Abstracts from the 21st International Congress on Thrombosis
The Start of a New Era for Antithrombotic Agents

Milan, Italy, July 6–9, 2010

Guest Editor
P.M. Mannucci, Milan, Italy
This publication has been produced by the Organizers of the 21st International Congress on Thrombosis

P17 New antiplatelet agents: why they are badly needed by the cardiologist
P. A. Merlini, Italy

P18 Is aspirin less effective in patients with diabetes?
S. Coccheri, Italy

P19 Which antithrombotic and antiplatelet therapies in the ambulance for acute coronary syndrome?
M. Tubaro, Italy

P20 Biomarkers for the diagnosis of venous thromboembolism
A. Perrier, Switzerland

P21 Cerebral vein thrombosis
J. Ferro, Portugal

P22 Moderate hyperhomocysteinemia: marker or cause of a disease?
R. Abbate, Italy

P23 Pharmacoepidemiology of gastrointestinal bleeding complications of antiplatelet agents
A. Lanas, Spain

P24 Antithrombotic agents after vascular surgery
D. Bergqvist, Sweden

P25 What is new on the clinical aspects of fibrinolysis and thrombolysis?
J. A. Páramo, Spain

P26 Thromboprophylaxis in ‘minor’ orthopedic surgery
H. Bounameaux, Switzerland

P27 Highlights of the 5th International Conference on Thrombosis and Hemostasis Issues in Cancer (ICTHIC) 2010
A. Falanga, Italy

P28 A renaissance of the contact phase of blood coagulation.
U. Seligsohn, Israel

P29 News on the anticoagulant pathway of blood coagulation.
J. Corral, Spain

Debates

P32 Is it clinically useful to extend to the calf the ultrasound examination of deep leg veins? Yes/No
S. M. Schellong (Germany) vs G. Palareti (Italy)

P34 Variable antiplatelet response to thyenopiridines: should we use lab tests? Yes/No
J. F. Collet (France) vs B. Rocca (Italy)

P36 Thromboembolic pulmonary hypertension (CTEPH). Early surgery or watchful waiting?
A. M. D’Armini (Italy) vs F. Piovella (Italy)
Lectures

P41 Role of statins and exercise on vulnerable plaques
C. Liapis, Greece

P42 Thrombosis in neonates and children: What do we know - where to go?
U. Nowack-Göttl, Germany

P43 Adjunctive antithrombotic agents to amplify thrombolysis in ischemic stroke
J. Grotta, USA

P44 Discovery of quantitative traits loci for platelets
W. Ouwehand, UK

P45 The future of anticoagulant therapy
G. Agnelli, Italy

P46 The role of tissue factor in coronary artery disease
T.F Lüscher, Switzerland

Joint Symposium

Grupo Cooperativo Latinoamericano de Hemostasia y Trombosis (CLAHT) and Mediterranean League Against Thromboembolic Diseases (MLTD)

Advances in thrombosis

P49 What is new on the antiphospholipid syndrome criteria
R. Forastiero, Argentina

P50 Thrombotic complications in the treatment of patients with bleeding disorders
M. Mijares, Venezuela

P51 A multicentre randomised study of computer-assisted oral anticoagulant dosage versus medical staff dosage
L. Poller, UK

P52 Thrombosis prophylaxis in the ambulatory cancer patient: approaches to identifying the high risk patient
K. Bauer, USA

Symposia

Venous thromboembolism (VTE) in special clinical conditions: natural history

P53 Hormonal contraceptives, hormone-replacement therapy and thromboembolism
B. Brenner, Israel

P54 Venous thromboembolism (VTE) in the very elderly
A. Leizorovicz, France

P55 Venous thromboembolism (VTE) in the very young
M. Monreal, Spain
Advances in peripheral arterial disease

P56  Peripheral arterial disease in the spectrum of atherothrombosis
     G.D.O. Lowe, UK

P57  Asymptomatic peripheral arterial disease: impact on clinical practice
     F. Violi, Italy

P58  Antiplatelet treatment
     G. Y. Lip, UK

Genomewide association studies

P59  Stroke
     M. Breteler, the Netherlands

P60  Lessons from genome wide association studies in venous thrombosis
     P. Morange, France

P61  Mapping genes for plasma lipids and myocardial infarction in humans
     S. Kathiresan, USA

New anticoagulants: highlights on methodological issues

P62  Lack of standardization between antithrombotic trials in orthopedics: the scenario
     O.E. Dahl, Norway

P63  Methodological issues in trials assessing primary prophylaxis of venous thromboembolism
     C.M. Samama, France

P64  Make clinical studies in medical patients closer to usual hospital care
     J. Harenberg, Germany

P65  Guidelines on clinical testing of new antithrombotic drugs in surgical patients
     A.K. Kakkar, UK

Therapeutic advances in stroke

P66  Thrombolysis in acute stroke: present evidences and future perspectives
     D. Toni, Italy

P67  Secondary prevention of cerebral ischemia of arterial origin
     A. Algra, the Netherlands

P68  Secondary prevention of cardioembolic stroke: old and new drugs
     J. Ferro, Portugal

Platelets and inflammation

P69  Platelets and atherosclerosis
     M. Gawaz, Germany

Foreword

Pier Mannuccio Mannucci

Together with the members of the various Committees that have tremendously helped me (Executive Committee, International Committee, Advisory Committee and the Mediterranean League Council), I present you this Supplement of Pathophysiology of Thrombosis and Haemostasis, which contains the abstracts of the 21st International Thrombosis Congress, which I am organizing on behalf of the Mediterranean League against Thromboembolic Diseases.

I must admit that our main problem was one of abundance. We received as many as 643 submitted abstracts from 57 countries and the 5 continents: a record in the history of the MLTD Congresses! This abundance was not anticipated (only 255 abstracts were submitted for the 20th Congress in Athens two years ago). Hence, we have originally allotted a too limited space to oral communications and posters, by giving most of the space to invited Symposia, Lectures and Debates.

Each submitted abstract was evaluated by at least 3 reviewers and their ranking was the basis for the choice of their presentation as oral communications (only 14%) or poster.

Having said this as a preamble, we hope that this Book of Abstracts is satisfactory. The main topics are the new anticoagulant and antiplatelet agents, and venous thromboembolism prevails among the three most frequent thromboembolic diseases, even though coronary artery and cerebrovascular diseases are also well featured in the abstracts.

The Satellite events organized in collaboration with the pharmaceutical industry feature new drugs and new reagents and contribute substantially to the scientific quality of this publication, at this time of rapidly expanding availability of new weapons in the fight against thrombosis.

Finally, I want to express my thanks and gratitude to Silvia Malosio and Viviana Quaroni, who did a monumental job in collecting the abstracts published in this Supplement of Pathophysiology of Haemostasis and Thrombosis, the official Journal of the League.

Pier Mannuccio Mannucci
Guest Editor
