Contents, Vol. 15, No. 1, 1985

Numbers (1.1 – 7.9) refer to the topics and subtopics. Numbers 1.1.1 – 7.9.3, represent the numbers of the individual abstracts.

0. RELEVANCY OF HEMOSTASEOLOGICAL TEST RESULTS
   0.1 Reliability and Predictability of Clinical and Laboratory Findings
   0.2 Hemostasis as a Protective Feedback Mechanism
   0.3 DICFS: Significance of Laboratory Findings and Importance of Extravascular Compartments for the Diagnosis of DICFS
   0.4 Alexander Schmidt Memorial Lecture

1. RATIONAL TREATMENT OF HEMORRHAGIC DIATHESIS (1.0 – 1.4)
   Introduction: Management of Hemophilia
   Production of Virus-Inactivated Plasma Derivatives, Biochemistry of Factor VIII Complex
   Side Effects of Substitution Therapy with Plasma Derivatives
   Therapy Regimens for the Treatment of Inherited Coagulopathies
   Treatment of Thrombocytopenia and Therapy with DDAVP

2. FIBRINOLYTIC THERAPY AND PROPHYLAXIS OF THROMBOEMBOLIC COMPLICATIONS: CLINICAL AND ANIMAL STUDIES (2.0 – 2.5)
   Introduction: Fibrinolytic Therapy Today
   Therapeutic Strategies with Activators of the Fibrinolytic System
   Experimental Basis and Clinical Application of Heparin Fractions
   Platelets, Microcirculation and Thromboembolic Risk
   Animal Studies on Thrombogenesis and the Pathogenesis of DIC
   Animal Studies of Antithrombotic Properties of Drugs

3. ACQUIRED DISORDERS OF HEMOSTASIS IN CHILDREN (3.1 – 3.2)
   Onco-Hemostaseology and Bleeding Complications
   Vitamin K Deficiency

4. PHARMACEUTICAL SIDE EFFECTS AND HEMOSTASIS (4.1 – 4.2)
   Laboratory Monitoring of Therapeutic Effectiveness
   Bleeding Complications in Anticoagulant and Fibrinolytic Therapy
   Hemostasis and Pharmaceutical Side Effects
   Introduction: Biochemistry of Secretion
   The Activated Platelet
   Platelet Functions and Platelet Membrane Receptors
   Standardization of Platelet Function Tests and Physical Basis of Hemostaseological Diagnosis

5. PLATELETS: MORPHOLOGY AND FUNCTION (5.0-5.4)
   Introduction: Biochemistry of Secretion
   The Activated Platelet
   Platelet Functions and Platelet Membrane Receptors
   Standardization of Platelet Function Tests and Physical Basis of Hemostaseological Diagnosis

6. INTERACTION OF THE HEMOSTATIC SYSTEM WITH FOREIGN SURFACES (6.1)
Biocompatibility and Extracorporeal Circulation 6.1.1
Contact Activation of the Hemostatic System 6.2.1

7. BASIS AND PRACTICE OF LABORATORY ANALYSIS (7.1
The Activated Hemostatic System 7.1.1
Strategies and Studies of the Diagnostic Effectiveness 7.2.1
Standardization of Photometric Assays 7.3.1
Standardization of Classical Coagulation Tests (Bioassays) 7.4.1
Structure and Function of Fibrinogen 7.5.1
Activation of Plasminogen and Fibrinolysis 7.6.1
Antithrombin III and Regulatory Functions of Inhibitors 7.7.1
Protein C and Protein S 7.8.1
Immunological System and Hemostasis 7.9.1
