Subject Index

Acute exacerbation 55
Anaerobe 2
Antibacterial 2
Arterial oxygen pressure 14
Asymptomatic bacteriuria 20
Bactericidal activity 2
Bone marrow transplantation 34
Chronic respiratory infection 55
Combination therapy 60
Complicated urinary tract infection 60
Co-Trimoxazole 20
Diffuse panbronchiolitis 55
DNAgyrase 2
Elderly 14, 49
- subjects 20
Fluoroquinolone 2, 40
Geriatrics 49
Helper/suppressor T cell ratio 14
High-pressure liquid chromatography 40
Immunocompetence 40
Infections 34
Interleukin-2 14 Isepamicin 60 Long-term effect 55 Medical costs 55 Multivalent metal ions 2
Mutational resistance 2 Natural killer cells 14 Neutropenic patients 26 Ofloxacin 14, 20, 26, 40, 49, 55, 60 Pharmacokinetics 20 Pneumonia 49 Prophylaxis 26 Quinolone(s) 2, 34 4-Quinolone 2
Respiratory infection 14 Skin infection 49 Sulfamethoxazole 40 Supercoiling 2 Superoxide production 14 Trimethoprim 40 Urinary infection 49
