Subject Index

Adenoma, see Cavernous sinus, Pituitary, specific adenomas
Adrenocorticotropic hormone, adenoma 61
Anterior cerebral arteries 82
Anterior coronal plane, see Coronal planes
Anterior skull base defect reconstruction, endoscopic endonasal approach
cerebrospinal fluid
  leak risks 179, 180
  lumbar drainage 180
free tissue grafts 169, 170
goals 168
vascular pedicled flaps
  nasoseptal flap 170–175
  posterior pedicle inferior turbinate flap 175–177
temporoparietal fascial flap 177–179

Bimanual access 22, 23

Cavernous sinus, endoscopic endonasal approaches
anatomy 120–123
endoscope-assisted transsphenoidal surgery 208, 210, 211
ethmoido-pterigo-sphenoidal endoscopic approach
  approach phase 126, 127
  closure 128
  tumor removal 127, 128
historical perspective 120, 121
indications 123
instrumentation 124
mid-coronal plane 110, 111
midline transsphenoidal endoscopic approach
  approach phase 125
closure 126
tumor removal phase 126
outcomes
  adenoma 131, 132
  chondrosarcoma 132, 134
  chordoma 132, 134
  pterygo-maxillary endoscopic approach 128, 129
study design 129–131

Cerebellopontine angle, endoscopic approaches
advantages 192, 193
approach 198
equipment 195, 196
equipment and instrumentation 196–198
historical perspective 191, 192
indications 193–195
microvascular decompression 192–194, 198, 199
tumor resection 199
vestibular neurectomy 199

