    epidermis 21, 22
  Dark skin, see Skin color
  Dermatoheliosis, see Photoaging
  Diode laser, acne management 143
  DNA ultraviolet absorption 25
Dyschromia, management in photoaging  125, 126

Efornithine, hair removal  119

Ephelides, management  89

Er:YAG laser, skin tightening  148

Ethnicity, see Skin color

Facial telangiectasia, management  74, 75, 77

Fibroblast, light interactions  174

Fitzpatrick phototypes, skin  153, 154, 167

Fractional photothermolysis
  ablative fractional photothermolysis
    histological damage pattern and healing course  63, 64
    indications  63, 64
    side effects  64, 65
    technical data  62, 63
  microscopic treatment zone  57–59
  non-ablative fractional photothermolysis
    histological damage pattern and healing course  59–61
    historical perspective  58
    indications  60, 61
    lasers  59
    side effects  61, 62
    technical data  58, 59
  overview  11, 56–58
  photoaging management  123, 124
  scar treatment
    atrophic scars  137
    hypertrophic scars and keloids  135, 136
    selection of ablative versus non-ablative device  65

Freckles, see Ephelides

Hair loss
  at-home devices for treatment  164
  medical therapy  164

HairMax LaserComb, hair loss treatment  164

Hair removal
  benefits of laser hair removal  114–116
  complications of laser hair removal  119
  dark skin precautions  156–158
  devices
    alexandrite laser  117
    at-home devices  162, 163
    intense pulsed light  118, 169, 170
    Nd:YAG laser  118
    pulsed dye laser  117
    ruby laser  116, 117
  selection factors for hirsute patients  118
    efornithine  119
    intense pulsed light  169, 170
    mechanisms of laser hair removal  112, 113
    overview  111, 112
    permanent hair reduction definition  115
    short-term efficacy  116, 120
    temporary hair loss definition  116
    treatment parameters  113, 114

Hemangioma
  infantile hemangioma management  73, 74, 77
  lasers for management
    continuous wave versus quasi-continuous wave lasers  68, 70, 71
    infrared lasers
      alexandrite laser  72
      Nd:YAG laser  72
    intense pulsed light  71, 72
    overview  68–70
    pulsed dye laser  71
    lobular capillary hemangioma management  75
    photodynamic therapy  72, 73

Hemoglobin, absorption characteristics  17, 67

Hirsutism, see Hair removal

Hypertrichosis, see Hair removal

Hypertrophic scar, see Scar

Intense pulsed light
  acne management  143, 162, 170
  devices  167
  hair removal  118, 169, 170
  historical perspective  166, 167
  non-ablative dermal remodeling  48, 51, 52
  overview  10, 11
  photoaging management  170, 171
  pigmented lesion management  168
  safety
    melanocytic lesion precautions  168, 169
    side effects and prevention  167
    skin types and sun exposure  167
    tattoo removal  169
    vascular lesion management  68, 69, 71, 167, 168

Intensity, laser light  10

Keloid, see Scar
