Subject Index

Aeroallergens, see Inhalant allergens
Air pollution, atopic dermatitis risks 18
Alefacept, systemic therapy 126, 127
Allergic contact dermatitis, role in atopic dermatitis 139–141
Allergic sensitization, atopic dermatitis association
   adults 14
   children 11–14
Anaphylaxis
   management in food allergy 76
   platelet-activating factor role 71
Anesthetics, topical therapy 111
Atopic eczema/dermatitis syndrome (AEDS) 2
Atopic march 82, 83
Atopy patch test (APT)
   aeroallergens 83, 84
   food allergy 70, 71
Azathioprine, systemic therapy 115, 116, 122, 123
Basiliximab, systemic therapy 127
Brain-derived neurotrophic factor (BDNF),
   levels in atopic dermatitis 47, 57, 58
Breastfeeding, atopic dermatitis protection 16, 17
Calcineurin inhibitors, topical therapy 108–110
Candidate gene, atopic dermatitis studies 23,
   25–32
Cannabinoid receptor agonists, topical therapy 111
Classification, atopic dermatitis
   allergic sensitization modes 1, 2
   genetic factors and phenotypes 2–4
Clinical features
   atopic dermatitis 4–8
   occupational contact dermatitis in atopic dermatitis 141, 142
COL29A1, epidermal barrier function 41
Contact dermatitis, see Allergic contact dermatitis; Occupational contact dermatitis
Coping, atopic dermatitis 52
Corticosteroids
   systemic therapy 114, 117
   topical therapy
      acute flare management 106
      additive agents 107, 108
      effectiveness 104
      finger-tip unit 105, 106
      frequency of application 106, 107
      occupational contact dermatitis management 143
      relapse prevention 107
      side effects 104, 105
      strength by type 103, 104
      summary 108
      wet wrap use 107
Cyclosporine, systemic therapy 115, 116, 118–121
Defensins, skin 92, 93
Dendritic cell (DC)
   classification 44
   dysfunction in atopic dermatitis 44, 45
Dermatology life quality index (DLQI) 52
Differential diagnosis, atopic dermatitis 8, 9
Double-blind placebo-controlled food challenge (DBPCFC), food allergy 71
Educational programs, atopic dermatitis
Germany
  content 152–155
  German Atopic Dermatitis Intervention Study 53, 54, 150, 155, 156
  structure of program 152
  goals 151, 152
  overview 149, 150
  theoretical framework 150, 151
Efalizumab, systemic therapy 127
Elimination diet, food allergy 71
EMSY, susceptibility locus for atopic dermatitis 40
Epidemiology, atopic dermatitis 11–18, 82
Epidermal barrier
  dysfunction in Staphylococcus aureus colonization 91
  pathophysiology of atopic dermatitis 40, 41
Etanercept, systemic therapy 126
Extracorporeal photochemotherapy (ECP), atopic dermatitis 118
Extrinsic atopic dermatitis 1, 2
Filaggrin
  clinical significance of mutations 32–33
  epidermal barrier function 41
  mutations in atopic dermatitis 14, 29–31, 41, 138
Finger-tip unit (FTU), topical therapy dosing 105, 106
Food allergy
  atopic dermatitis association 16, 72–74
  classification 64
  elimination diet and food challenge studies 71, 72
  epidemiology 67, 68
  management 74, 75
  pathogenesis 64–67
  testing 68–71
Genetics, atopic dermatitis 14, 21–33, 39, 40
Genome-wide association study, atopic dermatitis 23–25, 32
German Atopic Dermatitis Intervention Study, see Educational programs
Glucocorticoids, see Corticosteroids
Heritability, atopic dermatitis 22, 23, 39, 40
House dust mite, see Inhalant allergens
Hypnosis, atopic dermatitis management 53
Immunoglobulin E (IgE), autoreactivity in atopic dermatitis 46
Infection, see also Staphylococcus aureus
  fungal infection in atopic dermatitis 98
  healthy skin microorganisms 90
  viral infection in atopic dermatitis 97, 98
Infliximab, systemic therapy 126
Inhalant allergens
  role in atopic dermatitis 15, 16, 83, 84
