Disclaimer

Pfizer initiated and funded the Expert Conference on Developments in Idiopathic Short Stature (ISS); however, the organization of the program and content were developed by a Scientific Board (the Board).

The Board is comprised of specialists who provide scientific and planning oversight for the overall Program. Specifically, the Board develops the scientific program content. Its members are recognized authorities in the field of endocrinology and rheumatology.

The presenters received payment from Pfizer for their presentations, but Pfizer has not had any editorial control over the content. The content of the Conference reflects the scientific opinions of the individual presenters and may not necessarily reflect the opinion of Pfizer, or any of its subsidiaries, partners or employees.
