W.H.		Struben

Rotterdam

Authors' address: Prof. Dr.W. H. Struben, Ziekenhuis Dijkzigt, Dr. Molewaterplein 40, Rotterdam (Netherlands)

After a description of the classification of oesophageal diverticula the localisation, aetiology, symptomatology, diagnosis and complications of the Zenker diverticulum are discussed. With regard to treatment, special attention is invited for Dohlmar's endoscopic procedure. The results obtained in seven patients operated upon in that manner are described.
