophysics and Molecular Biology
3. Metabolism
4. Cell Biology
5. Cell and Organ Culture
6. Physiology
7. Immunology
8. Endocrinology
9. Pharmacology
10. Neurosciences
11. Behavioral Sciences
12. Genetics
13. Lifespan, Longevity, Population Studies
14. Anatomy, Morphology, Histology
15. Nutrition
16. Plant Sciences
