Sexual Dysfunction: Beyond the Brain-Body Connection

Richard Balon

During the last years human sexuality has been the focus of interest and study by various disciplines. In this volume a multidisciplinary team of international experts discuss contemporary issues of human sexuality from updates on diagnosis to the management of various sexual dysfunctions. Reviews of the management of several female sexual dysfunctions, the impact of cancer on sexual functioning, the impact of trauma on sexual desire and function as well as the newest trends in sex therapy; androgen deprivation treatment of sexual behavior and autogynephilia are discussed in detail. Further, the complex interplay between the field of human sexuality and the Internet, psychological and cultural aspects of infertility are reviewed. A large amount of clinical material on topics rarely covered in other volumes will prove the impact of sexual trauma on sexual desire and function; McCarty, E.; Parry, E.

Contents

Update on Diagnoses of Sexual Dysfunctions: Controversies Surrounding the Proposed Revisions of Existing Diagnostic Entities and Proposed New Diagnoses: Balon, R.; Win, T.H.

Sexual Desire and Arousal Disorders in Women: Lam, C.; Roth, S.

Female Orgasmic Disorder: Molina, D.; Clifton, J.

Developments and Trends in Sex Therapy: Meine, M.; Jones, S.

The Impact of Cancer on Sexual Function: Moro, M.

The Impact of Sexual Trauma on Sexual Desire and Function: McCarty, E.; Parry, E.

The Complexity of Internet Sexuality: Dannals, R.; Ross, M.W.

Autogynephilia: An Underappreciated Paraphilia: Lawrence, A.A.

Androgen Deprivation Treatment of Sexual Behavior: Houts, F.W.; Taller, I.; Tucker, D.C.; Berlin, F.S.

Psychological and Cross-Cultural Aspects in Infertility and Human Sexuality: Pecharo Palha, A.; Luzencza, M.F.

79 Is the Presence or Absence of Tumour Necrosis a Significant Predictor of Survival in Renal Cell Cancer? Quyyumi, T.; McCollie, P.A.; Guing, J.; Orange, C.; Seywright, M.; Atchison, M.A.; Edwards, J. (Glasgow)

95 Effects of YC-1 on Hypoxia-Inducible Factor 1 Alpha in Hypoxic Human Bladder Transitional Cell Carcinoma Line T24 Cells Li, Y.; Zhao, X. (Shanghai); Tang, H. (Shanghai); Zhong, X.; Zhang, L.; Xu, L.; Li, S.; Wang, Y. (Changsha)

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/uin
or as e-mail attachment (the preferred word-processing package is MS-Word) to the Editorial Office:
uin@karger.ch
S. Karger AG
Editorial Office 'Urologia Internationalis'
P.O. Box
CH–4009 Basel (Switzerland)
Tel. +41 61 306 1424
Fax +41 61 306 1434

The manuscripts should be accompanied by a signed cover letter addressing the points below. A signed copyright trans- 
fer statement is required upon acceptance (please see submission website).

Conditions
All manuscripts are subject to peer review. Manuscripts are received with the explicit understanding that they are not 
under simultaneous consideration by any other publication. Submission of an article for publication implies the 
transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent 
property of 'Urologia Internationalis' and may not be re-produced by any means, in whole or in part, without the 
written consent of the publisher. It is the author's responsi-

bility to obtain permission to reproduce illustrations, ta-
bles, etc. from other publications.

Cover Letter
It must include statements on the following points:
1. All authors have made a significant contribution to the findings and methods in the paper.
2. All authors have read and approved the final draft.
3. Financial or commercial interest must be acknow-
ledged.
4. The work has not already been published and has not 
been submitted simultaneously to any other journal.
5. The corresponding author takes on the above responsi-

bilities with his/her signature.

Arrangement
Title page: The first page of each paper should indicate the 
title, the authors' names, the institute where the work was 
conducted. In addition, the following should be put on the title page:
1. Short title for use as running head
2. A list of 3–10 key words for indexing purposes is essen-
tial
3. Corresponding author: One of the authors has to be 
indicated as the corresponding author. The full name and 
complete mailing address, e-mail address, as well as 
phone and fax numbers of that individual to whom cor-
respondence, proofs, and requests for reprints should be 
addressed, must be given at the bottom of the title page.