  specific immunotherapy 85, 86
  therapeutic intervention 84, 85
Innate immunity, atopic dermatitis dysfunction 42, 43, 92, 93
Interferon therapy, atopic dermatitis 127
Interleukin-31 (IL-31)
  dysfunction in atopic dermatitis 46
  levels in atopic dermatitis 57, 59–61
Intravenous immune globulin, atopic dermatitis studies 127
Intrinsic atopic dermatitis 1
Itch, see Pruritus
Leflunomide, systemic therapy 125
Mast cell, itch role 59
Mediterranean diet, atopic dermatitis protection 17
Methotrexate, systemic therapy 115, 116, 121, 122
Mold, atopic dermatitis risks 17, 18
Mycophenolate mofetil, systemic therapy 115, 116, 124, 125
Nerve growth factor (NGF), levels in atopic dermatitis 47, 57–59
Neuroimmunology, atopic dermatitis
  eosinophil function 58, 59
  neuronal network 56, 57
  neurotrophins 47, 57–59
Neurotrophin-3 (NT-3), levels in atopic dermatitis 47, 57–59
Neurotrophin-4 (NT-4), levels in atopic dermatitis 57, 58
Occupational contact dermatitis
  allergic contact dermatitis role in atopic dermatitis 139–141
  clinical presentation in atopic dermatitis 141, 142
  management in atopic dermatitis 143
pathogenesis in patients with atopic dermatitis 137–139
prevention 143–146
risk factors 134–137
Omalizumab, systemic therapy 125, 126
Oral tolerance, barrier breaches 65, 66
Pets, atopic dermatitis risks 17
Phototherapy, atopic dermatitis 117, 118
Pimecrolimus, topical therapy 108–110
Platelet-activating factor (PAF), anaphylaxis role 71
Pollen, see Inhalant allergens
Probiotics, atopic dermatitis protection 17
Pruritis
interleukin-31 role 59–61
mast cell role 59
pathophysiology 46, 47
topical therapy 111
Psychological factors, atopic dermatitis
coping 52
 diagnostic tools 51, 52
 educational programs 53, 54
 psychoneuroimmunological mechanisms 50, 51
 psychosomatic therapy 52
 psychotherapy 53
Psychosomatic therapy, atopic dermatitis 52
Psychotherapy, atopic dermatitis 53
Questionnaire on experience with skin complaints (QES) 52
Relaxation therapy, atopic dermatitis 53
Risk factors, atopic dermatitis 11–18
Rituximab, systemic therapy 127
Rosiglitazone, atopic dermatitis studies 128
Skin, see Epidermal barrier; Topical treatment
Skin prick test (SPT)
aeroallergens 83, 84
food allergy 69–71
Smoking, atopic dermatitis risks 18
Social Learning Theory (SLT) 150, 151
Specific immunotherapy (SIT), inhalant allergy 85, 86
Staphylococcus aureus colonization factors
adherence 91, 92
immune response defects 92–94
skin barrier dysfunction 91
skin lipid content 92
colonization in atopic dermatitis 45, 46, 91, 94, 95
secondary infection in atopic dermatitis 95
therapeutic recommendations 95, 96, 107, 108
Stress, atopic dermatitis association 47
Substance P (SP), levels in atopic dermatitis 47
T cell
atopic dermatitis pathophysiology 45
homing in food allergy 66
Staphylococcus aureus colonization defense 93, 94
Tacrolimus, topical therapy 108–110
Toll-like receptors (TLRs)
TLR2 polymorphisms in atopic dermatitis 43, 93
TLR9 polymorphisms in atopic dermatitis 43
Topical treatment, atopic dermatitis
 basic skin care 101, 102
calcineurin inhibitors 108–110
corticosteroids
 acute flare management 106
 addictive agents 107, 108
effectiveness 104
finger-tip unit 105, 106
frequency of application 106, 107
relapse prevention 107
side effects 104, 105
strength by type 103, 104
summary 108
wet wrap use 107
pruritis
anesthetics 111
cannabinoid receptor agonists 111
urea 110
wet wrap therapy 102, 103, 107
Trier Scales of Coping (TSK) 52
Twin studies, atopic dermatitis 22, 39
Ultraviolet light phototherapy, atopic dermatitis 117, 118
Urea, topical therapy 110
Vitamin D, supplementation studies 128
Wet wrap therapy, atopic dermatitis 102, 103, 107
