Erratum

In the article entitled ‘Artificial Pitch Changing in Auditory Feedback as a Possible Method in Voice Training and Therapy’, published in Folia Phoniatrica et Logopaedica (1994;46:86-96), the author has unfortunately forgotten to mention that the signal analysis system ISA (Intelligent Speech Analyser) was developed by Raimo Toivonen, MSc (Eng) and would like to apologize for this omission. All the Fo histograms in the figures were made with ISA.
