Prof. Curzon: Ladies and gentlemen, may we continue with the next presentation. This paper on ‘Behavioural Aspects of Dietary Habits and Dental Caries’ will be given by Prof. Birkhed. The chairman of the session and the workshop is Dr. Herluf Birn from the Dental School at Aarhus in Denmark. It is my pleasure to call upon Dr. Birn to continue the session.

Dr. Birn: It is my pleasure to ask Prof. Birkhed to present his paper to open this workshop. I am glad to introduce the next speaker

Dr. Birkhed. You have read his paper and you can see from the references that Dr. Birkhed knows a lot about the topic he is going to talk about

‘Behavioural Aspects of Dietary Habits and Dental Caries’.