Cerebrospinal fluid
leak as skull base surgery complication
  anterior skull base defect reconstruction 170, 179, 180
characteristics 186, 187
clival lesion resection 147, 149, 150
endoscope-assisted transsphenoidal surgery 14, 17
endoscopic endonasal approach 24
esthesioneuroblastoma resection 94, 99, 101, 102
extended transsphenoidal transtuberculum-transplanum approach to suprasellar compartment 52, 55, 57
incidence 188
olfactory groove meningioma
resection 77, 79, 83
pituitary tumor endoscopic
resection 66, 70–73
repair 211–213, 227
sella standard endoscopic endonasal
transsphenoidal approach 42, 47
University of Pittsburgh Medical Center
experience 229, 230
lumbar drainage 180
Chondrosarcoma, see Cavernous sinus
Chordoma, see Cavernous sinus, Clival lesions
Clival lesions
anatomy 141
endoscope-assisted transsphenoidal
surgery 208, 210
endoscopic endonasal resection
approach 142, 143
case examples 144
complications 147–150
limitations 149, 150
outcomes 147–149
patient positioning 142
reconstruction 143, 144
resection 146–148
epidemiology 140
imaging 141, 142, 145
indications for surgery 142
Complications, endonasal skull base surgery
cerebrospinal fluid leak, see Cerebrospinal fluid
classification 183
incidence 187–189
intraoperative 184–186
postoperative 186, 187
prevention 183, 184
Coronal planes, endoscopic approaches to skull base
anterior coronal plane
indications 105, 106
transorbital approach 107, 108
contraindications 115, 116
exposure 107
imaging 107
mid-coronal plane
cavernous sinus approach 110, 111
indications 110
infratemporal approach 111, 112
transpterygoid approach 108, 109
zones 106, 107, 109
overview 104, 105
posterior coronal plane
infrapetrous approach 113, 114
jugular foramen approach 115
occipital condyle/hypoglossal canal approach 114
petrous apex 112, 113
transpterygoid approach 108, 109
zones 106
Craniocervical junction
endoscopic endonasal approach
advantages and limitations 153, 166
case examples 164, 166
complications 162, 163
contraindications 154
fixation 162
indications 153, 154
instrumentation 156, 157
operating room set-up 157
outcomes 162, 163
patient education 155, 156
planning 156
postoperative care 162
preoperative evaluation
imaging 155
physical examination 155
technique 157–161
transoral approach limitations 152, 153
Decongestion, endoscopic skull base surgery 28–30
Deep venous thrombosis, skull base surgery complication 101
Draf procedure 33, 227
Endoscope-assisted transsphenoidal surgery
carotid localization 208, 209
cerebrospinal fluid leak repair 211–213
closure 213
comparison with microscopic transsphenoidal surgery and direct sphenoidectomy 15
endoscopic endonasal pituitary surgery
advantages and limitations of pure endoscopic adenomectomy 12–17
description of endoscope holder versus hand 11
overview 10
patient positioning 11, 12
historical perspective 7–9, 204, 205
initial approach 206
instrumentation and equipment 205, 206
intraoperative imaging 206
level II procedures 226–228
level III procedures 228
level IV procedures 228
level V procedures 228, 229
training pathways 223, 224
University of Pittsburgh Medical Center 229, 230
Local anesthesia, otolaryngology head and neck surgery 29
Maxillary antrostomy 32, 33
Meningioma, see Olfactory groove meningioma, Tuberculum sellae meningioma
Microvascular decompression, cerebellopontine angle endoscopic approaches 192–194, 198, 199
Mid-coronal plane, see Coronal planes
Middle turbinate resection 31, 32
Midline transsphenoidal endoscopic approach, see Cavernous sinus
Nasoseptal flap 170–175
Neck metastasis, ethesioneuroblastoma 100
Olfactory groove meningioma
clinical features 77
endoscopic endonasal approach
advantages 77, 78
bony resection/exposure 79–81
case series 83
historical perspective 76, 77
image guidance 84, 85
learning curve 85
limitations 83–85
reconstruction 82, 83
resection 81, 82
sinonasal approach 78, 79
vascular control 81
Pituitary
endoscopic endonasal pituitary surgery
advantages and limitations of pure endoscopic adenomectomy 12–17
endoscope holder versus hand 11
overview 10
patient positioning 11, 12
tumors
endoscopic resection
advantages and limitations 63–66
complications 73, 74
nasal anatomy 67, 69
patient positioning 66, 67
repair and closure 72, 73
resection 71
sellar/cavernous sinus anatomy 70, 71
sphenoidal anatomy 69, 70
suprasellar anatomy 71, 72
epidemiology 60, 61
transsphenoidal approach historical perspective 62, 63
Posterior coronal plane, see Coronal planes
Posterior pedicle inferior turbinate flap 175–177
Prolactinoma 61
Pterygo-maxillary endoscopic approach, see Cavernous sinus
Reconstruction, see also Anterior skull base
defect reconstruction
clival lesions 143, 144
endoscope-assisted transsphenoidal surgery 211–213
olfactory groove meningioma resection 82, 83
sella 47, 48, 53–57
Seizure, skull base surgery complication 101
Sella, see also Pituitary
endoscope-assisted transsphenoidal surgery 208–210
extended transsphenoidal transtuberculum-transplanum approach to suprasellar compartment
nasal phase 49
overview 48, 49
reconstruction of skull base defect 53–57
sellar-suprasellar phase 50–53
sphenoidal phase 49, 50

Petrous apex 112, 113

Subject Index
standard endoscopic endonasal transsphenoidal approach
  nasal phase 42, 43
  overview 42
  sellar phase 44–46
  sellar reconstruction 47, 48
  sphenoid phase 43, 44

Septectomy, posterior 35, 36
Septoplasty, endoscopic 30
Sinusotomy, expanded frontal 37–39
Sphenoidectomy, posterior 35, 36
Sphenopalatine artery, ligation 34, 35
Syndrome of inappropriate antidiuretic hormone, skull base surgery
  complication 100, 101

Temporoparietal fascial flap 177–179
Thyrotropin, adenoma 61
Training, see Learning curve
Transpterygoid approach 36, 37
Tuberculum sellae meningioma 218
Turbinates, see Inferior turbinate, Middle turbinate

Vestibular neurectomy, cerebellopontine angle approach 199
