Lonidamine: A New Pharmacological Approach to the Study and Control of Spermatogenesis and Tumors
Editors: B. Silvestrini and A. Caputo, Rome

The following is a list of corrections made after the publication of this supplement.

Introduction: p. 8, 'Fabrini' should read 'Fabbrini'.

Paper by Bruno Silvestrini: p. 9, figure 1, the chemical structure to the right in bold print should be deleted and be included as part of figure 3 (p. 10).

Paper by C. De Martino et al.: p. 27, the name 'Malconi' (co-author) should read 'Malorni'.

P. 30, figure 4 should read figure 5, and figure 5 should read figure 4. In the legend the word (asterisks) follows the number (4) and not (5).

Paper by A. Floridi et al.: p. 53, the symbol for the compound AF 1312/TS must be in bold print in figures 1, 2, and 3.

Paper by Giorgio Segre et al.: p. 77, under 'Materials and Methods' line 4 should read '... dissolved in water as lysine salt; was also used for i.v. administrations. Lonidamine levels have been determined by fluorimetry ...'.

Under 'Results', p. 77-79, the word 'bioexponential' should read 'biexponential'.

P. 79, figure 5, the symbols should be as follows: oral (o) and intravenous (•) administration.

P. 81, figure 12, please delete the words 'and kidneys'.

Paper by R. Heywood et al.: p. 91-97. All references made to 'tolnidamide' are incorrect. The word should read 'tolnidamine'.