Abstract: Each paper must have a structured abstract (In-
troduction, Materials and Methods, Results and Conclu-
sions) of up to 20 lines (approximately 150 words). Ab-
stracts of case reports need not be structured.

Footnotes: Avoid footnotes. When essential, they are num-
bered consecutively and typed at the foot of the appro-
riate page.

Tables and illustrations: Tables and illustrations (both num-
bered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also 
prepared on a separate page. For technical reasons, figures 
with a screen background should not be submitted. When 
possible, group several illustrations on one block for repro-
duction (max. size 180 × 223 mm) or provide crop marks. 
Electronically submitted b/w half-tone and color illustra-
tions must have a final resolution of 300 dpi after scaling, 
line drawings one of 800–1200 dpi. Figure files must not 
be embedded in a document file but submitted separately 
(for detailed instructions, see http://www.karger.com/uin).

Case Reports should include the most important clinical 
details and not exceed 1,000 words. One table and two fig-
ures may be included. References should be limited to ten.

Letters to the Editor must include matters of interest to urol-
ogists and not exceed 500 words.

Color illustrations
Online edition: Color illustrations are reproduced free of 
charge. In the print version, the illustrations are reproduced 
in black and white. Please avoid referring to the colors in 
the text and figure legends.

Print edition: Up to 6 color illustrations per page can be 
integrated within the text at CHF 800.– per page.

References: In the text identify references by Arabic numer-
aIs (in square brackets). Material submitted for publication 
but not yet accepted should be noted as 'unpublished data' 
and not be included in the reference list. The list of ref-
ences should include only those publications which are 
cited in the text. Do not alphabetize: number references in 
the order in which they are first mentioned in the text.
The surnames of the authors followed by initials should be 
given. There should be no punctuation other than a comma to 
separate the authors. Preferably, please cite all authors. Ab-

breviate journal names according to the Index Medicus sys-
tem. Also see International Committee of Medical Journal 
Editors: Uniform requirements for manuscripts submitted 
to biomedical journals (www.icmje.org).

Examples
(a) Papers published in periodicals: Sun J, Koto H, Chung 
KF: Interaction of ozone and allergen challenges on bron-
chial responsiveness and inflammation in sensitised guinea 

(b) Papers published only with DOI numbers: Theoharides 
TC, Boucher W, Spear K: Serum inter-
leukin-6 reflects disease severity and osteoporosis in 
mastocytosis patients. Int Arch Allergy Immunol 
DOI: 10.1159/000063585.
(c) Monographs: Matthews DE, Farewell VT: Using and Un-
derstanding Medical Statistics, ed 3, revised. Basel, Karger, 
1996.
(d) Edited books: Parren PWH, Burton DR: Antibodies 
against HIV-1 from phage display libraries: Mapping of an 
immune response and progress towards antiviral immuno-
therapy; in Capra JD (ed): Antibody Engineering. Chem 

Reference Management Software: Use of EndNote is rec-
mended for easy management and formatting of citations 
and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers 
for articles. A DOI number will be printed on the title page 
of each article. DOIs can be useful in the future for identi-
fying and citing articles published online without volume 
or issue information. More information can be found at 

Supplementary Material
Supplementary material is restricted to additional data that 
are not necessary for the scientific integrity and conclu-
sions of the paper. Please note that all supplementary 
files will undergo editorial review and should be submitted to-
gether with the original manuscript. The Editors reserve 
the right to limit the scope and length of the supplementary 
material. Supplementary material must meet production 
quality standards for Web publication without the need 
for any modification or editing. In general, supplementary 
files should not exceed 10 MB in size. All figures and tables 
should have titles and legends and all files should be sup-
plied separately and named clearly. Acceptable files and for-
mats are: Word or PDF files, Excel spreadsheets (only if the 
data cannot be converted properly to a PDF file), and video 
files (.mov, .avi, .mpeg).

Author's Choice™
Karger's Author's Choice™ service broadens the reach of 
your article and gives all users worldwide free and full 
access for reading, downloading and printing at www. 
karger.com. The option is available for a one-time fee of 
CHF 3000.–, which is a permissible cost in grant alloca-
tion. More information can be found at www.karger.com/ 
authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates 
under the NIH Public Access Policy that final, peer-
reviewed manuscripts appear in its digital database within 
12 months of the official publication date. As a service to 
authors, Karger submits the final version of your article on 
your behalf to PubMed Central. For those selecting our pre-

mature Author's Choice™ feature, how-
ever, are also permitted to archive the final, published ver-

sion of their article, which includes copyediting and design 

improvements as well as citation links.

