The Royal Society, London
Dr. J. H. Humphrey has been elected a Fellow of the Royal Society in recognition of his outstanding contributions to experimental immunology, which range from the release of histamine and serotonin in antigen-antibody reactions, the mechanisms of hypersensitivity and the synthesis of y-globulin and antibody, to capillary permeability at antigen-antibody reaction sites.

Dr. Humphrey is head of the Division of Immunology at the National Institute for Medical Research, London, and is a Member of the Collegium Internationale Allergologicum.

International Archives of Allergy and Applied Immunology
Dr. Howard C. Goodman, Head of the Immunological Department of the National Institute of Allergy and Infectious Diseases, Bethesda, Maryland (present address: Immunology Unit, World Health Organization, Palais des Nations, Geneva, Switzerland) has agreed to serve as joint Editor-in-Chief of the ‘International Archives of Allergy and Applied Immunology’ as from December 1st, 1963.

Monographs in Allergy
S. Karger Basel/New York announce a new Series in the English language, entitled ‘Monographs in Allergy’ edited by H. C. Goodman, Geneva; T. Inderbitzin, Boston, Mass.; P. Kallós, Hälsingborg. The aim of the new Series is to publish complete and concise reviews on timely subjects in the entire field of Allergy, by active workers. The Monographs should be published about 3 months from the submission of the final manuscript.

Asthmatic Children’s Foundation
The Journal of the Children’s Asthma Research Institute and Hospital has been discontinued. The Foundation will support the publication of a new journal, the ‘Journal of Asthma Research’. Editor-in-Chief of the ‘Journal of Asthma Research’ is Dr. Harold A. Abramson, 133 E., 58th Street, Room 310, New York City.