Page Charges
There are no page charges for original papers of 3 or 
fewer printed pages (3,000 words including tables, il-

ustrations and references) or for case reports with 2 
fewer printed pages. Each extra complete or partial 
page is charged to the author at CHF 325.–. The allotted 
size of a paper is equal to approx. 8 manuscript pages 
double-spaced (including tables, illustrations and ref-

ences). The inability to pay charges for extra pages 
will not prejudice publication of the paper. This will be 
decided by the Editors.

Proofs
PDF proofs will be sent to the corresponding author and 
should be returned with the least possible delay.

E-pub First
All articles are published electronically ahead of print with 
a DOI number and are supplemented later with the defi-
nite reference of the printed version. The articles become avail-

able immediately after the authors' approval to publication, 
with the added advantage of being citable much earlier than 
in print. Authors can influence the time of appearance by 
promptly returning the proofs.

Reprints
Order form and price list is sent with the pdf proofs. Orders 
submitted after the issue is printed are subject to consider-
ably higher prices.
Tel Aviv, Israel • July 3-5, 2012

The Friends of Israel – Urology Symposium (FOIU), Tel Aviv, Israel, July 3-5, 2012, is a unique initiative that we hope will create an opportunity for Urologists, Uro-oncologists, Oncologists, Uro-pathologists and Uro-radiologists from all over the world to meet in Israel for a scientific and social forum.

GOTTFRIED SCHATZ

A MATTER OF WONDER
What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

Tuberculosis (TB) remains one of the major infectious diseases of mankind although drugs for its treatment have been available for nearly 60 years. The standard short-course 6-month regimen used since about 1980 has helped to save millions of lives, but co-infection with HIV has had a devastating effect on the epidemic, and multidrug-resistant TB is a growing problem, particularly in communities with a high incidence of HIV. Following the declaration by the WHO in the early 1990s that TB was a 'global health emergency', interest in TB research and the development of new drugs has increased significantly.

This volume reviews anti-TB chemotherapy with the emphasis on the actions and pharmacology of existing drugs and the development and evaluation of new agents. A close look is taken at new research regarding our existing drugs by some of the best-known specialists in the field, and historical aspects of these agents are reviewed from a modern perspective. The prospects for the introduction of new drugs and different approaches of how to assess them in adults and in children are discussed in detail. Several papers address the problems associated with drug resistance, its spread and diagnosis. Compiled by two editors from Cape Town, which has a particularly high incidence of TB and is a centre of tuberculosis research, this publication is an indispensable reference for anyone involved in the management of TB either as a researcher, clinician or administrator, and those working in drug development.

With contributions by some of the most well-known specialists in tuberculosis research

Case Reports in Nephrology and Urology

The first nephrology / urology journal dedicated exclusively to case reports
Open access!

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of nephrology and urology, including genetic susceptibility, clinical presentation, diagnosis, treatment or prevention, toxicities of therapy, critical care, supportive care, quality-of-life and survival issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed.

The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.
An essential manual for beginners and senior researchers alike

Guide for Investigator Initiated Trials

Editor
Gerhard Fortwengel

In collaboration with:
Isabel Böckler, Rafael Dymek, Sebastian Häckl, Alexander Hahn, Katrin Hertwig, Cynthia Kuhn, Birgit Lindner, Sarah Lütkens, Christoph Neumann, Marcus Paul, Madlen Pomp, Nadja Schachteli

For academic medical faculty unfamiliar with national and international regulations, the prospect of initiating and managing a clinical trial can be intimidating. The development of protocols and case report forms, compliance with regulatory requirements, the monitoring of clinical trials as well as the responsibilities of documentation are just some of the tasks the sponsor-investigator is faced with.

This book covers the entire spectrum of a clinical trial, reviewing the different steps by step: financial planning, crucial aspects of trial design, the authorization process and, finally, documentation. Moreover, it contains helpful tips, a practical glossary, instructions and a large number of resources related to the relevant regulations and forms conforming to the 'International Conference on Harmonisation and Good Clinical Practice' and the European legislation. This makes the publication at hand an essential 'cookbook' for both academic faculty new to clinical trials as well as seasoned sponsors-investigators.

Contents
